CURRICULUM
ACTIVITIES
year7

ENGLISH

Why Supercurriculum Matters in English

Supercurriculum activities in English allow pupils to explore literature and language beyond the classroom. They encourage independent thought, richer vocabulary, and stronger communication skills. By reading widely, writing creatively, and engaging with stories in many forms, pupils grow into confident, thoughtful learners ready for secondary challenges.

English Supercurriculum

Reading

1. Explore classic literature (Project Gutenberg)
2. Read myths and legends from different cultures
3. Short stories for young readers
4. Discover Shakespeare stories (BBC Bitesize)
5. Explore National Geographic Kids non-fiction

Writing

1. Daily creative prompts (Pobble 365) –
2. Join a Young Writers competition –
3. Practise grammar and sentence skills with Quill –
4. Write fan fiction inspired by a favourite book.
5. Keep a weekly reflective journal in English.

Listening

1. Storynory audiobooks & myths –
2. BBC School Radio “Talking Stories” –
3. Listen to Brains On! episodes to practise note-taking –
4. Librivox free audiobooks –
5. KidsLit Radio author interviews –

Watching

1. BBC Bitesize English video lessons –
2. TED-Ed literature lessons –
3. National Literacy Trust storytelling films –
4. Crash Course Literature (YouTube) –
5. Shakespeare’s Globe: free YouTube performances –

Researching

1. Research a favourite author’s biography using
2. Use Google Books to preview literary texts –
3. Investigate historical context of a novel (BBC History for Kids) –
4. Compare book reviews online (Goodreads) –
5. Explore how stories change when adapted to film.

Student-led Tasks

1. Lead a mini “book club” for friends or family.
2. Teach a new vocabulary word each week to classmates.
3. Present a short talk on a favourite author.
4. Run a peer-editing session for creative writing pieces.
5. Organise a class debate on a theme from a novel.

Creative Tasks

1. Create a comic strip retelling of a Shakespeare scene.
2. Illustrate a character profile from a current book.
3. Design an alternative book cover for a favourite story.
4. Write and perform a short poem as spoken word.
5. Use Canva (free) to make a poster about reading –

YEAR 7 ENGLISH

Why Supercurriculum Matters in English

Supercurriculum activities help pupils explore stories, language, and ideas beyond the classroom. By reading widely, writing regularly, listening to rich voices, watching performances, researching context, leading small tasks, and creating original work, pupils develop vocabulary, fluency, analysis, and confidence. They learn to express themselves clearly, to consider different viewpoints, and to enjoy literature as a lifelong companion.

ENGLISH FEEDBACK TEST

“Exploring stories, language and ideas”

Instructions: Rate each statement: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree. Answer the reflection at the end of each section.

A. Reading

1. I enjoy reading books, articles, or poems outside lessons.
2. I can explain the main idea of what I read.
3. I notice language features (imagery, tone, structure).
4. I can use evidence from the text to support my ideas.

Reflection: What did you read recently and what stayed with you?

B. Writing

1. I can write clear sentences and organised paragraphs.
2. I use varied vocabulary and sentence types.
3. I edit my work for accuracy and flow.
4. I can write for different purposes (to describe, persuade, inform).

Reflection: Which aspect of writing is easiest or hardest for you?

C. Listening

1. I focus during readings, talks, or podcasts.
2. I can recall key points afterwards.
3. I can explain how tone or voice affects meaning.
4. I enjoy discussing what I have heard.

Reflection: Which story, talk, or podcast helped you learn something new?

D. Watching

1. I like watching literature videos, plays, or performances.
2. I can explain what a scene or clip shows about characters or themes.
3. I notice how sound, lighting, and acting shape mood.
4. I can compare a filmed scene with the original text.

Reflection: Which performance or video deepened your understanding?

E. Researching

1. I can find reliable information about writers, texts, or contexts.
2. I take brief notes and keep track of sources.
3. I can link research to themes or characters in a text.
4. I can compare two sources and spot differences.

Reflection: What would you like to research next, and why?

F. Student-Led Tasks

1. I like sharing ideas about reading and writing with others.
2. I can lead a short activity or discussion.
3. I give kind, specific feedback to peers.
4. I can summarise what our group has learned.

Reflection: Describe a time you helped others understand a text.

G. Creative Tasks

1. I enjoy creative responses (poems, monologues, storyboards, videos).
2. I try different ideas before choosing a final version.
3. I can link my creative work to a text or theme.
4. I feel confident presenting my work.

Reflection: Which creative piece are you most proud of, and why?

Final Reflection

Name one English skill you want to improve this term (e.g., paragraph flow, close analysis, reading stamina, spoken confidence). How will you practise it beyond lessons?

ENGLISH INTERVENTION FRAMEWORK

READING

If score is 1–2 (Needs Support):

Read one short text weekly (myth, article, or poem). Write three sentences: main idea, favourite line, one new word with your own sentence. Read aloud to check understanding.

Outcome: Explains main ideas; begins to use new vocabulary accurately.

If score is 3 (Developing):

Compare two short texts (e.g., a myth and a fable). Note one shared theme and two different techniques. Keep a reading journal with a five-sentence reflection.

Outcome: Connects theme, character, and mood with simple evidence.

If score is 4–5 (Secure/Advanced):

Choose a poem or passage and analyse imagery, tone, and structure in 120 words.

Optional extension: compare with a filmed adaptation.

Outcome: Interprets style and writer's choices confidently.

WRITING

If score is 1–2 (Needs Support):

Complete daily sentence-combining drills (join short sentences using because/although/which). Build one PEEL paragraph each week and read it aloud for flow.

Outcome: Writes accurate, connected sentences and basic paragraphs.

If score is 3 (Developing):

Write a short descriptive or persuasive piece. Replace five weak words with stronger choices; add topic and concluding sentences.

Outcome: Improves vocabulary range and paragraph organisation.

If score is 4–5 (Secure/Advanced):

Rewrite a passage for a different audience or tone; add a self-editing checklist (clarity, variety, precision).

Outcome: Controls tone, purpose, and style with confident editing.

LISTENING

If score is 1–2 (Needs Support):

Listen to a 5–8 minute story or talk. Note three key facts and one new word; summarise in two sentences.

Outcome: Recalls essentials and builds vocabulary.

If score is 3 (Developing):

Listen to a short discussion or interview. Create a “First–Next–Then–Finally”

outline and note one example used by the speaker.

Outcome: Tracks structure and supports ideas with examples.

If score is 4–5 (Secure/Advanced):

Compare two readings of the same poem. Write a brief comparison of pace, emphasis, and mood.

Outcome: Analyses delivery and its effect on meaning.

WATCHING

If score is 1–2 (Needs Support):

Watch a 5–10 minute literature clip. Write “What happened? Who was involved? What changed?”

Outcome: Understands plot and character basics on screen.

If score is 3 (Developing):

Choose a short scene. Identify one directorial choice (music/lighting/gesture) and explain its effect in 5–6 sentences.

Outcome: Links visual technique to theme and emotion.

If score is 4–5 (Secure/Advanced):

Compare a scene with the original text. Write a 120-word evaluation of what was added, removed, or emphasised—and why it matters.

Outcome: Evaluates adaptation choices with evidence.

RESEARCHING

If score is 1–2 (Needs Support):

Research a writer on a safe site. Record three facts and one way context shapes a text.

Outcome: Finds reliable information and states significance simply.

If score is 3 (Developing):

Investigate a theme (e.g., friendship, power) across two texts. Create eight bullet

notes linking context and quotations.

Outcome: Connects research to textual evidence.

If score is 4–5 (Secure/Advanced):

Compare two sources on a text or author. Write which is clearer and why (evidence, balance, detail).

Outcome: Evaluates sources and justifies conclusions.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Run a 60-second “book spark”: title, one line you loved, one reason to read it.

Outcome: Builds speaking confidence about reading.

If score is 3 (Developing):

Lead a 5-minute mini-discussion with two prompt questions and a one-sentence summary of the group’s view.

Outcome: Organises and guides shared talk.

If score is 4–5 (Secure/Advanced):

Host a short debate on a character’s choice. Prepare two arguments and a balanced closing statement.

Outcome: Leads reasoning and draws fair conclusions.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Create a comic-strip retelling of a scene with captions and speech.

Outcome: Shows understanding of sequence and voice.

If score is 3 (Developing):

Write a monologue from a character’s viewpoint (120–150 words) showing conflict and motive.

Outcome: Explores perspective with text-based detail.

If score is 4–5 (Secure/Advanced):

Produce a spoken-word poem or alternative ending. Add a 5-sentence creator’s note explaining choices and effects.

Outcome: Demonstrates originality and purposeful craft.

Quick weekly routine (optional)

- **Mon:** Short reading + 3-sentence journal
- **Tue:** Sentence-combining + PEEL paragraph
- **Wed:** Listening clip + 2-sentence summary
- **Thu:** Research note-card (facts + significance)
- **Fri:** Creative response + self-reflection

MATHEMATICS

Why super curriculum matters in Mathematics

Supercurriculum work helps pupils think mathematically beyond the textbook—spotting patterns, tackling non-routine problems, and explaining reasoning clearly. It builds confidence, curiosity and readiness for deeper Key Stage 3 and GCSE study.

Reading

1. BBC Bitesize KS3 Maths topic guides –
2. NRICH student articles on problem solving –
<https://nrich.maths.org/secondary-lower>
3. Plus Magazine (maths in the real world) –
4. Mathigon courses (friendly explanations) –
5. MacTutor biographies of mathematicians –

Writing

1. Keep a weekly maths journal: choose one problem, explain your method and why it works.
2. Write and swap your own word problem; include a worked solution and a diagram.
3. Explain, step by step, how to convert a fraction to a decimal and percentage, with examples.
4. Summarise one NRICH problem you tried: strategy, dead ends, final insight –

5. Create a one-page revision sheet for a KS3 topic (e.g., angles in triangles) using BBC Bitesize –

Listening

1. Maths Appeal (UK podcast with classroom-friendly problems) –
2. The Numberphile Podcast (choose age-appropriate episodes) –
3. KidsMathTalk (study habits and strategies) –
4. A Problem Squared (problem-solving with Matt Parker; select suitable episodes) –
5. BBC School Radio maths clips (for quick refreshers) –

Watching

1. BBC Teach/Bitesize KS3 Maths video lessons –
2. Corbettmaths video playlist (clear explanations) –
3. Khan Academy: KS3-friendly arithmetic & algebra –
4. Numberphile short films (choose topics that match classwork) –
5. Mathigon Polypad tutorials (interactive maths) –

Researching

1. Investigate a mathematician's life and work using MacTutor –
2. Explore how maths is used in different careers (MathsCareers) –
3. Research the maths behind a news graphic (percentages, averages, risk). Start with BBC News graphics –
4. Compare two methods for solving linear equations; find examples on Bitesize –
5. Find an NRICH investigation, record data, and test a conjecture –

Student-led Tasks

1. Run a weekly “problem of the week” using NRICH; lead a short discussion of strategies – <https://rich.maths.org/secondary-lower>
2. Teach a mini-lesson to a peer on a topic you've mastered (e.g., ratio tables).
3. Create and mark a 10-question quiz for your form, including one extension problem.
4. Organise a class estimation challenge (lengths, times, quantities) and justify the winning estimate.

5. Start a small puzzle club (tangrams, KenKen, logic grids) and rotate the host each week.

Creative Tasks

1. Produce mathematical art using tessellations or rotational symmetry; annotate the transformations.
2. Use Mathigon Polypad to design a tiling with two shapes and explain why it covers the plane
3. Create a data infographic (e.g., club interests in your class) using bar charts and pie charts; justify your choices.
4. Build a Fibonacci/spiral collage from measurements you make; calculate ratios between successive lengths.
5. Write and perform a short “maths explainer” video (2–3 minutes) on a KS3 topic (e.g., mean vs median), using examples from Bitesize –

MATHEMATICS INTERVENTION FRAMEWORK

Use the student’s average score in each section to decide which interventions apply:

1–2 = Needs Support, 3 = Developing, 4–5 = Secure/Advanced.

READING

If score is 1–2 (Needs Support):

Focus on reading confidence and vocabulary.

Read one short article each week from *BBC Bitesize KS3 Maths* or *Mathigon*. Note three facts and one new term. Copy a worked example and explain it in your own words.

Expected outcome: You can follow step-by-step written explanations and understand basic mathematical language.

If score is 3 (Developing):

Focus on reasoning and pattern recognition.

Read one *NRICH* article about problem solving. After each section, write “What was the problem?” and “How was it solved?”. Highlight any patterns or strategies used.

Expected outcome: You can identify how ideas connect and describe strategies used in problem solving.

If score is 4–5 (Secure/Advanced):

Focus on application and synthesis.

Choose one article from *Plus Magazine* or *Maths Careers* that shows maths in real life. Write a short summary (100–150 words) explaining where the maths appears and why it matters.

Expected outcome: You explain real-world mathematical applications confidently and use technical vocabulary correctly.

WRITING

If score is 1–2 (Needs Support):

Focus on clear written explanations.

Keep a short maths journal: pick one class problem each week and write a step-by-step explanation of how you solved it and why each step works.

Expected outcome: You write logical explanations and begin to justify methods.

If score is 3 (Developing):

Focus on accuracy and clarity.

Write your own word problem with a full solution and diagram. Check if your question is clear and answerable.

Expected outcome: You communicate mathematical ideas correctly using diagrams and precise terms.

If score is 4–5 (Secure/Advanced):

Focus on summarising and teaching others.

Create a one-page revision guide for a topic (e.g., fractions, angles, averages).

Include definitions, examples, and one challenge question.

Expected outcome: You express mathematical ideas concisely and in a way that helps others learn.

LISTENING

If score is 1–2 (Needs Support):

Focus on following short spoken explanations.

Listen to *BBC School Radio Maths* or short *Maths Appeal* clips. Write three key facts or steps.

Expected outcome: You can remember main steps and vocabulary from spoken maths content.

If score is 3 (Developing):

Focus on identifying reasoning.

Listen to *KidsMathTalk* or *A Problem Squared*. Note how the speaker breaks down the problem and describe one example in your own words.

Expected outcome: You can explain the reasoning behind a mathematical argument.

If score is 4–5 (Secure/Advanced):

Focus on connection and evaluation.

Listen to a *Numberphile* episode about an interesting maths topic. Write a short paragraph linking it to something studied in school.

Expected outcome: You relate mathematical ideas across topics and evaluate their significance.

WATCHING

If score is 1–2 (Needs Support):

Focus on following video examples step by step.

Watch one *BBC Bitesize* or *Corbettmaths* clip each week. Pause and repeat until you can describe each step aloud.

Expected outcome: You understand how worked examples progress and what each step achieves.

If score is 3 (Developing):

Focus on strategy and verification.

Choose one *Khan Academy* video matching your topic. Try solving the same example before checking the answer. Note what was similar or different.

Expected outcome: You anticipate methods and verify your reasoning.

If score is 4–5 (Secure/Advanced):

Focus on synthesis and creation.

Watch a *Numberphile* short film or a *Mathigon Polypad* tutorial. Create a short presentation or poster summarising the concept.

Expected outcome: You apply mathematical ideas creatively and share understanding clearly.

RESEARCHING

If score is 1–2 (Needs Support):

Focus on curiosity and factual understanding.

Read a short biography of a mathematician on *MacTutor*. Write three facts about their discoveries and why they mattered.

Expected outcome: You understand how individuals contribute to mathematical knowledge.

If score is 3 (Developing):

Focus on linking theory to real-world use.

Find one example of maths in everyday life (shopping discounts, speed, area).

Write a paragraph showing how to calculate it and why it's important.

Expected outcome: You link classroom concepts to practical applications.

If score is 4–5 (Secure/Advanced):

Focus on comparison and analysis.

Research two methods for solving the same type of problem (for example, linear equations). Compare their advantages and conclude which is more efficient.

Expected outcome: You analyse methods critically and justify your preferred approach.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Focus on confidence and communication.

Share one interesting maths fact or pattern with a friend or family member each week. Explain how it works in simple terms.

Expected outcome: You become more confident talking about maths ideas aloud.

If score is 3 (Developing):

Focus on teamwork and initiative.

Prepare a short “Problem of the Week” to discuss with classmates. Afterwards, summarise two different strategies that were used.

Expected outcome: You contribute to shared problem solving and recognise multiple ways to reach a solution.

If score is 4–5 (Secure/Advanced):

Focus on leadership and mentoring.

Create a short quiz or mini-lesson on a maths topic you understand well. Present it to a small group and collect feedback.

Expected outcome: You demonstrate leadership by explaining and guiding others.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Focus on visual understanding.

Create a simple geometric design using symmetry or pattern. Label shapes and lines of symmetry.

Expected outcome: You identify symmetry, shape, and pattern accurately.

If score is 3 (Developing):

Focus on combining maths with data.

Design an infographic using charts or graphs to show data (for example, hobbies in your class). Explain what your graph shows.

Expected outcome: You use data-handling skills in a creative, visual form.

If score is 4–5 (Secure/Advanced):

Focus on original expression and explanation.

Create a short “Maths Explainer” video or poster demonstrating a concept such as averages, area, or Fibonacci sequences.

Expected outcome: You communicate mathematical ideas effectively, creatively, and independently.

Would you like me to continue with **Year 7 Science and Geography** in the same format (Why it matters → Feedback Test → Interventions)?

Είπες:

SCIENCE. test and interventions

To ChatGPT είπες:

Excellent — here’s the **Year 7 Science Supercurriculum package** in clean continuous text (perfect for Word or Google Forms), including:

1. a **Feedback Test** (student self-assessment + reflections), and
2. a **Score-Aligned Intervention Framework** (1–2 = Needs Support, 3 = Developing, 4–5 = Secure/Advanced).

SCIENCE

Why super curriculum matters in Science

Supercurriculum activities in Science help pupils develop curiosity about the world, practise enquiry skills, and make connections between biology, chemistry and physics. They promote independent thinking, creativity and a deeper understanding of how science shapes everyday life.

Science Supercurriculum

Reading

1. BBC Bitesize KS3 Science guides –
2. DK Find Out: Science topics for children –
3. NASA Climate Kids articles –
4. National Geographic Kids science section –
5. Royal Society of Chemistry simple experiments and facts –

Writing

1. Keep a science journal of simple experiments: prediction, method, results, conclusion.
2. Write a fact file about a planet using NASA Space Place –
3. Compose a short persuasive piece on protecting biodiversity after reading Nat Geo Kids –
4. Summarise a BBC Bitesize science article in your own words –
5. Create a poster with labelled diagrams explaining the water cycle –

Listening

1. Brains On! science podcast for kids –
2. Tumble science podcast –
3. NASA's Curious Universe podcast –
4. Wow in the World science stories –

5. BBC School Radio science clips –

Watching

1. BBC Bitesize KS3 Science video clips –
2. SciShow Kids YouTube channel –
3. National Geographic Kids science videos –
4. NASA Space Place animations –
5. TED-Ed science lessons –

Researching

1. Investigate the life of a scientist on Biography.com –
2. Research the periodic table using RSC resources –
3. Look into current environmental issues via WWF –
4. Research how renewable energy works –
5. Explore new space discoveries on NASA news –

Student-led Tasks

1. Design and lead a mini science demonstration for classmates (safe materials only).
2. Run a “fact of the week” presentation about a recent discovery.
3. Organise a debate on a topical science issue (e.g., renewable energy vs fossil fuels).

4. Teach a peer a new concept (e.g., photosynthesis) using diagrams and examples.
5. Collect and present data on a local science theme (e.g., weather or biodiversity).

Creative Tasks

1. Build a simple model of the solar system with household materials.
2. Create a comic strip showing a scientific process (e.g., digestion, electricity).
3. Write a poem or short story inspired by a scientific idea (e.g., evolution).
4. Design an infographic about climate change for young learners.
5. Produce a short video explaining a key concept, such as gravity or energy transfer.

YEAR 7 SCIENCE – FEEDBACK TEST

“Curiosity, enquiry and explaining the world”

Instructions:

Rate each statement: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree.

Answer the reflection at the end of each section.

A. Reading

1. I enjoy reading short science articles or web pages.
2. I can explain the main idea of a science text in my own words.
3. I notice cause–effect links (for example, “more CO₂ → warmer climate”).
4. I learn and use new scientific words correctly.

Reflection: Name one science article you read recently and one fact you learned.

B. Writing

1. I can write clear steps for a simple investigation.
2. I can explain results with a short conclusion.
3. I use labelled diagrams to support explanations.
4. I can write a short persuasive or informative piece on a science issue.

Reflection: What part of science writing do you find easiest or hardest?

C. Listening

1. I focus during science talks, stories or podcasts.
2. I can recall three key facts after listening.
3. I can list the steps of a process I heard.
4. I can explain why the topic matters.

Reflection: Which science audio or talk helped you learn something new?

D. Watching

1. I follow science videos and demonstrations.
2. I can explain what each step in a demonstration is for.
3. I notice variables (what is changed, measured and kept the same).

4. I can judge if a video explained something clearly.

Reflection: Which video or demonstration helped you most, and why?

E. Researching

1. I know where to find safe, reliable science information.
2. I can take notes and summarise key points.
3. I can connect research to real-life examples.
4. I can compare two sources and explain a difference.

Reflection: What science topic would you like to research next?

F. Student-Led Tasks

1. I feel comfortable sharing a science idea with others.
2. I can plan a short mini-presentation or demo.
3. I ask good questions and listen to others' ideas.
4. I can summarise what my group learned.

Reflection: Describe a time you explained a science idea to someone.

G. Creative Tasks

1. I enjoy making models, posters, comics or short videos in science.
2. I can show a process clearly with labels and arrows.
3. I can correct a common misconception in my work.
4. I feel confident presenting my creative science work.

Reflection: Which creative science task are you most proud of, and why?

Final Reflection

What is one science skill you want to improve this term, and how will you practise it outside lessons?

YEAR 7 SCIENCE – INTERVENTION FRAMEWORK

(Use the average score in each section to pick the level: 1–2, 3, or 4–5.)

READING

If score is 1–2 (Needs Support):

Read one short page weekly from DK Find Out or National Geographic Kids. Write three sentences: topic, one new fact, one question. Create a glossary card for three new words (definition + your sentence).

Outcome: Explains main ideas; uses basic scientific vocabulary accurately.

If score is 3 (Developing):

Choose a BBC Bitesize page and highlight one cause and one consequence in the text. Add two supporting examples.

Outcome: Describes cause–effect and explains simple processes.

If score is 4–5 (Secure/Advanced):

Read one NASA Climate Kids article and one RSC experiment/fact page on a related theme. Write a 120-word comparison showing the link.

Outcome: Synthesises across sources with precise subject vocabulary.

WRITING

If score is 1–2 (Needs Support):

Keep a short enquiry journal using: **Question** → **Prediction** → **Method (numbered)** → **Results (table)** → **Conclusion (one sentence)**. Start with everyday tests (e.g., absorbency, ramp friction).

Outcome: Records a basic investigation and matches conclusion to results.

If score is 3 (Developing):

Write a fact file or explanation (e.g., “How seasons happen”) using **Idea** → **Evidence/example** → **Because (scientific reason)**. Include one labelled diagram.

Outcome: Explains ideas in connected sentences with correct terms.

If score is 4–5 (Secure/Advanced):

Write a 150-word persuasive piece (e.g., biodiversity or plastics). Include one

statistic, one counter-point, and a reasoned conclusion.

Outcome: Presents balanced, evidence-based argument with clarity.

LISTENING

If score is 1–2 (Needs Support):

Listen to one short Brains On! or BBC School Radio clip (≤ 10 min). Note three facts and one new term. Retell the main idea in two sentences.

Outcome: Recalls essentials and key vocabulary.

If score is 3 (Developing):

Choose a Tumble or Wow in the World episode on a process. Write a numbered list of the steps in order.

Outcome: Tracks sequences accurately and explains “first–next–last”.

If score is 4–5 (Secure/Advanced):

Listen to NASA’s Curious Universe and write a short reflection: what surprised you; how it links to prior learning; one follow-up question.

Outcome: Connects content to prior knowledge; proposes meaningful enquiry.

WATCHING

If score is 1–2 (Needs Support):

Watch a BBC Bitesize clip on the current topic. Pause at each stage and note what was done and why.

Outcome: Follows demonstrations and understands the purpose of steps.

If score is 3 (Developing):

Watch a SciShow Kids or NatGeo Kids video. Identify **independent**, **dependent**, and one **control** (if shown).

Outcome: Recognises variables and fair testing.

If score is 4–5 (Secure/Advanced):

Watch a TED-Ed lesson and write a critique: clarity, evidence, and one improvement (add a model/map/data).

Outcome: Evaluates explanations and suggests justified improvements.

RESEARCHING

If score is 1–2 (Needs Support):

Use Biography.com to find a scientist. Record three facts and why their work matters today.

Outcome: Finds reliable information and understands significance.

If score is 3 (Developing):

Use RSC Periodic Table or National Grid “Energy Explained” to research a substance or technology. Write how it’s used and one benefit or risk.

Outcome: Links knowledge to real-life application with pros/cons.

If score is 4–5 (Secure/Advanced):

Read two short pieces on an environmental issue (e.g., WWF and a news page). Summarise the agreement and one difference, then state your evidence-based view.

Outcome: Compares sources critically and forms a reasoned conclusion.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Prepare a 60-second “fact of the week” about a recent discovery. Include where you found it and why it matters.

Outcome: Speaks briefly and clearly; shows basic source awareness.

If score is 3 (Developing):

Teach a friend a concept (e.g., photosynthesis) using a labelled sketch and a three-step explanation. Ask one check question.

Outcome: Communicates processes accurately and checks understanding.

If score is 4–5 (Secure/Advanced):

Plan a mini debate (e.g., “Should single-use plastics be banned?”). Provide two points for and two against, then give a two-sentence summary of the group’s view.

Outcome: Leads structured discussion and summarises balanced viewpoints.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Create a simple comic or storyboard for a process (digestion, water cycle). Add arrows and brief captions.

Outcome: Shows accurate sequence and labels.

If score is 3 (Developing):

Build a basic model (e.g., solar system spacing with string and beads). Write two sentences on what the model shows well and one limitation.

Outcome: Uses models to represent ideas and recognises limits.

If score is 4–5 (Secure/Advanced):

Design an infographic or short video explaining a key concept (gravity, energy transfer) for younger learners. Include one real-world example and one misconception to correct.

Outcome: Communicates complex ideas clearly; anticipates and corrects misconceptions.

HISTORY

Why super curriculum matters in History

Supercurriculum activities in History give pupils the chance to explore the past beyond textbooks. They build enquiry skills, critical thinking and empathy, showing how past events and choices shape the modern world.

Reading

1. BBC Bitesize KS3 History –

2. British Museum Young Explorers –
3. Kiddle: Middle Ages overview –
4. Spartacus Educational (secondary history resources) –
5. National Geographic Kids history section –

Writing

1. Write a diary entry imagining life in medieval England.
2. Produce a fact file on a monarch studied at school, using BBC Bitesize –
3. Create a newspaper article reporting on the Black Death.
4. Write a short comparison of medieval castles and modern houses.
5. Summarise the key points of a British Museum object story –

Listening

1. History Storytime podcast –
2. Bedtime History podcast –
3. The Past and The Curious podcast –
4. BBC Radio 4 “You’re Dead To Me” (select school-appropriate episodes) –
5. BBC School Radio history programmes –

Watching

1. BBC Bitesize KS3 History video clips –
2. Horrible Histories TV clips –
3. National Geographic Kids history videos –
4. Timeline World History Documentaries (YouTube) –
5. TED-Ed history lessons –

Researching

1. Research the Domesday Book using UK National Archives –
2. Investigate a historical site via English Heritage –
3. Research the Magna Carta with the British Library –
4. Compare historical maps with modern ones (National Library of Scotland) –
5. Explore artefacts online in the British Museum Collection –

Student-led Tasks

1. Lead a short presentation on a medieval invention.
2. Run a class quiz on historical dates and events.
3. Create a timeline for a chosen period and explain it to peers.
4. Role-play a medieval trial and assign classmates roles.
5. Interview family members about how they learned history at school.

Creative Tasks

1. Design a medieval coat of arms with symbols representing your family.
2. Create a storyboard for a short film about the Battle of Hastings.
3. Build a model of a castle using recyclable materials.
4. Write and perform a monologue as a historical figure.

5. Produce an illustrated map of a medieval town.

YEAR 7 HISTORY

Why Supercurriculum Matters in History

Supercurriculum activities in History give pupils the chance to explore the past beyond textbooks. They build enquiry skills, critical thinking and empathy, showing how past events and choices shape the modern world. By engaging with stories, sources, artefacts and debates, pupils learn to see how historians use evidence, how interpretations are formed, and how every era connects to issues we still face today.

HISTORY FEEDBACK TEST

“Understanding the past to explain the present”

Instructions:

Rate each statement using the scale below:

1 ☐ Strongly Disagree 2 ☐ Disagree 3 ☐ Not Sure 4 ☐ Agree 5 ☐ Strongly Agree

Answer the reflection at the end of each section.

A. Reading

1. I enjoy reading about past events and people.
2. I can explain the main idea or message of a historical text.
3. I notice cause and effect when reading about events.
4. I can identify how one source is different from another.

Reflection: Which historical story or article did you find most interesting, and why?

B. Writing

1. I can write clearly about people or events from the past.
2. I use historical words like “monarch,” “empire,” or “revolt” accurately.
3. I can organise information in order and by importance.
4. I can write a conclusion that sums up my main point.

Reflection: What kind of writing in History do you find easiest or hardest (e.g., diary, report, comparison)?

C. Listening

1. I can follow a story or explanation about a past event.
2. I remember key names, places, and dates after listening.
3. I can tell the difference between fact and opinion in what I hear.

4. I can explain why an event was important after listening to it.
Reflection: What historical podcast, clip, or story helped you learn something new?

D. Watching

1. I enjoy watching historical documentaries or re-enactments.
2. I can describe what happened and who was involved in a video.
3. I can link what I watched to what we learned in class.
4. I can spot when a film or programme adds imagination rather than fact.
Reflection: Which history video or documentary helped you understand a topic better?

E. Researching

1. I can find reliable sources about historical people or events.
2. I can take short notes and summarise key facts.
3. I can compare two sources and find similarities or differences.
4. I can explain how a discovery or invention changed history.
Reflection: What historical topic would you like to research next, and why?

F. Student-Led Tasks

1. I enjoy talking about history with others.
2. I can prepare a short presentation about an event or figure.
3. I can organise information clearly for others to understand.

4. I can lead a short discussion or activity about a historical theme.

Reflection: Describe a time when you helped others understand a history topic.

G. Creative Tasks

1. I enjoy showing what I know through art, models, or performances.
2. I can retell an event in a creative way while keeping it accurate.
3. I can explain how my creative work shows real historical facts.
4. I feel confident presenting creative projects to others.

Reflection: Which creative project helped you understand a piece of history more deeply?

Final Reflection

What is one area of History you want to understand better this term, and how could you explore it beyond lessons?

HISTORY INTERVENTION FRAMEWORK

Use the student's average section score to guide the next step.

1–2 = Needs Support 3 = Developing 4–5 = Secure/Advanced

READING

If score is 1–2 (Needs Support):

Focus on understanding main ideas and vocabulary.

Read one short *BBC Bitesize KS3 History* or *National Geographic Kids – History* article weekly. After reading, write: “Who?” “What happened?” and “Why is it important?” Highlight three new words and define them.

Outcome: Understands the main idea, remembers key facts, and uses simple historical terms.

If score is 3 (Developing):

Focus on cause, consequence, and change.

Read one story or page from *British Museum Young Explorers* or *Kiddle History*.

Identify one cause, one consequence, one thing that changed, and one that stayed the same.

Outcome: Recognises historical patterns and can link cause and consequence.

If score is 4–5 (Secure/Advanced):

Focus on interpretation and multiple perspectives.

Compare how two sites (e.g., *BBC Bitesize* and *Spartacus Educational*) describe the same event. Write 100 words on how and why the interpretations differ.

Outcome: Analyses evidence critically and understands differing viewpoints.

WRITING

If score is 1–2 (Needs Support):

Focus on sentence structure and sequence.

Write a diary entry imagining life in a chosen period (e.g., medieval England). Use “First, Next, Then, Finally” to describe events.

Outcome: Writes clear, ordered sentences about historical experiences.

If score is 3 (Developing):

Focus on paragraph organisation and evidence.

Create a short newspaper article reporting on an event such as the Black Death or Battle of Hastings. Include a headline, date, place, and two factual details.

Outcome: Organises writing with evidence and context.

If score is 4–5 (Secure/Advanced):

Focus on comparison and analysis.

Write 150 words comparing two periods, such as medieval castles and modern homes, or two rulers’ styles of leadership. Finish with a short conclusion about their significance.

Outcome: Writes analytically, using comparisons and conclusions.

LISTENING

If score is 1–2 (Needs Support):

Focus on basic recall.

Listen to one short *History Storytime* or *Bedtime History* podcast weekly. Write three facts and retell the main point aloud.

Outcome: Can recall facts and main ideas accurately.

If score is 3 (Developing):

Focus on chronology and importance.

Listen to *The Past and The Curious* and create a short timeline from what you heard. Add one sentence on why the event mattered.

Outcome: Understands historical order and significance.

If score is 4–5 (Secure/Advanced):

Focus on interpretation.

Listen to a suitable *You're Dead To Me* episode. Write three sentences identifying the presenter's opinion, one piece of evidence used, and one question to research further.

Outcome: Evaluates perspectives and develops independent enquiry.

WATCHING

If score is 1–2 (Needs Support):

Focus on storyline and context.

Watch a *BBC Bitesize* or *Horrible Histories* video. Write three short sentences:

“What happened?”, “Who was involved?”, “Where did it take place?”

Outcome: Summarises main facts and context from videos.

If score is 3 (Developing):

Focus on accuracy and bias.

Watch a short *Timeline* documentary. Write one fact, one opinion, and one question about what you saw.

Outcome: Distinguishes between evidence and opinion in historical film.

If score is 4–5 (Secure/Advanced):

Focus on evaluation and reflection.

Watch a *TED-Ed History* clip. Write a 100-word response on clarity, use of

evidence, and what extra information would improve it.

Outcome: Critically evaluates visual presentations of history.

RESEARCHING

If score is 1–2 (Needs Support):

Focus on basic factual research.

Choose one topic (e.g., the Domesday Book) and find three facts using the *UK National Archives* site. Explain why the document or event mattered.

Outcome: Collects accurate facts and explains basic importance.

If score is 3 (Developing):

Focus on place and evidence.

Visit a virtual site on *English Heritage* or the *British Museum*. Write a paragraph describing what you learned and how it shows life at the time.

Outcome: Connects places and artefacts with historical context.

If score is 4–5 (Secure/Advanced):

Focus on comparison and interpretation.

Research one document (e.g., Magna Carta) using two sources. Write three sentences comparing their interpretations.

Outcome: Compares sources effectively and draws independent conclusions.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Focus on sharing information aloud.

Prepare a short one-minute talk on a medieval invention or person. Include who they were and one reason they were important.

Outcome: Communicates basic historical information confidently.

If score is 3 (Developing):

Focus on organisation and presentation.

Create a five-event timeline for a topic you enjoy. Present it to a small group, explaining why you chose those events.

Outcome: Organises events chronologically and explains choices.

If score is 4–5 (Secure/Advanced):

Focus on leadership and reflection.

Run a mini quiz or role-play a short historical trial. At the end, write a short reflection on what you learned about justice, society, or leadership.

Outcome: Leads collaborative learning and reflects on themes.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Focus on visual understanding.

Design a simple coat of arms or draw an artefact from the period studied. Add one sentence explaining each symbol or object.

Outcome: Shows understanding through visuals and explanation.

If score is 3 (Developing):

Focus on storytelling and context.

Create a short storyboard for an event such as the Battle of Hastings, showing six frames with captions.

Outcome: Demonstrates sequence and factual accuracy through storytelling.

If score is 4–5 (Secure/Advanced):

Focus on creativity and historical reasoning.

Write and perform a monologue as a historical figure or create an illustrated map of a medieval town showing key sites. Add a short note explaining what each feature reveals about life at the time.

Outcome: Communicates historical understanding creatively, with reasoning and accuracy.

Would you like me to prepare **Geography next**, with the same three-part structure (Why it matters → Feedback Test → Interventions)?

Είπες:

geography

To ChatGPT είπε:

Excellent — here is the **Year 7 Geography Supercurriculum package**, written in the same professional continuous style as English, Mathematics, Science, and History.

It includes:

1. **Why Supercurriculum Matters in Geography**
2. **Student Feedback Test** (self-assessment + reflections)
3. **Score-Aligned Intervention Framework** (1–2 = Needs Support, 3 = Developing, 4–5 = Secure/Advanced)

GEOGRAPHY

Why super curriculum matters in Geography

Supercurriculum activities in Geography help pupils see the connections between people, places and environments. They encourage curiosity about the planet, critical thinking about global challenges, and awareness of how human decisions affect the natural world.

Reading

1. BBC Bitesize KS3 Geography guides –
2. National Geographic Kids –
3. Kiddle: Climate change explained –
4. DK Find Out: Volcanoes and earthquakes –
5. NASA Climate Kids –

Writing

1. Write a fact file on a country using National Geographic Kids –
2. Create a weather forecast script after exploring NASA Climate Kids –
3. Write a short persuasive piece about protecting rainforests –
4. Compare life in two different biomes (e.g. desert and rainforest) –
5. Keep a travel diary entry describing a journey across a continent.

Listening

1. Brains On! episodes about the Earth –
2. Tumble science podcast (geography/earth focus) –
3. BBC Earth Kids soundscapes –
4. Map Men podcast (geography explained with humour) –
5. Wow in the World podcast: nature and earth stories –

Watching

1. BBC Bitesize KS3 Geography videos –
2. National Geographic Kids YouTube –
3. NASA Climate Kids animations –
4. DK Find Out video clips on natural disasters –
5. BBC Earth Kids “Blue Planet” short clips –

Researching

1. Research local and global climate issues via WWF –
2. Investigate renewable energy on National Grid –
3. Explore maps of earthquakes and volcanoes worldwide (USGS) –
4. Use Ordnance Survey Mapzone to study map skills –
5. Research global cities and their populations (UN data) –

Student-led Tasks

1. Lead a debate on climate change solutions.
2. Create a poster campaign for saving water in school.
3. Present a “country of the week” talk using National Geographic Kids.
4. Organise a quiz about world capitals and landmarks.
5. Plan a mock expedition: routes, kit, and maps.

Creative Tasks

1. Draw a detailed map of an imaginary island with key features.
2. Build a 3D model of a volcano and explain how it erupts.
3. Write and perform a weather report using real data.
4. Create an infographic about endangered animals and their habitats.
5. Make a travel brochure for a world heritage site.

YEAR 7 GEOGRAPHY

Why Supercurriculum Matters in Geography

Supercurriculum activities in Geography help pupils see the connections between people, places, and environments. They encourage curiosity about the planet, critical thinking about global challenges, and awareness of how human decisions affect the natural world. Through reading, research, and creative exploration, pupils develop spatial awareness, environmental responsibility, and the confidence to discuss local and global issues using real data and maps.

GEOGRAPHY FEEDBACK TEST

“Exploring our planet and understanding our impact”

Instructions:

Rate each statement using the scale below:

1 ☐ Strongly Disagree 2 ☐ Disagree 3 ☐ Not Sure 4 ☐ Agree 5 ☐ Strongly Agree

Answer the reflection at the end of each section.

A. Reading

1. I enjoy reading about places, people, and environments.
2. I can explain the main idea of a geography article or guide.
3. I notice cause and effect in geography texts (for example, “deforestation → loss of habitat”).
4. I can use new geographical words correctly.

Reflection: Which geography article or topic have you enjoyed reading most, and why?

B. Writing

1. I can write short, clear explanations about geographical topics.
2. I use data, facts, or examples to support my ideas.
3. I can write persuasive or comparative pieces about global issues.

4. I organise my writing logically with an introduction and conclusion.
Reflection: Which type of geography writing (fact file, report, or diary) do you find easiest or hardest?

C. Listening

1. I focus when listening to geography videos, podcasts, or discussions.
2. I can recall three key facts or ideas afterwards.
3. I can describe how a process (like the water cycle) happens.
4. I can explain how what I heard connects to human or environmental change.
Reflection: What podcast, clip, or discussion helped you understand a geography topic better?

D. Watching

1. I enjoy watching geography videos and documentaries.
2. I can describe what each stage of a natural process shows.
3. I can link what I see in a video to what we study in class.
4. I can tell if a video is explaining evidence or opinion.
Reflection: Which video or documentary helped you see geography in action?

E. Researching

1. I can find reliable information about places or environmental issues.
2. I can use maps or graphs to describe what I find.
3. I can link my research to global or local examples.

4. I can compare two sources and explain which is more reliable.

Reflection: What place, map, or issue would you like to research next, and why?

F. Student-Led Tasks

1. I enjoy sharing geography ideas with others.
2. I can present a short talk or quiz about a country or issue.
3. I can lead a small activity such as a poster campaign or debate.
4. I can summarise what my group discovered after a discussion.

Reflection: Describe a time when you helped others understand a geography topic.

G. Creative Tasks

1. I enjoy showing geography ideas through drawings, maps, or models.
2. I can represent information visually with accuracy (for example, a labelled diagram or chart).
3. I can connect creativity with real data or geographical facts.
4. I feel confident presenting my creative geography work.

Reflection: Which creative geography project helped you understand a topic more deeply?

Final Reflection

What is one geography skill you want to strengthen this term, and how could you practise it beyond the classroom?

GEOGRAPHY INTERVENTION FRAMEWORK

(Use the average score in each section to guide support or enrichment.)

1–2 = Needs Support 3 = Developing 4–5 = Secure/Advanced

READING

If score is 1–2 (Needs Support):

Focus on main ideas and vocabulary.

Read one short geography text each week from *BBC Bitesize KS3 Geography* or *DK Find Out*. Write three sentences: what the topic is, one new fact, and one question.

Keep a glossary of new terms with short examples.

Outcome: Understands main ideas and begins using basic geographical language confidently.

If score is 3 (Developing):

Focus on cause and effect.

Read an article about volcanoes, weather, or deforestation. Identify one cause, one effect, and one way humans respond.

Outcome: Recognises processes and links between natural and human activity.

If score is 4–5 (Secure/Advanced):

Focus on synthesis and evaluation.

Read two short articles about the same issue (e.g., climate change or migration).

Write a 120-word summary comparing their points and evidence.

Outcome: Combines and evaluates information from multiple sources using precise geographical terms.

WRITING

If score is 1–2 (Needs Support):

Focus on structure and clarity.

Write a short fact file about one country: location, climate, landscape, and one human feature (population or city). Use complete sentences.

Outcome: Presents basic information clearly and correctly.

If score is 3 (Developing):

Focus on explanation and reasoning.

Write a persuasive paragraph about protecting rainforests or saving energy. Use the pattern: problem → evidence → solution → conclusion.

Outcome: Explains issues with structure and simple evidence.

If score is 4–5 (Secure/Advanced):

Focus on comparison and analysis.

Write a 150-word comparison between two biomes (for example, desert and rainforest). End with one paragraph explaining which environment is more vulnerable.

Outcome: Writes with precision and balanced reasoning, using subject vocabulary accurately.

LISTENING

If score is 1–2 (Needs Support):

Focus on remembering facts.

Listen to one short *Brains On!* or *BBC Earth Kids* audio each week. Note three facts and one new word. Retell the main idea in two sentences.

Outcome: Recalls information accurately and recognises key vocabulary.

If score is 3 (Developing):

Focus on process and understanding.

Choose an episode about a natural process (e.g., earthquakes or the water cycle).

Write a numbered list of stages described.

Outcome: Explains a sequence of events clearly and in order.

If score is 4–5 (Secure/Advanced):

Focus on reflection and significance.

After listening to a talk on global or environmental change, write a short reflection: what surprised you, what questions you now have, and how this issue affects people.

Outcome: Connects spoken ideas to global themes and forms thoughtful questions.

WATCHING

If score is 1–2 (Needs Support):

Focus on identifying main points.

Watch a short *BBC Bitesize* or *National Geographic Kids* video. Write three sentences: “What happened?”, “Where was it?”, and “Why is it important?”.

Outcome: Describes events and places accurately.

If score is 3 (Developing):

Focus on linking visuals and data.

Watch a *DK Find Out* or *NASA Climate Kids* animation about natural disasters.

Note two facts and one visual clue that helps explain them (e.g., map, graph, colour).

Outcome: Connects data and images to meaning effectively.

If score is 4–5 (Secure/Advanced):

Focus on evaluation.

Watch a *BBC Earth Kids* or *TED-Ed* geography video. Write a 100-word critique covering clarity, evidence, and how it could be improved.

Outcome: Evaluates accuracy and communication in visual explanations.

RESEARCHING

If score is 1–2 (Needs Support):

Focus on collecting simple facts.

Use *WWF* or *National Grid Energy Explained* to find three facts about an environmental issue. Add a small sketch map showing where it occurs.

Outcome: Finds reliable facts and locates them geographically.

If score is 3 (Developing):

Focus on using data.

Find one set of information (city populations, earthquake locations, or rainfall).

Present it as a simple chart or paragraph describing the pattern.

Outcome: Reads and describes trends in basic data sets.

If score is 4–5 (Secure/Advanced):

Focus on comparing and concluding.

Compare two different maps or data sets on the same theme (for example, renewable energy or urban growth). Write three sentences explaining similarities,

differences, and implications.

Outcome: Analyses and explains data critically with clear conclusions.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Focus on participation.

Prepare a 60-second talk about one country or landmark. Say where it is and one interesting fact.

Outcome: Builds confidence speaking about geography.

If score is 3 (Developing):

Focus on explanation.

Lead a short “Country of the Week” presentation using two pictures and a fact file. End with one question for others to answer.

Outcome: Organises and presents geographical information clearly.

If score is 4–5 (Secure/Advanced):

Focus on initiative and leadership.

Run a mini debate or quiz on a global challenge (e.g., water use, climate change).

Write a short summary of what your group learned.

Outcome: Leads discussions and summarises learning effectively.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Focus on visual understanding.

Draw a simple labelled map of an imaginary island showing mountains, rivers, and settlements.

Outcome: Understands physical and human features and places them logically.

If score is 3 (Developing):

Focus on linking creativity to data.

Create a poster or infographic showing endangered animals or renewable energy types. Include one real statistic.

Outcome: Combines creativity with factual information effectively.

If score is 4-5 (Secure/Advanced):

Focus on communication and originality.

Produce a short “weather report” video or travel brochure for a world heritage site, using real data and persuasive language.

Outcome: Presents geographical information confidently and creatively.

ART & DESIGN

Why super curriculum matters in Art & Design

Supercurriculum activities in Art & Design allow pupils to express ideas creatively, explore different cultures and movements, and develop technical skills beyond the classroom. They also encourage critical thinking about how art influences society and how design shapes the world.

Reading

1. Tate Kids: Explore artists and artworks –
2. National Gallery learning for schools –
3. The Art Story (artists and movements) –
4. Canva: Colour theory explained –
5. Kids Konnect: Famous paintings explained –

Writing

1. Keep an art journal combining sketches and short reflections.
2. Write a short biography of a famous artist after using Tate Kids – <https://www.tate.org.uk/kids/explore>
3. Write a review of an artwork from the National Gallery – <https://www.nationalgallery.org.uk/paintings>
4. Draft instructions for creating a simple artwork step by step.
5. Compose a poem inspired by a favourite painting.

Listening

1. Art Detective podcast (Art UK) –
2. BBC Radio 4 “The Art of ...” (short episodes) –
3. Kids Ask Authors podcast (with illustrators) –
4. National Gallery audio tours –
5. ArtCurious podcast (art history stories) –

Watching

1. Tate Kids “Make” art tutorials –
2. BBC Bitesize KS3 Art & Design –
3. National Gallery art lessons –
4. MoMA Learning videos –
5. Art for Kids Hub drawing channel –

Researching

1. Research a famous painter on The Art Story –
2. Investigate how colour theory is used in design –
3. Explore the history of an artwork in the National Gallery collection –
4. Research how artists responded to historical events (Tate resources) –

5. Study art from a non-European culture (Met Museum collection online) –

Student-led Tasks

1. Lead a short art workshop for classmates (e.g., sketching objects).
2. Organise a mini exhibition of your own or classmates' artwork.
3. Give a short talk about your favourite artist.
4. Run a peer feedback session on creative projects.
5. Lead a collaborative mural or group artwork in school.

Creative Tasks

1. Create a collage using recycled materials.
2. Design a new cover for a favourite book.
3. Produce a self-portrait in the style of a chosen artist.
4. Experiment with digital art using free tools such as Sketchpad – <https://sketch.io/sketchpad/>
5. Make a stop-motion animation of a drawing coming to life.

YEAR 7 ART & DESIGN

Why Supercurriculum Matters in Art & Design

Supercurriculum activities in Art & Design help pupils look closely, think creatively, and communicate ideas visually. By exploring different materials, movements, and makers beyond the classroom, pupils develop imagination,

problem-solving, and confidence. They learn to analyse artworks, experiment with techniques, and reflect on their own process — skills that transfer to design, technology, media, and many other fields. Most importantly, they discover that creativity is a habit: noticing, trying, evaluating, and improving.

ART & DESIGN FEEDBACK TEST

“Seeing, making, reflecting”

Instructions:

Rate each statement using: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree.

Answer the reflection at the end of each section.

A. Reading

1. I enjoy reading short texts about artists, designers, or movements.
2. I can explain the main idea or message behind a piece of art.
3. I notice keywords such as composition, contrast, and texture.
4. I can summarise what makes an artist’s style distinctive.

Reflection: Which artist, designer, or artwork have you enjoyed reading about, and why?

B. Writing

1. I can describe my own work clearly using art vocabulary.
2. I can explain how I developed an idea from first sketch to final piece.
3. I can give balanced evaluations of my work (what went well / even better if).
4. I can write a short response comparing two artworks.

Reflection: What part of art writing is easiest or hardest for you (description, evaluation, comparison)?

C. Listening

1. I focus when hearing explanations of techniques or artist talks.
2. I can remember two or three key points from a demonstration.
3. I can repeat safety and setup steps for materials.
4. I can explain why a technique was chosen for a certain effect.

Reflection: Which talk or demonstration helped you most, and why?

D. Watching

1. I learn well from process videos or gallery walkthroughs.
2. I can identify the order of steps in a technique.
3. I can spot how colour, light, or composition change the mood.
4. I can judge whether an explanation was clear and complete.

Reflection: Name one video that improved your practical skills or art understanding.

E. Researching

1. I can find reliable information about an artist, material, or movement.
2. I take brief notes and record sources or image credits.
3. I can link my research to my own project ideas.
4. I can compare two sources and explain a difference in opinion or emphasis.

Reflection: What artist, craft, or design field would you like to research next?

F. Student-Led Tasks

1. I enjoy sharing techniques or ideas with others.
2. I can plan a short demo or mini-tutorial for a small group.
3. I can ask helpful questions and give kind, useful feedback.

4. I can summarise what our group achieved in a session.

Reflection: Describe a time you helped someone improve their artwork.

G. Creative Tasks

1. I enjoy experimenting with different materials or digital tools.
2. I try out multiple ideas before deciding on a final piece.
3. I refine my work through drafts, tests, or revisions.
4. I feel confident presenting finished work and explaining choices.

Reflection: Which piece are you most proud of, and what choices made it successful?

Final Reflection

Name one skill you want to improve this term (for example, shading, colour mixing, composition, digital layout). How will you practise it beyond lessons?

ART & DESIGN INTERVENTION FRAMEWORK

(Use the average score per section to select the level: 1–2, 3, or 4–5.)

READING

If score is 1–2 (Needs Support):

Read one short artist profile each week. Note three facts (materials, subjects, influences) and one key word to learn. Write one sentence on how the artist creates mood.

Outcome: Understands main ideas and begins to use basic art vocabulary.

If score is 3 (Developing):

Read two brief texts on different artists working with similar themes (for example, portraits or landscapes). Write a four-sentence comparison focusing on style, colour, and composition.

Outcome: Compares artists using clear, topic-specific language.

If score is 4–5 (Secure/Advanced):

Read about a movement (for example, Impressionism, Bauhaus, or Street Art). Write a 120-word summary explaining principles and how they appear in two example works.

Outcome: Synthesises information and explains stylistic principles accurately.

WRITING

If score is 1–2 (Needs Support):

Complete a simple evaluation after each task: **Subject, Materials, One success, One improvement.** Add three labels using correct terms (line, texture, contrast).

Outcome: Writes clear, short evaluations using core vocabulary.

If score is 3 (Developing):

Write a process paragraph: **Idea → Experiment → Choice → Result.** Include one photo or sketch showing a change you made and why.

Outcome: Explains decision-making and links experiments to outcomes.

If score is 4–5 (Secure/Advanced):

Write a comparative critique (150 words) of two works (your own and a reference image), addressing composition, colour harmony, focal point, and audience impact.

Outcome: Produces analytical writing with precise terms and justified judgments.

LISTENING

If score is 1–2 (Needs Support):

After a demonstration, list three safety or setup steps and two technique tips. Repeat them aloud or to a partner.

Outcome: Remembers essentials and follows instructions accurately.

If score is 3 (Developing):

Listen to a short talk on technique (for example, watercolour washes or cross-hatching). Write a numbered list of steps and one “common mistake to avoid”.

Outcome: Tracks sequences and anticipates pitfalls.

If score is 4–5 (Secure/Advanced):

Listen to an artist interview or gallery talk. Write a brief reflection connecting one idea to your current project plan.

Outcome: Connects ideas from talks to personal practice.

WATCHING

If score is 1–2 (Needs Support):

Watch a short process video. Pause after each stage and label the step (sketch, underpainting, layering, highlights).

Outcome: Understands workflow stages and their purpose.

If score is 3 (Developing):

Watch a gallery or exhibition walkthrough. Identify how display choices (lighting, height, spacing) affect viewing. Note one idea to try in a mini-display of your own work.

Outcome: Recognises curatorial choices and audience impact.

If score is 4–5 (Secure/Advanced):

Watch a technique masterclass and write a micro-review on clarity, pacing, and one improvement. Apply one technique in a 20-minute study and annotate results.

Outcome: Evaluates instruction critically and applies techniques independently.

RESEARCHING

If score is 1–2 (Needs Support):

Choose one artist. Record: **Who/Where, Materials, Subject, One influence.**

Credit one image correctly (artist, title, year).

Outcome: Gathers reliable basics and uses simple citation.

If score is 3 (Developing):

Research a material or tool (for example, charcoal, lino, digital brush sets). Create a one-paragraph guide: properties, best uses, limitations.

Outcome: Links material properties to practical choices.

If score is 4–5 (Secure/Advanced):

Compare two sources on a movement or technique; note one agreement and one difference. Conclude which is more useful for your project and why.

Outcome: Evaluates sources and selects with purpose.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Plan a 60-second “show and tell” of one sketch: name the technique and one success.

Outcome: Builds confidence sharing work and using terms aloud.

If score is 3 (Developing):

Lead a mini-tutorial (5 minutes) on a simple skill (for example, blending coloured pencils). Provide one practice exercise and a checklist.

Outcome: Explains steps clearly and supports peers.

If score is 4–5 (Secure/Advanced):

Organise a small peer critique: set three prompts (composition, colour, message), time the session, and write a two-sentence summary of group feedback.

Outcome: Facilitates constructive critique and synthesises insights.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Create a three-thumbnail sheet exploring different compositions of the same subject. Choose one to develop and state why.

Outcome: Experiments with layout and makes informed choices.

If score is 3 (Developing):

Produce a mixed-media study combining drawing and collage (for example, pencil + patterned paper). Annotate where each material works best.

Outcome: Combines materials purposefully and reflects on effect.

If score is 4–5 (Secure/Advanced):

Design a mini-project: **theme, artist influence, experiments, final piece plan.**

Set two success criteria (for example, strong focal point; cohesive palette) and evaluate against them after completion.

Outcome: Plans and delivers an independent creative project with clear criteria and reflective evaluation.

DESIGN & TECHNOLOGY

Why super curriculum matters in Design & Technology

Supercurriculum activities in DT help pupils apply creativity and problem-solving to real-world challenges. They encourage innovation, teamwork and resilience, while building an understanding of how products are designed, engineered and improved.

Design & Technology Supercurriculum

Reading

1. BBC Bitesize KS3 Design & Technology –
2. Design Museum learning resources –
3. NASA JPL Engineering Design Process –
4. DK Find Out: Materials and structures –
5. Explain That Stuff: How everyday objects work –

Writing

1. Write a design brief for a new classroom product.
2. Keep a design logbook with sketches and evaluations.
3. Draft step-by-step instructions for making a prototype – see inspiration at <https://www.bbc.co.uk/bitesize/subjects/zyr9wmn>
4. Write a fact file on a famous inventor from the Design Museum –
5. Review a Dyson Challenge Card project you try –

Listening

1. Tumble science podcast: engineering episodes –
2. Brains On! engineering and invention episodes –
3. Wow in the World technology stories –
4. Engineering Matters podcast (school-appropriate episodes) –
5. KidsLab podcast (STEM, robotics and design) –

Watching

1. PBS Kids Design Squad Global –
2. BBC Bitesize DT video clips –
3. Dyson Foundation Challenge Cards in action –
4. Crash Course Kids: Engineering and design videos –
5. Exploratorium Tinkering Studio –

Researching

1. Research an everyday invention and how it has evolved (Explain That Stuff) –
2. Investigate renewable energy product designs (National Grid) –
3. Explore materials testing and usage (BBC Bitesize) –
4. Research a famous product designer at the Design Museum –
5. Compare two designs that solve the same problem (e.g. bicycles across time).

Student-led Tasks

1. Lead a mini design challenge (e.g. tallest paper tower).
2. Present a short talk on a famous invention and how it changed society.
3. Run a peer workshop on safe use of simple materials and tools.
4. Organise a group project to design and test a product from recycled items.
5. Lead a discussion about how design can solve local community problems.

Creative Tasks

1. Design a sustainable home using sketches and labels.
2. Create a model bridge from straws or card and test its strength.
3. Invent and draw a gadget that could help in daily life.
4. Make a cardboard prototype of a new packaging idea.
5. Design a logo and advertisement for a product you invented.

YEAR 7 DESIGN & TECHNOLOGY

Why Supercurriculum Matters in Design & Technology

Design & Technology turns ideas into solutions. Supercurriculum activities help pupils notice problems worth solving, understand users' needs, and combine creativity with technical knowledge. By reading design stories, sketching and prototyping at home, testing materials, and reflecting on outcomes, pupils build resilience, precision, and judgement. They learn how products are designed, made, and improved sustainably; how mechanisms, structures, electronics, and digital tools work together; and how iterative design turns "first drafts" into robust, user-centred outcomes.

D&T FEEDBACK TEST

“Think like a designer; make like a professional”

Instructions:

Rate each statement: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree.

Answer the reflection at the end of each section.

A. Reading

1. I enjoy reading short pieces about products, designers, or engineering ideas.
2. I can explain the purpose and main features of a product I read about.
3. I notice design vocabulary (ergonomics, sustainability, mechanism, tolerance).
4. I can summarise how a design meets user needs.

Reflection: Name a product or designer you read about and one idea that inspired you.

B. Writing

1. I can write a clear design brief and success criteria.
2. I can explain my design decisions using correct terms (materials, processes, finishes).
3. I can evaluate a prototype honestly (what went well / even better if).
4. I can write simple instructions or a method safely and in order.

Reflection: What part of design writing is easiest or hardest (briefs, evaluations, instructions)?

C. Listening

1. I focus during demonstrations and safety explanations.
2. I can recall key steps of a making process after hearing them.

3. I can repeat the safety checks for tools and equipment.
4. I can explain why a chosen method or joint is suitable.

Reflection: Which explanation or demo helped you most, and why?

D. Watching

1. I learn well from build/process videos.
2. I can identify the sequence of operations in a project.
3. I can spot where accuracy and quality control are checked.
4. I can judge whether the video shows safe and sustainable practice.

Reflection: Which video improved your practical skills or design understanding?

E. Researching

1. I can find reliable information on materials, mechanisms, or components.
2. I can gather user needs through simple research (survey, interview, observation).
3. I can compare two materials or processes and choose appropriately.
4. I can reference or credit images/sources correctly.

Reflection: What material, mechanism, or user group would you like to research next?

F. Student-Led Tasks

1. I enjoy sharing design ideas and sketches with others.
2. I can lead a short “how-to” mini-demo for a simple technique.
3. I ask helpful questions and give kind, specific feedback.
4. I can summarise group decisions and next steps.

Reflection: Describe a time you led or improved a team design activity.

G. Creative/Practical Tasks

1. I sketch multiple ideas before choosing one.
2. I can prototype quickly (paper/card) and refine from feedback.
3. I work accurately and check measurements/tolerances.
4. I feel confident presenting a final prototype and explaining choices.

Reflection: Which prototype or model are you most proud of, and why?

Final Reflection

Name one D&T skill to improve this term (for example, isometric sketching, measuring accurately, CAD layout, safe tool use, simple circuits). How will you practise it beyond lessons?

D&T INTERVENTION FRAMEWORK

(Use the average score per section to select the level: 1–2, 3, or 4–5.)

READING

If score is 1–2 (Needs Support):

Read one short product profile each week. List: product purpose, two key features, one material used, and why. Create a mini-glossary of three new terms.

Outcome: Understands purpose, features, and basic vocabulary.

If score is 3 (Developing):

Read two short pieces on similar products. Write four sentences comparing user needs, materials, and sustainability.

Outcome: Compares designs using accurate terms and simple reasoning.

If score is 4–5 (Secure/Advanced):

Read about a designer or design movement. Write a 120-word summary linking principles (e.g., simplicity, repairability) to a modern product.

Outcome: Synthesises ideas and applies principles to new contexts.

WRITING

If score is 1–2 (Needs Support):

Write a basic brief: **User, Need, Purpose, Success criteria (3 items)**. Add a simple materials list and tools list.

Outcome: Produces clear briefs and criteria in complete sentences.

If score is 3 (Developing):

Write a process plan for a small project using numbered steps and key checks (measure, mark, cut, finish). Add one safety note per step.

Outcome: Communicates methods logically with safety awareness.

If score is 4–5 (Secure/Advanced):

Write a balanced evaluation of a prototype: test results, tolerances, sustainability choices, and two specific improvements with reasons.

Outcome: Evaluates with evidence and technical precision.

LISTENING

If score is 1–2 (Needs Support):

After a demo, note three safety points and three steps. Repeat them to a peer.

Outcome: Remembers essentials and follows instructions.

If score is 3 (Developing):

Listen to a process explanation (e.g., lap joint, hemming, sanding sequence).

Create a quick checklist and use it during a practice task.

Outcome: Applies sequences accurately and consistently.

If score is 4–5 (Secure/Advanced):

Listen to a case study of a product and explain why a specific joint, fastening, or finish was chosen.

Outcome: Justifies method selection based on properties and use.

WATCHING

If score is 1–2 (Needs Support):

Watch a short build video. Pause at each stage and label: **measure/mark**,

cut/shape, join/assemble, finish, quality check.

Outcome: Understands the order of operations and purpose of each stage.

If score is 3 (Developing):

Watch a prototype walkthrough. Identify two points where accuracy is checked and how waste is reduced.

Outcome: Notices quality control and sustainability in practice.

If score is 4–5 (Secure/Advanced):

Watch a method comparison (e.g., laser-cut vs hand-cut). Write a brief critique on speed, accuracy, finish, and environmental impact.

Outcome: Evaluates process trade-offs with justified conclusions.

RESEARCHING

If score is 1–2 (Needs Support):

Research one material (pine, acrylic, felt, aluminium). Record properties, typical uses, and one safety note.

Outcome: Knows basic material properties and safe handling.

If score is 3 (Developing):

Conduct a quick user survey/interview (5 questions). Summarise three user needs and one priority feature.

Outcome: Links real user data to design criteria.

If score is 4–5 (Secure/Advanced):

Compare two materials or processes for the same component. Conclude which suits the brief best and why (strength, cost, finish, sustainability).

Outcome: Makes evidence-based specifications and choices.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Run a 60-second “show and tell” of a sketch or model: one success and one improvement.

Outcome: Builds confidence sharing ideas and vocabulary.

If score is 3 (Developing):

Lead a 5-minute micro-demo (for example, accurate measuring, safe cutting line, simple stitch). Provide a mini checklist.

Outcome: Communicates steps clearly and supports peers.

If score is 4–5 (Secure/Advanced):

Facilitate a short design critique: set three prompts (user fit, function, sustainability), record two agreed next steps.

Outcome: Guides collaborative decisions and next-step planning.

CREATIVE/PRACTICAL TASKS

If score is 1–2 (Needs Support):

Produce three quick thumbnail sketches for a small product (bookmark, phone stand, key fob). Choose one and state why. Make a card prototype.

Outcome: Generates options, selects appropriately, and prototypes simply.

If score is 3 (Developing):

Make a refined paper/card model to scale. Check measurements, add tabs/joins, and test against success criteria.

Outcome: Improves accuracy and tests function against the brief.

If score is 4–5 (Secure/Advanced):

Create a final prototype with a simple test plan (drop test, load test, fit test).

Record results, adjust tolerances, and improve finish.

Outcome: Demonstrates iterative design: testing, analysing, and refining to meet criteria.

MUSIC

Why super curriculum matters in Music

Supercurriculum activities in Music allow pupils to explore sound, rhythm and creativity outside lessons. They develop listening and performance skills, broaden cultural awareness, and encourage confidence in both individual and group expression.

Reading

1. BBC Bitesize KS3 Music –
2. Classics for Kids: composer biographies –
3. DK Find Out: Music and instruments –
4. Carnegie Hall Kids: Explore instruments –
5. Kids Music Corner: Instruments explained –

Writing

1. Keep a listening diary: record what music you hear each week and your response.
2. Write a review of a piece of music you listen to on Classics for Kids –
3. Compose short lyrics to fit a well-known melody.
4. Create a fact file on your favourite instrument using Carnegie Hall Kids –
5. Write a comparison between two different styles of music (e.g. classical vs pop).

Listening

1. Classics for Kids radio shows –
2. BBC Ten Pieces audio clips –
3. Carnegie Hall Kids interactive listening –
4. Storynory: music and story episodes –
5. San Francisco Symphony Kids listening games –

Watching

1. BBC Bitesize KS3 Music video lessons –
2. BBC Ten Pieces films –
3. Philharmonia Orchestra instrument videos –
4. San Francisco Symphony Kids interactive videos –
5. YouTube channel “Music Theory for Musicians and Normal People” –

Researching

1. Research the history of a musical instrument at Philharmonia –
2. Explore a composer’s life and works on Classics for Kids –
3. Investigate music in different cultures on National Geographic Kids –
4. Research the science of sound (BBC Bitesize) –
5. Find out how film music is created and why it matters (BBC Teach) –

Student-led Tasks

1. Lead a short singing warm-up for your class.
2. Teach a friend how to clap a rhythm pattern.
3. Run a mini “Top 5” presentation of your favourite pieces of music.
4. Organise a class quiz about instruments of the orchestra.
5. Lead a group rehearsal of a simple song or piece.

Creative Tasks

1. Compose a short tune on an instrument or using free apps like Chrome Music Lab –
2. Create an artwork inspired by a piece of music.
3. Record and edit your own sound effects for a short video.
4. Rewrite the lyrics of a popular song for a new theme.
5. Design a poster advertising a concert for your favourite artist or composer.

YEAR 7 MUSIC

Why Supercurriculum Matters in Music

Supercurriculum activities in Music help pupils listen deeply, perform with confidence, and compose with imagination. By exploring styles, instruments, cultures and technologies beyond the classroom, pupils develop discipline, creativity, teamwork and resilience. They learn how musical elements (pitch, rhythm, tempo, texture, dynamics, structure, timbre, harmony) shape feeling and meaning. Most importantly, they discover that music is a language for expressing ideas and building community.

MUSIC FEEDBACK TEST

“Listening, performing, composing”

Instructions:

Rate each statement using: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree.

Answer the reflection at the end of each section.

A. Reading

1. I enjoy reading short texts about musicians, genres or instruments.

2. I can explain the main idea of an article about music.
3. I notice key terms (melody, harmony, texture, dynamics, structure).
4. I can summarise what makes a style or composer distinctive.
Reflection: Which musician, piece or style have you enjoyed reading about, and why?

B. Writing

1. I can describe music using correct vocabulary.
2. I can explain how musical elements create a mood or effect.
3. I can evaluate a performance fairly (strengths and next steps).
4. I can write a short plan for a composition or practice routine.
Reflection: What part of music writing is easiest or hardest (description, evaluation, planning)?

C. Listening

1. I can identify main instruments and the mood of a piece.
2. I can pick out patterns such as riffs, ostinatos or themes.
3. I can describe changes in dynamics, tempo and texture.
4. I can compare two versions or performances of the same piece.
Reflection: Name one piece you listened to recently and what you noticed about it.

D. Watching

1. I learn well from performance or tutorial videos.
2. I can describe what performers are doing to achieve their sound.
3. I can spot ensemble skills (cueing, balance, blending).
4. I can judge whether a tutorial explained the technique clearly.
Reflection: Which video helped your performing or composing most?

E. Researching

1. I can find reliable information about a composer, genre or instrument.
2. I can take brief notes and credit images or recordings.
3. I can link research to my own performance or composition ideas.
4. I can compare two sources and explain a difference in viewpoint.

Reflection: What musical topic would you like to research next?

F. Student-Led Tasks

1. I enjoy sharing musical ideas with others.
2. I can lead a short warm-up, rhythm game or rehearsal section.
3. I can give kind, specific feedback to help a group improve.
4. I can summarise what our group achieved and next steps.

Reflection: Describe a time you helped others improve a performance.

G. Creative Tasks

1. I enjoy experimenting with melody, rhythm, chords or loops.
2. I try different ideas before choosing a final version.
3. I can refine a piece using feedback or a success checklist.
4. I feel confident presenting or recording my work.

Reflection: Which piece or song idea are you most proud of, and why?

Final Reflection

Name one musical skill to improve this term (for example, steady tempo, reading rhythm, chord changes, phrasing, mixing). How will you practise it beyond lessons?

MUSIC INTERVENTION FRAMEWORK

(Use the average score per section to select the level: 1–2, 3, or 4–5.)

READING

If score is 1–2 (Needs Support):

Read one short profile each week (composer, band, instrument). Note three facts and one key term; write one sentence on what makes their sound unique.

Outcome: Understands main ideas and basic music vocabulary.

If score is 3 (Developing):

Read two short pieces on related styles (for example, blues and rock). Write a four-sentence comparison (instruments, rhythm feel, structure, typical harmony).

Outcome: Explains stylistic differences using correct terms.

If score is 4–5 (Secure/Advanced):

Read about a movement or scene (for example, Baroque, jazz, film music). Write a 120-word summary linking its features to two example tracks.

Outcome: Synthesises information and applies vocabulary precisely.

WRITING

If score is 1–2 (Needs Support):

Complete a performance/composition log after practice: **Piece/Task, Element focus** (e.g., tempo/dynamics), **One success, One next step**.

Outcome: Describes learning clearly with correct basic terms.

If score is 3 (Developing):

Write a performance review (8–10 sentences) covering melody, rhythm accuracy, balance and expression; include one bar or motif you improved and how.

Outcome: Evaluates using evidence and plans improvements.

If score is 4–5 (Secure/Advanced):

Write a 150-word programme note or producer's note explaining purpose, structure, and how elements create the intended effect.

Outcome: Communicates musical intent with clarity and insight.

LISTENING

If score is 1–2 (Needs Support):

Listen to one short track daily. Identify mood, two instruments, and one feature (riff, hook or beat).

Outcome: Recognises instruments and basic features reliably.

If score is 3 (Developing):

Complete a focused listening grid: **Form** (intro/verse/chorus), **Dynamics/Tempo changes**, **Texture** (solo/ensemble), **Notable motif**.

Outcome: Describes structure and element changes accurately.

If score is 4–5 (Secure/Advanced):

Compare two recordings of the same piece (for example, live vs studio). Write a brief comparison of tempo, articulation, balance and expression.

Outcome: Analyses interpretation and justifies preferences.

WATCHING

If score is 1–2 (Needs Support):

Watch a short tutorial for your instrument or voice. Write the three key steps and practise each for two minutes.

Outcome: Follows technique instructions and builds routine.

If score is 3 (Developing):

Watch a small-ensemble performance. Note two ensemble skills you observe (cueing entries, dynamic balance) and try them in practice.

Outcome: Applies ensemble awareness to rehearsals.

If score is 4–5 (Secure/Advanced):

Watch a masterclass/performance breakdown. Write a micro-review on phrasing, tone production and stage presence; apply one idea in a recorded take.

Outcome: Evaluates performance details and implements refinements.

RESEARCHING

If score is 1–2 (Needs Support):

Research an instrument family (strings, woodwind, brass, percussion, keys).

Record range, role and one famous example.

Outcome: Knows core facts and typical uses.

If score is 3 (Developing):

Investigate a genre or scene; list typical instruments, rhythms, forms, and one cultural context.

Outcome: Links features to place/time and performance practice.

If score is 4–5 (Secure/Advanced):

Compare two sources on a composer/producer. Note one agreement, one difference, and why one source is more reliable.

Outcome: Evaluates sources and justifies conclusions.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 60-second clapping pattern or warm-up; keep a steady pulse.

Outcome: Builds confidence and internal tempo.

If score is 3 (Developing):

Lead a 5-minute sectional rehearsal: set bar numbers, two targets (e.g., entries, dynamics), and a quick recap.

Outcome: Organises practice and improves ensemble focus.

If score is 4–5 (Secure/Advanced):

Plan a mini workshop (rhythm game, harmony stack, loop building). Collect one piece of feedback and summarise next steps.

Outcome: Facilitates learning and reflects on impact.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Compose an 8-bar melody using a limited note set or a simple chord loop. Keep a

steady beat; add dynamic markings.

Outcome: Creates a complete idea with clear pulse and contour.

If score is 3 (Developing):

Extend to 16 bars with structure (A–B or verse–chorus). Add a contrasting section (change of dynamics/texture) and notate or sequence it.

Outcome: Organises musical form and develops material.

If score is 4–5 (Secure/Advanced):

Produce a short track or arrangement: clear intro, build, climax and ending. Use at least three parts (melody, harmony, rhythm) and create a mix that balances them.

Outcome: Demonstrates independent composition/production with stylistic control.

If you'd like, I can package this into a **print-ready Word pack** (feedback test + scoring sheet + intervention chooser + reflection spaces) to match your school branding.

Είπε:

PHYSICAL EDUCATION

To ChatGPT είπε:

Excellent — here is the **Year 7 Physical Education (PE) Supercurriculum package** in the same clean, continuous style as your other subjects.

It includes:

1. **Why Supercurriculum Matters in PE**
2. **Student Feedback Test** (self-assessment + reflections)
3. **Score-Aligned Interventions** (1–2 = Needs Support, 3 = Developing, 4–5 = Secure/Advanced)

YEAR 7 PHYSICAL EDUCATION (PE)

Why Supercurriculum Matters in PE

Supercurriculum activities in PE help pupils build healthy lifelong habits, confidence in movement, and positive attitudes to challenge and teamwork. Beyond lessons, pupils explore fitness, skills, tactics and wellbeing through reading, training logs, videos, and community sport. They learn how the body works, how to set goals, and how to reflect on progress — skills that strengthen resilience, focus, leadership and overall health.

PE FEEDBACK TEST

“Move well, think smart, feel strong”

Instructions:

Rate each statement using: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree.

Answer the reflection at the end of each section.

A. Reading

1. I enjoy reading short pieces about sport, fitness, or health.
2. I can explain basic training ideas (warm-up, cooldown, overload, rest).
3. I learn new words about the body or performance and use them correctly.
4. I can describe how a training tip would help my own sport.

Reflection: What article or guide have you read recently, and what did you learn?

B. Writing

1. I can keep a simple activity or training log.
2. I set a clear goal and track progress each week.
3. I can describe what went well and what I will change next time.

4. I can write a short plan for a practice session.

Reflection: What part of writing about PE is easiest or hardest (logs, goals, planning)?

C. Listening

1. I follow spoken instructions and safety points during activity.
2. I can repeat key coaching cues for a skill.
3. I remember the main points of a team talk or briefing.
4. I can explain why a change was suggested and try it out.

Reflection: Describe one tip you listened to that improved your performance.

D. Watching

1. I learn from demonstrations or technique videos.
2. I can spot the key positions or phases of a skill.
3. I notice how tactics or movement patterns create space.
4. I can judge whether a demonstration was clear and correct.

Reflection: Which demonstration or video helped you most, and why?

E. Researching

1. I can find reliable information about fitness, skills, or nutrition.
2. I can take brief notes and link them to my practice.
3. I can compare two ideas or drills and choose the better one for me.
4. I can explain how rest, hydration, and sleep affect performance.

Reflection: What PE topic would you like to research next?

F. Student-Led Tasks

1. I enjoy helping others learn a skill.

2. I can lead a short warm-up or drill safely.
3. I give kind, specific feedback to teammates.
4. I can summarise what our group achieved and next steps.

Reflection: Describe a time you led or supported your group effectively.

G. Creative/Practical Tasks

1. I try different ways to solve movement problems (feints, passing options, routes).
2. I adapt drills or rules to make practice more challenging or fair.
3. I create simple routines or plays and teach them to others.
4. I feel confident presenting a small routine, play, or fitness circuit.

Reflection: Which practical task or routine are you most proud of, and why?

Final Reflection

Name one PE skill or habit to improve this term (for example, stamina, flexibility, throwing technique, tactical awareness, sleep routine). How will you practise it beyond lessons?

PE INTERVENTION FRAMEWORK

(Use the average score per section to select the level: 1–2, 3, or 4–5.)

READING

If score is 1–2 (Needs Support):

Read one short health or skill tip each week. Write three sentences: key idea, how to try it, one new word (with your example).

Outcome: Understands main ideas and begins to use basic PE vocabulary.

If score is 3 (Developing):

Read two short pieces on the same topic (for example, warm-ups or recovery).

Note one agreement, one difference, and how you'll apply a tip.

Outcome: Compares advice and links it to personal practice.

If score is 4–5 (Secure/Advanced):

Read about a training principle (FITT/SMART/overload). Write a 120-word summary applying it to your sport for four weeks.

Outcome: Applies training concepts accurately and plans with purpose.

WRITING

If score is 1–2 (Needs Support):

Keep a simple weekly log: **Activity, Time, How it felt (easy/OK/hard), One change for next time.**

Outcome: Records activity consistently and sets small next steps.

If score is 3 (Developing):

Write a session plan for a skill (for example, passing, serve, sprint start): **Warm-up, Main drill (reps/sets/time), Cool-down, Goal.**

Outcome: Plans practice logically and measures progress.

If score is 4–5 (Secure/Advanced):

Write a short cycle plan (2–3 weeks): targets, sessions, and one fitness test (for example, plank time, shuttle run laps).

Outcome: Designs progressive practice and reviews results with evidence.

LISTENING

If score is 1–2 (Needs Support):

After instructions, repeat the three key cues aloud (for example, “knees bent, eyes up, soft hands”) and use them in one minute of practice.

Outcome: Retains essential cues and uses them immediately.

If score is 3 (Developing):

Before a drill, note the aim and two safety points. After, say which cue helped most and why.

Outcome: Connects listening with technique changes and safety.

If score is 4–5 (Secure/Advanced):

During a game or routine, identify one tactical instruction and describe how it changed your decision-making.

Outcome: Applies verbal strategy to performance and reflects precisely.

WATCHING

If score is 1–2 (Needs Support):

Watch a short demonstration. Pause and label three phases of the skill (setup–action–follow-through). Copy each slowly five times.

Outcome: Understands key phases and builds correct movement pattern.

If score is 3 (Developing):

Watch a clip of your sport. Note one technical detail (for example, foot placement) and one tactical idea (for example, creating width). Practise both in a short drill.

Outcome: Transfers observation into targeted practice.

If score is 4–5 (Secure/Advanced):

Record a 20–30 second practice and compare to a model clip using a quick checklist (posture, timing, accuracy, control). Set one micro-goal for the next session.

Outcome: Self-analyses performance and sets effective goals.

RESEARCHING

If score is 1–2 (Needs Support):

Find three facts about hydration, sleep, or nutrition for active teens. Write how you'll apply one habit this week.

Outcome: Connects basic wellbeing knowledge to daily routine.

If score is 3 (Developing):

Research one component of fitness (endurance, strength, flexibility, agility). List two tests and one drill to improve it.

Outcome: Chooses suitable tests and matching practice.

If score is 4–5 (Secure/Advanced):

Compare two drills for the same goal (for example, agility ladder vs cone shuttle). Explain which you will use and why (space, time, effectiveness).

Outcome: Selects methods critically and justifies choices.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 60-second pulse-raising warm-up safely (march, jog, arm swings).

Outcome: Builds confidence and clear voice when leading.

If score is 3 (Developing):

Lead a 5-minute skill station with a simple success rule (for example, five accurate passes in a row). Give one positive cue to each participant.

Outcome: Organises practice and gives helpful feedback.

If score is 4–5 (Secure/Advanced):

Run a mini-circuit (three stations). Explain timing, rotations, and safety. Collect one piece of feedback and adjust the circuit.

Outcome: Plans, leads, and adapts activities effectively.

CREATIVE/PRACTICAL TASKS

If score is 1–2 (Needs Support):

Design a three-move combination or short routine (for example, pass–move–shoot; or balance–roll–balance). Practise slowly, then smoothly.

Outcome: Sequences actions with control and confidence.

If score is 3 (Developing):

Create a small-sided game or challenge with a twist (limited touches, smaller goal, scoring zones). Write the rule and the skill it develops.

Outcome: Adapts rules to focus on specific skills and enjoyment.

If score is 4–5 (Secure/Advanced):

Design a home fitness circuit (six stations) using household items. Set timings (for example, 30s work/20s rest), include warm-up and cooldown, and record results

across two weeks.

Outcome: Plans progressive training independently and tracks improvement.

PHYSICAL EDUCATION

Why super curriculum matters in Physical Education

Supercurriculum activities in PE help pupils build fitness, teamwork and resilience beyond timetabled sport. They encourage healthy lifestyles, leadership, and enjoyment of physical activity that supports wellbeing throughout life.

Physical Education (PE) Supercurriculum

Reading

1. BBC Bitesize KS3 Physical Education –
2. KidsHealth: Why exercise matters –
3. Youth Sport Trust resources –
4. Change4Life healthy living advice –
5. DK Find Out: Sports and the body –

Writing

1. Keep a personal fitness log with goals and reflections.
2. Write a set of rules for a new playground or team game.
3. Create a weekly healthy lifestyle plan (exercise, food, sleep).
4. Write a short biography of a sporting role model.
5. Summarise the benefits of physical activity after reading KidsHealth –

Listening

1. GoNoodle movement songs –
2. BBC School Radio “Time to Move” –
3. Just Dance Kids music playlists (YouTube) –
4. Yoga Kids Stories short guided sessions –
5. Childline Calm Zone audio relaxation –

Watching

1. BBC Bitesize KS3 PE videos –
2. Cosmic Kids Yoga (YouTube) –
3. PE with Joe (Body Coach TV) –
4. Just Dance Kids videos –
5. GoNoodle guided activity videos –

Researching

1. Research the effects of exercise on the body (BBC Bitesize) –
2. Investigate the Olympic Games history and values –
3. Explore nutrition for young athletes (NHS Change4Life) –
4. Research a sport not covered in class and present its key rules.
5. Study the role of sports psychology in performance (BBC articles) –

Student-led Tasks

1. Lead a warm-up activity for classmates.
2. Organise a class challenge (plank hold, skipping, push-ups).
3. Run a short skills workshop (passing in football, basic stretches).
4. Present a talk on a famous sporting event.

5. Create and lead a mindfulness or relaxation activity after PE.

Creative Tasks

1. Design a poster promoting healthy habits in school.
2. Choreograph a short group dance or movement routine.
3. Create an obstacle course at home or in the playground.
4. Produce a video tutorial teaching a sport skill.
5. Invent a new sport: rules, equipment, and scoring system.

YEAR 7 PHYSICAL EDUCATION (PE)

Why Supercurriculum Matters in PE

Supercurriculum activities in PE help pupils build healthy lifelong habits, confidence in movement, and positive attitudes to challenge and teamwork. Beyond lessons, pupils explore fitness, skills, tactics and wellbeing through reading, training logs, videos, and community sport. They learn how the body

works, how to set goals, and how to reflect on progress — skills that strengthen resilience, focus, leadership and overall health.

PE FEEDBACK TEST

“Move well, think smart, feel strong”

Instructions:

Rate each statement using: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree.

Answer the reflection at the end of each section.

A. Reading

5. I enjoy reading short pieces about sport, fitness, or health.
6. I can explain basic training ideas (warm-up, cooldown, overload, rest).
7. I learn new words about the body or performance and use them correctly.
8. I can describe how a training tip would help my own sport.

Reflection: What article or guide have you read recently, and what did you learn?

B. Writing

5. I can keep a simple activity or training log.
6. I set a clear goal and track progress each week.
7. I can describe what went well and what I will change next time.
8. I can write a short plan for a practice session.

Reflection: What part of writing about PE is easiest or hardest (logs, goals, planning)?

C. Listening

5. I follow spoken instructions and safety points during activity.

6. I can repeat key coaching cues for a skill.
7. I remember the main points of a team talk or briefing.
8. I can explain why a change was suggested and try it out.

Reflection: Describe one tip you listened to that improved your performance.

D. Watching

5. I learn from demonstrations or technique videos.
6. I can spot the key positions or phases of a skill.
7. I notice how tactics or movement patterns create space.
8. I can judge whether a demonstration was clear and correct.

Reflection: Which demonstration or video helped you most, and why?

E. Researching

5. I can find reliable information about fitness, skills, or nutrition.
6. I can take brief notes and link them to my practice.
7. I can compare two ideas or drills and choose the better one for me.
8. I can explain how rest, hydration, and sleep affect performance.

Reflection: What PE topic would you like to research next?

F. Student-Led Tasks

5. I enjoy helping others learn a skill.
6. I can lead a short warm-up or drill safely.
7. I give kind, specific feedback to teammates.
8. I can summarise what our group achieved and next steps.

Reflection: Describe a time you led or supported your group effectively.

G. Creative/Practical Tasks

5. I try different ways to solve movement problems (feints, passing options, routes).
6. I adapt drills or rules to make practice more challenging or fair.
7. I create simple routines or plays and teach them to others.
8. I feel confident presenting a small routine, play, or fitness circuit.

Reflection: Which practical task or routine are you most proud of, and why?

Final Reflection

Name one PE skill or habit to improve this term (for example, stamina, flexibility, throwing technique, tactical awareness, sleep routine). How will you practise it beyond lessons?

PE INTERVENTION FRAMEWORK

(Use the average score per section to select the level: 1–2, 3, or 4–5.)

READING

If score is 1–2 (Needs Support):

Read one short health or skill tip each week. Write three sentences: key idea, how to try it, one new word (with your example).

Outcome: Understands main ideas and begins to use basic PE vocabulary.

If score is 3 (Developing):

Read two short pieces on the same topic (for example, warm-ups or recovery).

Note one agreement, one difference, and how you'll apply a tip.

Outcome: Compares advice and links it to personal practice.

If score is 4–5 (Secure/Advanced):

Read about a training principle (FITT/SMART/overload). Write a 120-word summary applying it to your sport for four weeks.

Outcome: Applies training concepts accurately and plans with purpose.

WRITING

If score is 1–2 (Needs Support):

Keep a simple weekly log: **Activity, Time, How it felt (easy/OK/hard), One change for next time.**

Outcome: Records activity consistently and sets small next steps.

If score is 3 (Developing):

Write a session plan for a skill (for example, passing, serve, sprint start): **Warm-up, Main drill (reps/sets/time), Cool-down, Goal.**

Outcome: Plans practice logically and measures progress.

If score is 4–5 (Secure/Advanced):

Write a short cycle plan (2–3 weeks): targets, sessions, and one fitness test (for example, plank time, shuttle run laps).

Outcome: Designs progressive practice and reviews results with evidence.

LISTENING

If score is 1–2 (Needs Support):

After instructions, repeat the three key cues aloud (for example, “knees bent, eyes up, soft hands”) and use them in one minute of practice.

Outcome: Retains essential cues and uses them immediately.

If score is 3 (Developing):

Before a drill, note the aim and two safety points. After, say which cue helped most and why.

Outcome: Connects listening with technique changes and safety.

If score is 4–5 (Secure/Advanced):

During a game or routine, identify one tactical instruction and describe how it changed your decision-making.

Outcome: Applies verbal strategy to performance and reflects precisely.

WATCHING

If score is 1–2 (Needs Support):

Watch a short demonstration. Pause and label three phases of the skill (setup–action–follow-through). Copy each slowly five times.

Outcome: Understands key phases and builds correct movement pattern.

If score is 3 (Developing):

Watch a clip of your sport. Note one technical detail (for example, foot placement) and one tactical idea (for example, creating width). Practise both in a short drill.

Outcome: Transfers observation into targeted practice.

If score is 4–5 (Secure/Advanced):

Record a 20–30 second practice and compare to a model clip using a quick checklist (posture, timing, accuracy, control). Set one micro-goal for the next session.

Outcome: Self-analyses performance and sets effective goals.

RESEARCHING

If score is 1–2 (Needs Support):

Find three facts about hydration, sleep, or nutrition for active teens. Write how you'll apply one habit this week.

Outcome: Connects basic wellbeing knowledge to daily routine.

If score is 3 (Developing):

Research one component of fitness (endurance, strength, flexibility, agility). List two tests and one drill to improve it.

Outcome: Chooses suitable tests and matching practice.

If score is 4–5 (Secure/Advanced):

Compare two drills for the same goal (for example, agility ladder vs cone shuttle). Explain which you will use and why (space, time, effectiveness).

Outcome: Selects methods critically and justifies choices.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 60-second pulse-raising warm-up safely (march, jog, arm swings).

Outcome: Builds confidence and clear voice when leading.

If score is 3 (Developing):

Lead a 5-minute skill station with a simple success rule (for example, five accurate passes in a row). Give one positive cue to each participant.

Outcome: Organises practice and gives helpful feedback.

If score is 4–5 (Secure/Advanced):

Run a mini-circuit (three stations). Explain timing, rotations, and safety. Collect one piece of feedback and adjust the circuit.

Outcome: Plans, leads, and adapts activities effectively.

CREATIVE/PRACTICAL TASKS

If score is 1–2 (Needs Support):

Design a three-move combination or short routine (for example, pass–move–shoot; or balance–roll–balance). Practise slowly, then smoothly.

Outcome: Sequences actions with control and confidence.

If score is 3 (Developing):

Create a small-sided game or challenge with a twist (limited touches, smaller goal, scoring zones). Write the rule and the skill it develops.

Outcome: Adapts rules to focus on specific skills and enjoyment.

If score is 4–5 (Secure/Advanced):

Design a home fitness circuit (six stations) using household items. Set timings (for example, 30s work/20s rest), include warm-up and cooldown, and record results across two weeks.

Outcome: Plans progressive training independently and tracks improvement.

If you'd like, I can compile this into a **print-ready Word pack** (feedback test + scoring sheet + intervention chooser + reflection spaces) that matches your school style.

Είπες:

RELIGIOUS EDUCATION

To ChatGPT είπες:

Excellent — here is the **Year 7 Religious Education (RE) Supercurriculum package** in the same clean, continuous style as your other subjects.

It includes:

1. **Why Supercurriculum Matters in RE**
2. **Student Feedback Test** (self-assessment + reflections)
3. **Score-Aligned Interventions** (1–2 = Needs Support, 3 = Developing, 4–5 = Secure/Advanced)

RELIGIOUS EDUCATION

Why super curriculum matters in Religious Education

Supercurriculum activities in RE help pupils understand different beliefs and values, encouraging respect, empathy and critical thinking. They provide opportunities to explore big questions about life, morality and identity, while learning how faith shapes communities around the world.

Religious Education (RE) Supercurriculum

Reading

1. BBC Bitesize KS3 Religious Studies –
2. RE:Quest – Christianity explained –
3. DK Find Out: Religions of the world –
4. Kids Britannica: Islam –
5. Jewish Virtual Library (Judaism for children) –

Writing

1. Write a diary entry imagining a day in the life of a child from another religion.
2. Create a fact sheet about a place of worship after reading BBC Bitesize –
3. Compare two festivals (e.g. Diwali and Easter) in a short essay.
4. Write your own version of a “Golden Rule” after exploring different religions –
5. Summarise the meaning of a religious symbol after exploring this page –

Listening

1. BBC School Radio assemblies –
2. Hymns and worship songs for schools –
3. Storynory: Bible and myth stories –
4. RE Podcast for Kids –
5. Peace Out mindfulness stories (themes of kindness and reflection) –

Watching

1. BBC Teach KS3 RE clips –
2. BBC Bitesize: What is Diwali? –
3. The Story of Rama and Sita (BBC) –
4. BBC Teach: My Life, My Religion (Islam) –
5. Religion for Kids (Judaism overview, YouTube) –

Researching

1. Research how different religions celebrate key festivals (BBC Bitesize) –
2. Investigate how faith groups respond to global issues (Christian Aid) –
3. Explore sacred texts online (Bible Gateway) –
4. Research the Five Pillars of Islam (BBC Bitesize) –

5. Compare architecture of different places of worship (National Geographic Kids) –

Student-led Tasks

1. Lead a discussion on the values that different religions share.
2. Give a short presentation on a religious festival and how it is celebrated.
3. Create a classroom quiz about world religions.
4. Role-play a panel of historical or religious figures answering big questions.
5. Lead a reflection session on kindness or fairness.

Creative Tasks

1. Design a poster explaining a festival or tradition.
2. Create a storyboard of a religious story or parable.
3. Produce a piece of artwork inspired by a religious symbol.
4. Write and perform a poem about peace or compassion.
5. Make a model of a place of worship using simple materials.

YEAR 7 RELIGIOUS EDUCATION (RE)

Why Supercurriculum Matters in RE

Supercurriculum activities in RE help pupils explore life's big questions — belief, meaning, ethics, identity, and community. By reading sacred stories and modern reflections, comparing worldviews, discussing moral dilemmas, and creating thoughtful responses, pupils build empathy, critical thinking, and respectful dialogue. They learn to distinguish fact, interpretation, and opinion; to understand how beliefs shape choices; and to communicate their own views with care and clarity.

RE FEEDBACK TEST

“Understanding beliefs, values, and big questions”

Instructions:

Rate each statement using: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree.

Answer the reflection at the end of each section.

A. Reading

1. I enjoy reading short texts about beliefs, practices, and ethics.
2. I can explain the main idea of a sacred story or article.
3. I recognise key terms (e.g., ritual, scripture, compassion, conscience).
4. I can identify similarities and differences between two beliefs.

Reflection: Which RE text or story did you enjoy most, and why?

B. Writing

1. I can write clear explanations of beliefs or practices.
2. I can give reasons for different viewpoints using examples.
3. I can organise my ideas into paragraphs with a short conclusion.
4. I can write respectfully about people who believe differently from me.

Reflection: What kind of RE writing do you find easiest or hardest (explanation, comparison, evaluation)?

C. Listening

1. I focus during discussions or recordings about beliefs and values.
2. I can recall three key points after listening.
3. I can tell the difference between description and opinion.
4. I can explain why the topic matters for people today.

Reflection: Which RE talk, story, or podcast helped you understand something new?

D. Watching

1. I learn well from short videos about festivals, places of worship, or ethics.
2. I can describe what the video showed and why it is significant.
3. I can connect what I saw to our class topics.
4. I can suggest one question I would ask the speaker or community.

Reflection: Which video helped you most, and what did you learn?

E. Researching

1. I can find reliable information about a tradition or ethical issue.
2. I can take brief notes and record where I found them.
3. I can compare two sources and spot a difference in emphasis.
4. I can link research to real-life examples or current events.

Reflection: What RE topic or question would you like to research next?

F. Student-Led Tasks

1. I enjoy sharing ideas and questions with others.
2. I can lead a short discussion or mini-presentation.
3. I ask thoughtful questions and listen respectfully.

4. I can summarise what my group learned.

Reflection: Describe a time you helped others understand a belief or ethical idea.

G. Creative Tasks

1. I enjoy expressing ideas through posters, timelines, role-play, or short videos.
2. I can represent a belief or value accurately in a creative way.
3. I can correct a common misunderstanding in my work.
4. I feel confident presenting my creative RE project.

Reflection: Which creative RE task made you think most deeply, and why?

Final Reflection

Name one RE skill you want to improve this term (e.g., comparing beliefs, explaining ethics, using key terms). How will you practise it beyond lessons?

RE INTERVENTION FRAMEWORK

(Use the average score per section to select the level: 1–2, 3, or 4–5.)

READING

If score is 1–2 (Needs Support):

Read one short text each week (sacred story summary or belief overview). Write three sentences: main idea, one new term (with your sentence), and one question you still have.

Outcome: Understands key ideas and begins to use basic RE vocabulary accurately.

If score is 3 (Developing):

Read two short pieces on the same theme (e.g., charity in two traditions). List one similarity, one difference, and one example for each.

Outcome: Makes simple comparisons with relevant examples.

If score is 4–5 (Secure/Advanced):

Read a viewpoint piece on a current ethical issue and a tradition-based response.

Write a 120-word comparison of arguments and principles.

Outcome: Synthesises perspectives and evaluates reasoning respectfully.

WRITING

If score is 1–2 (Needs Support):

Write a one-paragraph explanation of a practice (who, what, where, why). End with one sentence on its meaning for followers.

Outcome: Explains beliefs/practices clearly in complete sentences.

If score is 3 (Developing):

Write a comparison paragraph using **Both/However/Therefore** to compare two beliefs or practices. Include one accurate term for each.

Outcome: Organises comparison logically and uses key terms.

If score is 4–5 (Secure/Advanced):

Write a 150-word evaluation on an ethical question (e.g., fairness, stewardship).

Present two viewpoints with reasons, then your conclusion with justification.

Outcome: Balances arguments and reaches a reasoned conclusion.

LISTENING

If score is 1–2 (Needs Support):

After a talk or story, note three facts and one new word, then retell the main idea in two sentences.

Outcome: Recalls essentials and recognises key vocabulary.

If score is 3 (Developing):

Listen to a short discussion on a festival or ethical issue. Create a T-chart of viewpoints and one reason for each.

Outcome: Distinguishes perspectives and reasons accurately.

If score is 4–5 (Secure/Advanced):

Listen to a conversation about a contested issue. Write a brief reflection: what

values are in tension and what further question would deepen understanding.
Outcome: Identifies values and formulates meaningful enquiry.

WATCHING

If score is 1–2 (Needs Support):

Watch a short video on a place of worship or ritual. Write “What it is”, “What happens”, and “Why it matters”.

Outcome: Summarises practices with purpose and significance.

If score is 3 (Developing):

Watch a festival or interview clip. Note one symbol, one action, and one value it expresses.

Outcome: Connects symbols and actions to underlying beliefs.

If score is 4–5 (Secure/Advanced):

Watch a short explainer on an ethical theme. Write a 100-word critique on clarity, balance of views, and one improvement (e.g., add a personal testimony or data).

Outcome: Evaluates presentation quality and fairness.

RESEARCHING

If score is 1–2 (Needs Support):

Choose one tradition. Record three facts (place of origin, key figure, important practice) and name your source.

Outcome: Finds reliable basics and cites sources.

If score is 3 (Developing):

Research how a value (e.g., compassion, stewardship) appears in two traditions. Write a short paragraph with one example for each.

Outcome: Links shared values to distinct expressions.

If score is 4–5 (Secure/Advanced):

Compare two sources on a controversial topic (e.g., bioethics). Note one agreement, one difference, and which source is more persuasive with a reason.

Outcome: Evaluates sources and justifies conclusions.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Prepare a 60-second talk explaining a key term (e.g., pilgrimage, karma, covenant) with an example.

Outcome: Builds confidence using RE vocabulary aloud.

If score is 3 (Developing):

Lead a mini discussion using two prompt questions on a theme (e.g., forgiveness). Summarise one thing the group agreed on.

Outcome: Organises respectful dialogue and summarises outcomes.

If score is 4–5 (Secure/Advanced):

Plan a short debate on an ethical question. Provide two points for and two against, then write a two-sentence conclusion reflecting the discussion.

Outcome: Facilitates balanced debate and clear conclusions.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Create a simple poster explaining a festival with two symbols and their meanings.

Outcome: Represents beliefs accurately with basic visual explanation.

If score is 3 (Developing):

Write a short monologue from the viewpoint of a historical or contemporary believer, showing how a belief guides a decision.

Outcome: Demonstrates empathy and links belief to action.

If score is 4–5 (Secure/Advanced):

Design an infographic or short video clarifying a common misconception (e.g., stereotype about a tradition) and present the accurate understanding with sources.

Outcome: Communicates clearly, corrects errors, and cites evidence.

ESL

Supercurriculum activities in ESL help pupils strengthen their English in real contexts. They build fluency, vocabulary and confidence across reading, writing, speaking and listening, supporting both academic success and social integration.

ESL Supercurriculum

Reading

1. British Council LearnEnglish Teens –
2. Oxford Owl free eBook library –
3. News for Kids (simple English news) –
4. Storyberries bilingual stories – (also has English versions)
5. ESL Fast: reading practice –

Writing

1. Use Pobble365 daily image prompts –
2. Keep a weekly diary in English about school or hobbies.
3. Write a letter introducing yourself using sentence starters.
4. Practise short writing tasks from British Council Teens –
<https://learnenglishteens.britishcouncil.org/skills/writing>
5. Create your own illustrated word bank of 20 new words each week.

Listening

1. British Council Teens listening practice –
2. Storynory audiobooks and fairy tales –
3. BBC Learning English “The English We Speak” –
4. Super Simple Songs (YouTube) –
5. Listen to News in Levels –

Watching

1. British Council LearnEnglish Teens Video Zone –
2. BBC Bitesize ESL support –
3. English Singsing YouTube channel –
4. Peppa Pig Official Channel (English) –
5. English Addict Kids YouTube channel –

Researching

1. Look up new words in Cambridge Dictionary online –
2. Research English idioms and their meanings –
3. Investigate English-speaking countries and their cultures –
4. Explore tips for learning vocabulary effectively –
5. Compare synonyms and antonyms using Thesaurus.com –

Student-led Tasks

1. Run a mini spelling bee with classmates.
2. Lead a short vocabulary quiz using words you learned this week.
3. Teach a new English phrase to a peer and practise it in a sentence.
4. Share a short presentation in English about your favourite hobby.

5. Pair up with a classmate and act out a dialogue in English.

Creative Tasks

1. Write and perform a short comic sketch in English.
2. Create a poster of your “Top 10” favourite English words.
3. Design a comic strip in English with speech bubbles.
4. Record a short vlog in English about your school day.
5. Make an illustrated storybook using simple English sentences.

YEAR 7 ESL

Why Supercurriculum Matters in ESL

Supercurriculum activities in ESL help learners grow confident using English in real situations. By reading short, engaging texts, listening to stories and talks, practising everyday writing, and speaking in small tasks, pupils build vocabulary, grammar control, and pronunciation. They learn to understand different accents, choose the right words for audience and purpose, and express ideas clearly in

school subjects and daily life. Most importantly, they discover that English is a tool for curiosity, friendship, and independence.

ESL FEEDBACK TEST

“Understand more, say more, write more — with confidence”

Instructions:

Rate each statement using: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree.

Answer the reflection at the end of each section.

A. Reading

1. I enjoy reading short texts in English (stories, articles, messages).
2. I can find the main idea and important details.
3. I learn new words and can guess meanings from context.
4. I can explain a text in my own words.

Reflection: What did you read recently in English and what new word or idea did you learn?

B. Writing

1. I can write short, clear sentences with basic punctuation.
2. I can organise a paragraph with a beginning, middle and ending.
3. I can use everyday grammar correctly (present/past, articles, prepositions).
4. I can edit my work to correct common mistakes.

Reflection: Which part of writing in English is easiest or hardest for you?

C. Listening

1. I can understand short audio or videos about familiar topics.
2. I can catch key words, numbers, and names.

3. I can follow simple instructions and classroom language.
4. I can summarise the main points after listening.

Reflection: Which audio or video helped you most, and why?

D. Watching

1. I learn well from short video lessons, interviews, or cartoons.
2. I can connect what I see to words and phrases I already know.
3. I notice tone, emotion, and body language.
4. I can tell if a video explained something clearly.

Reflection: Name one video that improved your English and what you noticed.

E. Researching

1. I can look up words safely in a learner's dictionary and record them.
2. I can find simple, reliable information for a school topic in English.
3. I can take short notes (bullet points) and keep sources.
4. I can compare two explanations and choose the clearer one.

Reflection: What topic would you like to research next in English?

F. Student-Led Tasks

1. I enjoy practising English with classmates or family.
2. I can lead a short activity (warm-up, vocabulary game, mini-presentation).
3. I can ask and answer follow-up questions.
4. I can summarise my group's ideas at the end.

Reflection: Describe a time you helped a partner understand or practise English.

G. Creative Tasks

1. I like using English in creative ways (dialogues, posters, slides, short videos).
 2. I can perform a short role-play or speak over a picture/storyboard.
 3. I can combine images and words to explain meaning.
 4. I feel confident sharing creative work in English.
- Reflection:** Which creative task in English made you most proud, and why?

Final Reflection

What is one English skill you want to improve this term (reading speed, speaking fluency, grammar accuracy, pronunciation, vocabulary)? How will you practise it beyond lessons?

ESL INTERVENTION FRAMEWORK

(Use the average score per section to select the level: 1–2, 3, or 4–5.)

READING

If score is 1–2 (Needs Support):

Read one short graded text each week. Underline three new words; write a mini glossary (word, simple definition, your sentence). Answer three who/what/where questions.

Outcome: Understands main ideas and begins to use new vocabulary accurately.

If score is 3 (Developing):

Read two short texts on the same topic (e.g., school life, animals). Write four sentences: main idea of text A, main idea of text B, one similarity, one difference.

Outcome: Compares texts and explains ideas with simple linking words.

If score is 4–5 (Secure/Advanced):

Read a longer article or story chapter. Write a 120-word summary including topic sentence, two key details, and one inference (“This suggests ...”).

Outcome: Summarises clearly and shows deeper understanding.

WRITING

If score is 1–2 (Needs Support):

Write a daily 5-sentence journal (yesterday/today/tomorrow). Check capitals, full stops, and verb tense.

Outcome: Produces clear, correct basic sentences and builds routine.

If score is 3 (Developing):

Write an 8–10 sentence paragraph on a familiar topic (family, hobbies, school). Use a topic sentence, three details with examples, and a closing sentence. Underline five connectives (and, but, because, so, however).

Outcome: Organises ideas with simple cohesion and correct common grammar.

If score is 4–5 (Secure/Advanced):

Write a 150-word email or article: plan (purpose, audience, tone), draft, edit. Check varied sentences (because/although/which), precise vocabulary, and paragraphing.

Outcome: Adapts writing to purpose with range and accuracy.

LISTENING

If score is 1–2 (Needs Support):

Listen to one 3–5 minute clip daily. Note three key words and one number/name. Replay once and write two sentences about the main idea.

Outcome: Catches key information and improves short-text understanding.

If score is 3 (Developing):

Listen to a short talk or story. Complete a “First–Next–Then–Finally” outline and write two new phrases you heard.

Outcome: Follows sequences and extends phrase bank.

If score is 4–5 (Secure/Advanced):

Listen to an interview or explainer. Write a 6-line note grid: topic, three points, example, your opinion.

Outcome: Extracts detail and responds thoughtfully.

WATCHING

If score is 1–2 (Needs Support):

Watch a short video with subtitles. Pause and shadow (repeat) one sentence per scene. Copy one useful phrase to a phrase bank.

Outcome: Builds pronunciation, rhythm, and common expressions.

If score is 3 (Developing):

Watch a mini-lesson or vlog. Write a two-column note: vocabulary/phrases on the left, meaning/example on the right.

Outcome: Expands usable vocabulary with examples.

If score is 4–5 (Secure/Advanced):

Watch a short documentary or news for young learners. Produce a 100-word review: main message, two facts, one opinion, one question.

Outcome: Connects viewing to analysis and discussion.

RESEARCHING

If score is 1–2 (Needs Support):

Use a learner's dictionary to check 5 words a week. Record word, part of speech, simple definition, and your sentence.

Outcome: Builds independent vocabulary habits.

If score is 3 (Developing):

Research a simple topic for another subject (science or geography). Collect five bullet-point facts from one safe site; make a labelled picture or diagram.

Outcome: Transfers English reading to subject learning.

If score is 4–5 (Secure/Advanced):

Compare two short sources on the same topic. Write which is clearer and why (layout, examples, language).

Outcome: Evaluates clarity and chooses suitable sources.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 60-second “Show & Tell” (object or photo). Say what it is, where it’s from, and why you chose it.

Outcome: Builds speaking confidence with simple structures.

If score is 3 (Developing):

Host a 3-minute mini-chat: prepare five questions on a topic (music/food/sport). Ask follow-ups (“Why?”, “Which?”, “How often?”).

Outcome: Keeps a short conversation going and listens actively.

If score is 4–5 (Secure/Advanced):

Give a 2–3 minute presentation with a slide or prop. Include an opening, two main points with examples, and a short conclusion. Take one audience question.

Outcome: Presents clearly and responds spontaneously.

CREATIVE TASKS**If score is 1–2 (Needs Support):**

Create a labelled poster or photo story (4–6 pictures) with simple captions in the present tense.

Outcome: Combines images and language to communicate clearly.

If score is 3 (Developing):

Write and perform a short dialogue (greetings, asking for help, buying something). Record and listen back to check pronunciation of tricky sounds.

Outcome: Practises real-life language and improves pronunciation.

If score is 4–5 (Secure/Advanced):

Produce a 60–90 second video or blog post explaining “How to ...” (study tip, recipe, game). Use signposting phrases (first, next, finally; in my opinion).

Outcome: Speaks or writes fluently with structure and audience awareness.

Optional weekly routine (quick guide)

- **Mon:** Short reading + glossary

- **Tue:** Listening clip + two-sentence summary
- **Wed:** Paragraph writing or email draft
- **Thu:** Speaking task (dialogue or mini-presentation)
- **Fri:** Creative/research task + reflection

SPANISH

Why super curriculum matters in Spanish

Supercurriculum activities in Spanish help pupils practise language beyond the classroom, developing confidence in speaking, listening, reading and writing. They also build cultural awareness and prepare pupils for success in secondary school language learning.

Spanish Supercurriculum

Reading

1. BBC Bitesize KS3 Spanish –
2. The Spanish Experiment: children's stories with audio –
3. Storyberries bilingual stories (English/Spanish) –
4. Duolingo Stories –
5. Digital Dialects vocabulary lists –

Writing

1. Keep a simple weekly diary in Spanish (3–5 sentences).
2. Write a postcard in Spanish about a holiday (BBC Bitesize prompts) –
3. Create your own illustrated Spanish–English dictionary.

4. Practise spelling and vocabulary with Digital Dialects –
5. Write a short description of your family and pets in Spanish.

Listening

1. Rockalingua free Spanish songs –
2. Coffee Break Spanish podcast (intro episodes) –
3. BBC Bitesize Spanish listening practice –
4. The Spanish Experiment stories with audio –
5. Spanish-Games.net songs –

Watching

1. BBC Bitesize KS3 Spanish video clips –
<https://www.bbc.co.uk/bitesize/subjects/z4dqxnb>
2. Rockalingua animated videos – <https://rockalingua.com/videos>
3. Calico Spanish YouTube channel –
4. Peppa Pig en Español (YouTube) –
5. Muzzy BBC Spanish – <https://www.bbc.co.uk/bitesize/articles/zfxc7nb>

Researching

1. Research Spanish-speaking countries with National Geographic Kids –
2. Use WordReference to look up Spanish words –
3. Explore Spanish festivals and traditions (BBC Bitesize) –
4. Investigate Spanish food culture –
5. Compare the use of formal and informal greetings in Spanish –

Student-led Tasks

1. Teach classmates 5 new Spanish words each week.

2. Lead a role-play in Spanish (e.g. ordering in a café).
3. Run a class quiz on Spanish vocabulary for colours, numbers or animals.
4. Present a short talk about a Spanish-speaking country.
5. Organise a “Spanish Day” with songs, games and food.

Creative Tasks

1. Write and perform a short Spanish dialogue with a partner.
2. Create a colourful poster of classroom instructions in Spanish.
3. Make a comic strip in Spanish using speech bubbles.
4. Record yourself singing a simple Spanish song.
5. Design a brochure for a Spanish-speaking city.

YEAR 7 SPANISH (MFL)

Why Supercurriculum Matters in Spanish

Supercurriculum activities in Spanish help pupils build real-world language skills beyond the classroom. By reading short texts, listening to songs and podcasts, practising everyday conversations, and exploring Spanish-speaking cultures, pupils grow in vocabulary, grammar control, pronunciation, and confidence. They learn to understand different accents, choose the right register for purpose and audience, and communicate ideas clearly across topics such as family, hobbies, school, food, and travel.

SPANISH FEEDBACK TEST

“Leer, escuchar, hablar y escribir con confianza”

Instructions:

Rate each statement using: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree.

Answer the reflection at the end of each section.

A. Reading

1. I enjoy reading short Spanish texts (messages, menus, ads, mini-stories).
2. I can find the main idea and important details.
3. I can guess meanings of new words from context.
4. I can explain a text in simple English or Spanish.

Reflection: What Spanish text did you read recently and what new word did you learn?

B. Writing

1. I can write short, clear sentences with correct basic punctuation.
2. I use present tense verbs and common structures accurately (me gusta, hay, tengo).
3. I can join ideas with y/pero/porque.

4. I can check and correct mistakes after drafting.

Reflection: Which part of writing in Spanish is easiest or hardest for you?

C. Listening

1. I can understand short, slow audio on familiar topics.
2. I can catch key words, numbers, and names.
3. I can follow simple instructions or questions.
4. I can summarise the main points after listening.

Reflection: Which audio, song, or video helped you most, and why?

D. Watching

1. I learn well from short video lessons, dialogues, or clips.
2. I connect what I see to words and phrases I know.
3. I notice pronunciation, intonation, and gestures.
4. I can tell if a video explained something clearly.

Reflection: Name one video that improved your Spanish and what you noticed.

E. Researching

1. I can look up words safely in a learner's dictionary and record them.
2. I can find simple, reliable cultural information in Spanish or English.
3. I can take short notes (bullet points) and keep sources.
4. I can compare two explanations and choose the clearer one.

Reflection: What Spanish topic (place, festival, food, music) would you like to research next?

F. Student-Led Tasks

1. I enjoy practising Spanish with classmates or family.

2. I can lead a short warm-up or vocabulary game.
3. I can ask and answer follow-up questions.
4. I can summarise my group's ideas at the end.

Reflection: Describe a time you helped a partner practise Spanish.

G. Creative Tasks

1. I like using Spanish in creative ways (dialogues, posters, slides, short videos).
2. I can perform a short role-play in pairs.
3. I can combine images and words to explain meaning.
4. I feel confident sharing creative work in Spanish.

Reflection: Which creative Spanish task made you most proud, and why?

Final Reflection

What is one Spanish skill you want to improve this term (reading speed, speaking fluency, grammar accuracy, pronunciation, vocabulary)? How will you practise it beyond lessons?

SPANISH INTERVENTION FRAMEWORK

(Use the average score per section to select the level: 1–2, 3, or 4–5.)

READING

If score is 1–2 (Needs Support):

Read one short graded text each week (topics: family, school, likes). Underline five new words; make a mini glossary (Spanish, simple meaning, your sentence).

Answer three *quién/qué/dónde* questions.

Outcome: Understands main ideas and begins to use new vocabulary accurately.

If score is 3 (Developing):

Read two mini-texts on the same topic (e.g., daily routine). Write four sentences:

main idea of A, main idea of B, one similarity, one difference.

Outcome: Compares texts and uses linking words (también, pero, porque).

If score is 4–5 (Secure/Advanced):

Read a longer message or short article. Write a 120-word summary including topic sentence, two key details, and one inference (“Esto sugiere que...”).

Outcome: Summarises clearly and shows deeper understanding.

WRITING

If score is 1–2 (Needs Support):

Write a daily 5-sentence diary in the present tense (hoy, mañana, me gusta...).

Check capitals, accents where needed (mamá, sábado), full stops, and verb forms.

Outcome: Produces correct basic sentences and builds routine.

If score is 3 (Developing):

Write an 8–10 sentence paragraph on a familiar topic (mi familia, mis pasatiempos). Use a topic sentence, three details with porque/pero, and a closing sentence. Underline five connectives (y, pero, porque, también, sin embargo).

Outcome: Organises ideas with simple cohesion and generally accurate grammar.

If score is 4–5 (Secure/Advanced):

Write a 150-word email/blog post. Include present + near future (voy a + infinitive) and at least one opinion with justification (pienso que... porque...). Edit for varied sentences and precise vocabulary.

Outcome: Adapts writing to purpose with range, accuracy, and some tense control.

LISTENING

If score is 1–2 (Needs Support):

Listen to a 3–5 minute slow clip. Note five key words and one number/name.

Replay once and write two sentences about the main idea.

Outcome: Catches key information and improves short-text understanding.

If score is 3 (Developing):

Listen to a short dialogue. Complete a “Primero–Luego–Después–Finalmente”

outline and write two new phrases you heard.

Outcome: Follows sequences and extends phrase bank.

If score is 4–5 (Secure/Advanced):

Listen to a short interview or vlog. Create a 6-line note grid: tema, tres ideas, ejemplo, tu opinión.

Outcome: Extracts detail and responds thoughtfully.

WATCHING

If score is 1–2 (Needs Support):

Watch a short video with subtitles. Pause and shadow (repeat) one sentence per scene. Add one useful phrase to a phrase bank (¿Cómo te llamas?, Me gusta...).

Outcome: Builds pronunciation, rhythm, and common expressions.

If score is 3 (Developing):

Watch a mini-lesson or vlog. Make a two-column note: frase nueva → significado/ejemplo propio.

Outcome: Expands usable vocabulary with examples.

If score is 4–5 (Secure/Advanced):

Watch a short documentary or cultural clip. Produce a 100-word review: mensaje principal, dos datos, una opinión, una pregunta.

Outcome: Connects viewing to analysis and discussion.

RESEARCHING

If score is 1–2 (Needs Support):

Use a learner's dictionary to check 5 words a week (artículo, género, plural).

Record word, part of speech, simple definition, and your sentence.

Outcome: Builds independent vocabulary habits.

If score is 3 (Developing):

Research a Spanish-speaking place, festival, or food. Collect five bullet-point facts from one safe site; add a labelled picture or map in Spanish (norte/sur, costa,

capital).

Outcome: Transfers reading to cultural knowledge and basic mapping.

If score is 4–5 (Secure/Advanced):

Compare two short sources on the same cultural topic. Write which is clearer and why (layout, examples, language level).

Outcome: Evaluates clarity and chooses suitable sources.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 60-second “Show & Tell” (object or photo). Say qué es, de dónde es, por qué te gusta.

Outcome: Builds speaking confidence with simple structures.

If score is 3 (Developing):

Run a 3-minute mini-chat: prepare five questions on a topic (comida, música, deporte). Ask follow-ups (¿Por qué?, ¿Cuál?, ¿Con quién?, ¿Con qué frecuencia?).

Outcome: Maintains a short conversation and listens actively.

If score is 4–5 (Secure/Advanced):

Give a 2–3 minute presentation with one slide or prop. Include opening, two main points with examples, and a short conclusion. Take one audience question.

Outcome: Presents clearly and responds spontaneously.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Create a labelled poster or photo story (4–6 pictures) with present-tense captions (Vivo en..., Me gusta..., Hay...).

Outcome: Combines images and language to communicate clearly.

If score is 3 (Developing):

Write and perform a short role-play (en el café / en la tienda / presentaciones).

Record and listen back to check tricky sounds (rr, j, ll).

Outcome: Practises real-life language and improves pronunciation.

If score is 4–5 (Secure/Advanced):

Produce a 60–90 second video or blog post explaining “Cómo...?” (una receta fácil, un juego, tu rutina). Use signposting phrases (primero, después, finalmente; en mi opinión).

Outcome: Speaks or writes fluently with structure and audience awareness.

Optional weekly routine (quick guide)

- **Mon:** Short reading + 5-word glossary
- **Tue:** Listening clip + two-sentence summary
- **Wed:** Paragraph writing or email draft
- **Thu:** Speaking task (dialogue or mini-presentation)
- **Fri:** Creative/culture task + reflection

If you'd like, I can adapt this for **French** in the same format, or make a **print-ready Word/Google Form pack** with auto-totalling and suggested interventions.

3. **Score-Aligned Interventions** (1–2 = Needs Support, 3 = Developing, 4–5 = Secure/Advanced)

GREEK

Why super curriculum matters in Greek

Supercurriculum activities in Greek help pupils develop deeper language skills while exploring one of the world's oldest cultures. They build confidence in reading, writing, listening and speaking, and connect learners with Greece's history, mythology and modern life.

Greek Supercurriculum

Reading

1. Greek myths retold for young learners –
2. Greek folktales for children –
3. ICDL digital library of children's books in Greek –
4. Greek language resources for learners –
5. “Ta Nea Twn Paidiwn” (children's news in Greek) –

Writing

1. Keep a short weekly diary in Greek (3–4 sentences).
2. Practise writing with the Triantafyllidis Lexicon –
https://www.greeklanguage.gr/greekLang/modern_greek/tools/lexica/triantafyllidis/index.html
3. Translate a short Greek myth into English and back into Greek.
4. Write a paragraph describing your family and hobbies in Greek.
5. Create an illustrated mini Greek–English dictionary with 20 new words.

Listening

1. Greek fairy tales audio –
2. Children's Greek songs (Melissaki) –
3. Learn Greek with dialogues –

4. Storynory Greek myths in English (with Greek context) –
5. Greek children's stories online –

Watching

1. Zouzounia TV cartoons in Greek –
2. Learn Greek with animations –
3. Mikres Istories (ERTflix children's show) –
<https://www.ertflix.gr/paidika/mikres-istories>
4. Mikres Istories YouTube songs –
5. Animated Greek mythology stories –

Researching

1. Research a Greek festival or tradition (Hellenic Ministry of Culture) –
2. Explore the origins of the Greek alphabet –
3. Research the history of Ancient Greece (BBC Bitesize) –
4. Learn about Greek cuisine and write about your favourite dish –
5. Investigate Greek islands and their geography –

Student-led Tasks

1. Teach a friend five new Greek words each week.
2. Lead a role-play in Greek (e.g. ordering food in a taverna).
3. Run a quiz about Greek mythology characters.
4. Give a short talk about a Greek island or city.
5. Organise a Greek culture day with songs, food and myths.

Creative Tasks

1. Write and perform a short Greek dialogue with a partner.
2. Create a colourful poster of Greek alphabet letters.
3. Design a comic strip in Greek with simple speech bubbles.

4. Record yourself singing a Greek children's song.
5. Illustrate a Greek myth and label the characters in Greek.

YEAR 7 GREEK (MFL)

Why Supercurriculum Matters in Greek

Supercurriculum activities in Greek help pupils build real-world language skills beyond the classroom. By reading short authentic texts, listening to stories and everyday conversations, practising core grammar and pronunciation, and exploring Greek culture, pupils grow in vocabulary, confidence and fluency. They learn the alphabet and sound-spelling rules, choose the right register, and communicate clearly across topics such as greetings, family, school, food, directions and travel. Most importantly, they discover that Greek opens doors to history, science words, and living culture.

GREEK FEEDBACK TEST

“Διαβάζω, ακούω, μιλάω και γράφω με αυτοπεποίθηση”

Instructions:

Rate each statement using: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree.

Answer the reflection at the end of each section.

A. Reading

1. I can read the Greek alphabet and recognise common words.
2. I can find the main idea in short texts (messages, menus, signs).
3. I can guess meanings of new words from context or cognates.
4. I can explain a text in simple English or Greek.

Reflection: What Greek text did you read recently and which new word did you learn?

B. Writing

1. I can write short, clear sentences with correct accents (τόνος) and punctuation.
2. I use common structures accurately (είμαι, έχω, μου αρέσει, υπάρχει/υπάρχουν).
3. I can join ideas with και/αλλά/γιατί.
4. I can check and correct mistakes after drafting.

Reflection: Which part of writing in Greek is easiest or hardest for you?

C. Listening

1. I understand short, slow audio on familiar topics.
2. I can catch key words, numbers, names and times.
3. I can follow simple instructions or classroom language in Greek.
4. I can summarise the main points after listening.

Reflection: Which audio or video helped you most, and why?

D. Watching

1. I learn well from short video lessons, dialogues, or cartoons in Greek.
2. I connect what I see to words and phrases I already know.
3. I notice pronunciation, stress and intonation.
4. I can tell if a video explained something clearly.

Reflection: Name one video that improved your Greek and what you noticed.

E. Researching

1. I can look up words safely in a learner's dictionary and record them.
2. I can find simple, reliable cultural information (places, food, festivals).

3. I can take short notes (bullet points) and keep sources.
4. I can compare two explanations and choose the clearer one.
Reflection: What Greek topic (city, island, celebration, food, music) would you like to research next?

F. Student-Led Tasks

1. I enjoy practising Greek with classmates or family.
2. I can lead a short warm-up or vocabulary game.
3. I can ask and answer follow-up questions.
4. I can summarise my group's ideas at the end.
Reflection: Describe a time you helped a partner practise Greek.

G. Creative Tasks

1. I like using Greek in creative ways (dialogues, posters, slides, short videos).
2. I can perform a short role-play in pairs (greetings, café, shop).
3. I can combine images and words to explain meaning.
4. I feel confident sharing creative work in Greek.
Reflection: Which creative Greek task made you most proud, and why?

Final Reflection

What is one Greek skill you want to improve this term (alphabet speed, speaking fluency, grammar accuracy, pronunciation, vocabulary)? How will you practise it beyond lessons?

GREEK INTERVENTION FRAMEWORK

(Use the average score per section to select the level: 1–2, 3, or 4–5.)

READING

If score is 1–2 (Needs Support):

Practise the alphabet daily (upper/lowercase), then read mini-texts (signs, menu items, timetable snippets). Underline five words; make a mini-glossary (λέξη, simple meaning, your sentence). Answer three ποιος/τι/πού questions.

Outcome: Accurate decoding of Greek script; understands main ideas and high-frequency words.

If score is 3 (Developing):

Read two short texts on the same topic (e.g., daily routine, food). Write four sentences: main idea of A, main idea of B, one similarity, one difference.

Outcome: Compares texts and uses linking words (επίσης, αλλά, γιατί).

If score is 4–5 (Secure/Advanced):

Read a longer message, short article or dialogue. Write a 120-word summary including a topic sentence, two key details and one inference (“Αυτό δείχνει ότι ...”).

Outcome: Summarises clearly and shows deeper understanding and inference.

WRITING**If score is 1–2 (Needs Support):**

Write a daily 5-sentence diary in the present tense (σήμερα..., μου αρέσει..., έχω..., πάω...). Check accents, spacing and verb forms.

Outcome: Produces correct basic sentences; builds routine and accuracy.

If score is 3 (Developing):

Write an 8–10 sentence paragraph on a familiar topic (η οικογένειά μου, τα χόμπι μου, το σχολείο). Use a topic sentence, three details with γιατί/αλλά, and a closing sentence. Include at least five connectives (και, αλλά, γιατί, επίσης, όμως).

Outcome: Organises ideas with cohesion and generally accurate grammar.

If score is 4–5 (Secure/Advanced):

Write a 150-word email/blog post using present + near future (θα + verb / πρόκειται να...) and at least one opinion with justification (νομίζω ότι... γιατί...). Edit for varied sentences (επειδή/αν και/που-clauses) and precise vocabulary.

Outcome: Adapts writing to purpose with range, accuracy and some tense control.

LISTENING

If score is 1–2 (Needs Support):

Listen to a 2–4 minute slow clip (greetings, numbers, times, café). Note five key words and one number/time. Replay once and write two sentences about the main idea.

Outcome: Catches key information; improves short-text understanding.

If score is 3 (Developing):

Listen to a short dialogue. Complete a “Πρώτα–Μετά–Έπειτα–Τέλος” outline and write two new phrases you heard (e.g., τι κάνεις; παρακαλώ; ευχαριστώ).

Outcome: Follows sequences and extends phrase bank.

If score is 4–5 (Secure/Advanced):

Listen to a short interview or vlog. Create a 6-line note grid: θέμα, τρεις ιδέες, παράδειγμα, η γνώμη μου.

Outcome: Extracts detail and responds thoughtfully in brief Greek/English notes.

WATCHING

If score is 1–2 (Needs Support):

Watch a short video with subtitles. Pause and shadow (repeat) one sentence per scene. Add one useful phrase to a phrase bank (Πώς σε λένε; Με λένε... / Πού είναι...;).

Outcome: Builds pronunciation, rhythm and common expressions.

If score is 3 (Developing):

Watch a mini-lesson or vlog. Make a two-column note: νέα φράση → meaning/your example.

Outcome: Expands usable vocabulary with examples and collocations.

If score is 4–5 (Secure/Advanced):

Watch a short cultural clip (festival, island, food). Write a 100-word review: main message, two facts, one opinion, one question.

Outcome: Connects viewing to analysis and discussion, using some Greek terms.

RESEARCHING

If score is 1–2 (Needs Support):

Use a learner's dictionary to check 5 words a week (gender/article: ο/η/το; plural patterns). Record word, part of speech, simple definition, and your sentence.

Outcome: Builds independent vocabulary habits and article accuracy.

If score is 3 (Developing):

Research a Greek place, festival or food. Collect five bullet-point facts from one safe site; add a labelled map or picture in Greek (βόρεια/νότια, ακτή, πρωτεύουσα).

Outcome: Transfers reading to cultural knowledge and basic mapping.

If score is 4–5 (Secure/Advanced):

Compare two short sources on the same cultural topic. Write which is clearer and why (layout, examples, language level).

Outcome: Evaluates clarity and chooses suitable sources for learning.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 60-second “Show & Tell” (object or photo). Say τι είναι, από πού είναι, γιατί σου αρέσει.

Outcome: Builds speaking confidence with simple structures.

If score is 3 (Developing):

Run a 3-minute mini-chat: prepare five questions on a topic (φαγητό, μουσική, σπορ, σχολείο). Ask follow-ups (Γιατί; Ποιο; Με ποιον; Κάθε πότε;).

Outcome: Maintains a short conversation and listens actively.

If score is 4–5 (Secure/Advanced):

Give a 2–3 minute presentation with one slide or prop. Include opening, two main points with examples, and a short conclusion. Take one audience question.

Outcome: Presents clearly and responds spontaneously.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Create a labelled poster or photo story (4–6 pictures) with present-tense captions (Μένω..., Μου αρέσει..., Υπάρχει...).

Outcome: Combines images and language to communicate clearly.

If score is 3 (Developing):

Write and perform a short role-play (στο καφέ / στο μαγαζί / συστάσεις). Record and listen back to check tricky sounds (χ, γ, μπ/ντ, stress position).

Outcome: Practises real-life language and improves pronunciation.

If score is 4–5 (Secure/Advanced):

Produce a 60–90 second video or blog post explaining “Πώς να ...” (ένα απλό φαγητό, μια διαδρομή, μια δραστηριότητα). Use signposting phrases (πρώτα, μετά, τέλος· κατά τη γνώμη μου).

Outcome: Speaks or writes fluently with structure and audience awareness.

Optional weekly routine (quick guide)

- **Mon:** Alphabet/phonics drill + short reading + 5-word glossary
- **Tue:** Listening clip + two-sentence summary
- **Wed:** Paragraph writing or email draft (check accents!)
- **Thu:** Speaking task (dialogue or mini-presentation)
- **Fri:** Culture/research task + reflection

If you'd like, I can turn this into a **print-ready Word/Google Form pack** with auto-totalling of section scores and suggested interventions, plus reflection spaces and a simple progress tracker.

PSHE & CITIZENSHIP

To ChatGPT είπες:

Excellent — here is the **Year 7 PSHE & Citizenship Supercurriculum package** in the same clean, continuous style as your other subjects.
It includes:

1. **Why Supercurriculum Matters in PSHE & Citizenship**
2. **Student Feedback Test** (self-assessment + reflections)
3. **Score-Aligned Interventions** (1-2 = Needs Support, 3 = Developing, 4-5 = Secure/Advanced)

PSHE & CITIZENSHIP

Why super curriculum matters in PSHE & Citizenship

Supercurriculum activities in PSHE & Citizenship help pupils develop resilience, empathy and responsibility. They encourage critical thinking about relationships, wellbeing, rights and responsibilities, and prepare pupils to participate positively in their communities.

PSHE & Citizenship Supercurriculum

Reading

1. BBC Bitesize PSHE & Citizenship –
2. Childline: Understanding feelings –
3. Newsround: Children’s news explained –
4. YoungMinds wellbeing advice –
5. UNICEF: Children’s Rights Convention –

Writing

1. Keep a wellbeing journal: one success, one challenge, one goal each week.
2. Write a persuasive letter on a local issue using Newsround reports –
3. Create a poster of your top five rights after reading UNICEF –
4. Draft a class kindness or respect charter.
5. Summarise an article from YoungMinds in your own words –

Listening

1. Peace Out mindfulness podcast –
2. Brains On! podcast episodes about emotions and friendships –
3. Childline Calm Zone audio guides –
4. Wow in the World podcast stories on kindness and community –
5. BBC School Radio “Life Stories” –

Watching

1. BBC Bitesize PSHE & Citizenship videos –
2. Newsround special reports –
3. World’s Largest Lesson (UN Global Goals) –
4. Sesame Street clips on emotions and kindness –

5. TED-Ed “Acts of Kindness” –

Researching

1. Investigate how charities support communities (BBC Newsround) –
2. Research volunteering opportunities for young people –
3. Explore how governments work (UK Parliament Education) –
4. Learn about mental health campaigns (YoungMinds) –
5. Investigate how the UN protects children’s rights –

Student-led Tasks

1. Lead a short debate on a current issue from Newsround.
2. Organise a class wellbeing check-in session.
3. Create and lead a quiz about children’s rights.
4. Run a small group discussion on the impact of social media.
5. Lead a team activity that promotes cooperation and respect.

Creative Tasks

1. Design a poster campaign about anti-bullying.
2. Create an infographic about healthy habits.
3. Write and perform a short role-play about resolving conflict.
4. Produce a video promoting kindness in school.
5. Make a comic strip showing how to stand up for someone’s rights.

Why Supercurriculum Matters in PSHE & Citizenship

Supercurriculum activities in PSHE & Citizenship help pupils grow healthy habits, make safe choices, and understand how society works. By exploring wellbeing, relationships, digital life, rights and responsibilities, money basics, and community action, pupils build empathy, resilience, and confidence. They learn to recognise reliable information, communicate respectfully, solve problems, and contribute positively to school and society.

PSHE & CITIZENSHIP FEEDBACK TEST

“Healthy choices, respectful relationships, active citizens”

Instructions:

Rate each statement using: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree.

Answer the reflection at the end of each section.

A. Reading

1. I read short PSHE or citizenship articles (health, digital safety, rights).
2. I can explain the main message and key advice.
3. I can spot reliable information and know when to check a source.
4. I can summarise how a tip or right applies to everyday life.

Reflection: Which article or page helped you most, and what did you learn?

B. Writing

1. I can write clear reflections on choices and consequences.
2. I can plan steps to reach a personal goal.
3. I can explain a point of view respectfully with reasons.
4. I can write a short guide for others (how to be safe, kind, or fair).

Reflection: What kind of PSHE/Citizenship writing is easiest or hardest for you?

C. Listening

1. I listen carefully in discussions about wellbeing and citizenship.
2. I can recall three key points after listening.
3. I can tell the difference between fact, opinion, and advice.

4. I can explain why the topic matters for our community.

Reflection: What talk, story, or discussion changed your thinking?

D. Watching

1. I learn well from short videos about health, safety, or rights.
2. I can describe the problem, the choices, and the best option shown.
3. I can link what I saw to school or home situations.
4. I can suggest one improvement to make the video clearer or fairer.

Reflection: Which video helped you most, and why?

E. Researching

1. I can find reliable information about health, online safety, or civic life.
2. I can take brief notes and record where I found them.
3. I can compare two sources and explain which is more trustworthy.
4. I can link research to real actions I could take.

Reflection: What PSHE/Citizenship topic would you like to research next?

F. Student-Led Tasks

1. I enjoy helping others learn about positive choices and citizenship.
2. I can lead a short activity (values game, scenario, quiz).
3. I can give kind, specific feedback and listen respectfully.
4. I can summarise what our group agreed to do next.

Reflection: Describe a time you led or supported a useful discussion or activity.

G. Creative Tasks

1. I like designing posters, slides, or short videos to promote positive choices.
2. I can role-play a scenario and model good decisions.

3. I can use data or facts alongside images to persuade fairly.
4. I feel confident presenting my project to others.

Reflection: Which creative task made the biggest difference to your understanding?

Final Reflection

Name one PSHE/Citizenship skill you want to improve this term (for example, managing stress, online safety, respectful debate, budgeting, taking part in community life). How will you practise it beyond lessons?

PSHE & CITIZENSHIP INTERVENTION FRAMEWORK

(Use the average score per section to select the level: 1–2, 3, or 4–5.)

READING

If score is 1–2 (Needs Support):

Read one short page weekly on a practical topic (sleep routine, kindness online, consent for sharing photos, basic rights). Write three sentences: main message, one tip, one question. Keep a glossary of five key terms over the month.

Outcome: Understands main ideas and starts using accurate vocabulary.

If score is 3 (Developing):

Read two short pieces on the same theme (for example, screen time balance). Note one agreement, one difference, and one action you could try this week.

Outcome: Compares advice and links it to everyday life.

If score is 4–5 (Secure/Advanced):

Read two contrasting viewpoints on a civic or ethical issue (for example, uniform policy or local transport). Write a 120-word comparison including evidence and a fair conclusion.

Outcome: Evaluates perspectives and justifies a balanced view.

WRITING

If score is 1–2 (Needs Support):

Keep a simple weekly wellbeing log: **What happened** → **How I felt** → **What helped** → **One next step**.

Outcome: Reflects clearly and plans small improvements.

If score is 3 (Developing):

Write a SMART goal for a habit (sleep, hydration, revision routine, kindness online). Add a step-by-step plan and a check-in date.

Outcome: Plans realistic actions and tracks progress.

If score is 4–5 (Secure/Advanced):

Write a 150-word guide for peers (for example, “Starting a kindness campaign” or “Basic budgeting for Year 7”). Include three practical tips and one common myth to avoid.

Outcome: Communicates guidance clearly and helpfully.

LISTENING

If score is 1–2 (Needs Support):

After a talk or story, note three facts and one advice point. Retell the main idea in two sentences.

Outcome: Recalls essentials and distinguishes advice from information.

If score is 3 (Developing):

During a discussion, keep a T-chart of viewpoints with one reason for each. Add one question you would ask to understand more.

Outcome: Captures perspectives fairly and asks constructive questions.

If score is 4–5 (Secure/Advanced):

Listen to a debate or panel. Write a brief reflection identifying the strongest argument, the evidence used, and one area needing more information.

Outcome: Evaluates arguments and evidence with confidence.

WATCHING

If score is 1–2 (Needs Support):

Watch a short scenario (friendship, online chat, bystander choices). Write “Problem → Options → Best choice (why)”.

Outcome: Recognises safe and respectful decisions in common situations.

If score is 3 (Developing):

Watch a short explainer (sleep, food labels, privacy settings). Create a four-step checklist to apply the advice at home or school.

Outcome: Transfers viewed advice into simple routines.

If score is 4–5 (Secure/Advanced):

Watch a civic or community clip (local council, volunteering). Write a 100-word critique on clarity, fairness, and one improvement (for example, show a young person’s view or real data).

Outcome: Evaluates communication and inclusivity.

RESEARCHING

If score is 1–2 (Needs Support):

Find three facts on a safe topic (for example, hydration, move-more breaks, kindness online). Record the source and how you’ll try one idea this week.

Outcome: Uses reliable basics and connects them to action.

If score is 3 (Developing):

Research a simple citizenship topic (how to contact a councillor, how a school council works, what a charity does). Write a short paragraph explaining the steps or purpose.

Outcome: Understands how to participate in community life.

If score is 4–5 (Secure/Advanced):

Compare two sources on a public issue (for example, litter, buses, local sports access). Note one agreement, one difference, and your evidence-based view.

Outcome: Compares sources critically and forms a reasoned conclusion.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 60-second kindness or safety reminder (for example, “pause before posting”). Include one example.

Outcome: Builds confidence communicating positive choices.

If score is 3 (Developing):

Run a five-minute mini-activity: values ranking, gratitude circle, or digital-footprint quiz. Finish with one action the group will try this week.

Outcome: Organises short, purposeful participation.

If score is 4–5 (Secure/Advanced):

Plan a small citizenship action (poster drive, litter pick route, tutor-time survey). Set a goal, assign roles, and write a two-sentence impact summary afterwards.

Outcome: Leads practical action and reflects on outcomes.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Design a simple poster on a PSHE theme (healthy sleep, respectful chat, bystander tips). Include one slogan and two practical steps.

Outcome: Communicates clear, positive messages.

If score is 3 (Developing):

Create a short storyboard or role-play showing a challenge and a respectful solution (friend disagreement, team inclusion). Add captions explaining choices.

Outcome: Practises problem-solving and empathy.

If score is 4–5 (Secure/Advanced):

Produce a 60–90 second awareness video or infographic (budgeting basics, safe sharing online, joining youth groups). Include one statistic, one tip, and a signpost for help.

Outcome: Informs and persuades responsibly with evidence.
