

SUPER CURRICULUM ACTIVITIES

year8

ENGLISH

Why super curriculum matters in English

Supercurriculum activities in English help pupils deepen their appreciation of literature and language. They encourage independent reading, critical thinking, and creative writing, while building skills in analysis and expression that prepare for GCSE study.

Supercurriculum Navigation Guide – English

The Supercurriculum is your chance to go beyond the classroom and develop your own voice as a reader, thinker, speaker, and writer. You are not expected to complete everything at once — instead, choose activities that interest you and work on them steadily over time.

Each category below supports a different skill. Use the guidance to help you understand how to approach the tasks and how to reflect on your progress.

1. Reading

Purpose: To broaden your vocabulary, strengthen comprehension, and develop critical thinking.

How to use this section:

- Choose one text at a time (short stories, extracts, or full novels).
- Read actively: underline words you don't know, note interesting quotations, and summarise each chapter or scene in 3–4 sentences.
- After reading, ask yourself:
 - *What is the main idea?*
 - *What themes or messages are explored?*
 - *How does the writer create mood, meaning, or tension?*

Tip: Keep a personal reading log to record your reflections and new vocabulary.

2. Writing

Purpose: To develop clarity, creativity, and sophistication in your written expression.

How to approach writing tasks:

- Choose one writing activity per week.
- Draft your work first, then edit it the next day.
- Focus on:
 - *Sentence variety*
 - *Precise vocabulary*
 - *Logical structure and flow*
- If entering competitions, always re-read the requirements carefully (word limits, themes, deadlines).

Goal: Learn to express ideas confidently and effectively.

3. Listening

Purpose: To improve comprehension and attention to tone, emphasis, and meaning in spoken language.

How to use listening resources:

- Listen with a notebook.
- Pause every few minutes to jot key points.
- After finishing, summarise the content in your own words.
- Ask:
 - *What did I learn?*
 - *How was the story or information structured?*

This builds strong note-taking and comprehension skills useful for GCSE and beyond.

4. Watching

Purpose: To see language and literature come alive in performance and explanation.

How to approach viewing:

- When watching Shakespeare or literary analysis videos, take notes on:
 - Character motivations
 - Plot shifts
 - How mood is created through voice, lighting, or staging
- Compare how performance differs from reading text alone.

This develops visual literacy and deeper interpretation.

5. Researching

Purpose: To build independent academic curiosity and context awareness.

How to research effectively:

- Begin with a clear question, such as:
 - *What influenced this author?*
 - *How does the historical context affect the story?*
- Record your findings using bullet points.
- Always note your sources.

This trains independent inquiry — a key skill for further study.

6. Student-Led Tasks

Purpose: To practise explaining ideas to others and leading discussions.

How to approach these tasks:

- Choose one activity (e.g., run a mini book club).
- Plan your session:
 - Select a text extract or topic.
 - Prepare two questions for group discussion.
- Lead with confidence, but also invite others' opinions.

This develops leadership, communication, and collaboration.

7. Creative Tasks

Purpose: To explore literature in imaginative and expressive ways.

How to complete these tasks:

- Choose a creative product (e.g., monologue, comic strip, spoken word).
- Draft your idea first, then refine:
 - Think about voice, emotion, pacing, and presentation.
- Share your work if you feel confident — creativity grows through feedback.

This nurtures originality and artistic expression.

How to Manage Your Time

- Aim to complete **1–2 Supercurriculum activities per week.**
- Mix different skill types (e.g., one reading + one creative).
- Keep all work in a dedicated notebook or digital folder.

How to Show Progress

- Keep a Supercurriculum journal or portfolio.
- Record:
 - What you completed
 - What you learned
 - New vocabulary or techniques you found useful

This portfolio can support school profiles, awards, or applications (including future Sixth Form or university enrichment profiles).

Reading

1. BBC Bitesize KS3 English guides –
2. Project Gutenberg: free classic novels –
3. Shakespeare stories and summaries (BBC) –
4. American Literature short stories –
5. National Literacy Trust recommended reading lists –

Writing

1. Keep a weekly creative writing journal using Pobble365 prompts –
2. Enter a Young Writers UK competition –
3. Practise essays using BBC Bitesize guides –

4. Write your own modern retelling of a Shakespeare scene.
5. Draft a persuasive speech on a topical issue and deliver it aloud.

Listening

1. BBC School Radio: "Talking Stories" –
2. Storynory audiobooks and myths –
3. Librivox free audiobooks –
4. Brains On! (note-taking practice with non-fiction audio) –
5. KidsLit Radio author interviews –

Watching

1. BBC Teach KS3 English video clips –
2. TED-Ed literature lessons – <https://ed.ted.com/lessons?category=Literature>
3. Crash Course Literature series –
4. National Literacy Trust storytelling films –
5. Shakespeare's Globe Theatre performances (YouTube) –

Researching

1. Research a favourite author on Britannica –
2. Compare book reviews on Goodreads –
3. Research the historical context of a novel (BBC History for Kids) –
4. Explore how newspapers use persuasive language –
5. Investigate how stories change when adapted into film.

Student-led Tasks

1. Lead a mini book club with peers on a novel of choice.

2. Teach a new literary device (e.g. metaphor, foreshadowing) to classmates.
3. Organise a short debate on a theme from a studied text.
4. Run a peer workshop on improving descriptive writing.
5. Deliver a short presentation on your favourite poem.

Creative Tasks

1. Write and perform a monologue for a Shakespeare character.
2. Create a comic strip version of a key scene from a novel.
3. Design a new book cover for a studied text.
4. Compose a spoken word poem about a personal theme.
5. Create a storyboard for turning a short story into a short film.

YEAR 8 ENGLISH — FEEDBACK TEST

“Read closely, think deeply, write purposefully”

Instructions: Rate each statement: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree. Answer the reflection at the end of each section.

A. Reading

1. I can track a text's argument or storyline across longer chapters.
2. I can explain how a writer's language and structure shape meaning.
3. I can compare two texts on a shared idea or theme.
4. I can select concise quotations to support a point.

Reflection: Which text challenged you recently, and what helped you understand it?

B. Writing

1. I plan before I write and use paragraphs to guide the reader.
2. I vary sentence types and punctuation for effect and clarity.
3. I choose precise vocabulary and avoid repetition and filler.
4. I can write effectively to describe, narrate, and argue.

Reflection: Which aspect of writing (planning, style, accuracy) needs the most attention?

C. Listening

1. I can follow extended discussions and note opposing views.
2. I can summarise key points and examples from what I heard.
3. I can identify bias, tone, or persuasive techniques in speech.
4. I can respond with a reasoned point of my own.

Reflection: Which talk, reading, or podcast improved your thinking?

D. Watching

1. I can analyse how performance choices (voice, movement, lighting) affect meaning.
2. I can compare a filmed/staged scene with the original text.
3. I can identify symbolism or motif in visual storytelling.
4. I can explain how editing/structure shapes audience response.

Reflection: Which performance or clip changed how you read a scene?

E. Researching

1. I can find reliable background information on author, context, or genre.

2. I can keep brief notes with clear headings and references.
3. I can evaluate credibility and spot viewpoint or bias.
4. I can use research to deepen analysis in my writing.

Reflection: What topic would you like to research to enrich your reading?

F. Student-Led Tasks

1. I am comfortable leading a short discussion using questions.
2. I can build on others' ideas and steer a group politely back on task.
3. I can summarise our discussion with evidence.
4. I can give useful, specific feedback on a partner's work.

Reflection: Describe a time you helped a group reach a clearer conclusion.

G. Creative Tasks

1. I experiment with narrative viewpoint, structure, and imagery.
2. I craft dialogue and description to create mood and pace.
3. I can adapt style for a target audience or purpose.
4. I revise creatively, cutting clutter and strengthening voice.

Reflection: Which creative piece best shows your progress this year?

Final Reflection

Choose one focus for this term (close analysis, paragraph cohesion, rhetorical control, vocabulary precision, spoken confidence). What two actions will you take each week to improve?

INTERVENTION FRAMEWORK

(Use the average score in each section to select the level: 1-2, 3, or 4-5.)

READING

If score is 1–2 (Needs Support):

Aim: secure understanding and evidence use.

Read one 2–4 page extract weekly. Write three sentences: (1) What happens/what is argued? (2) One language choice and its effect (quote 6–10 words). (3) One question you still have.

Outcome: Clear gist, accurate short quotation, simple effect explained.

If score is 3 (Developing):

Aim: analysis and mini-comparison.

Read two short texts sharing a theme (e.g., fear, power, journeys). Write a 120-word comparison: writer's viewpoint, one method each, one similarity, one difference.

Outcome: Structured comparison with purposeful evidence.

If score is 4–5 (Secure/Advanced):

Aim: interpretation and synthesis.

Read a longer chapter/essay. Produce a paragraph using this frame: **Idea → Evidence (short quote) → Language/Structure analysis → Context/genre link → Mini-conclusion.**

Outcome: Sustained, insightful analysis with precise selection.

WRITING

If score is 1–2 (Needs Support):

Focus: sentence control and paragraph shape.

Daily 10-minute drills: combine short sentences; fix run-ons; use commas for clarity. Build one PEEL paragraph weekly on a prompt; read aloud to test flow.

Outcome: Accurate sentences; paragraphs with clear point and evidence.

If score is 3 (Developing):

Focus: style, cohesion, and vocabulary.

Write one 150-word piece (describe or argue). Replace five vague words; add fronted adverbials or varied openers; end with a purposeful concluding sentence.

Outcome: Varied sentences, stronger lexis, coherent progression.

If score is 4–5 (Secure/Advanced):

Focus: rhetorical craft and audience.

Write to argue or advise on a current school issue. Plan with **Thesis → Two reasons → Counterpoint → Resolution.** Edit for precision (cut filler; sharpen

verbs).

Outcome: Confident voice, control of register, and convincing structure.

LISTENING

If score is 1–2 (Needs Support):

Listen to a 5–8 minute talk. Note three facts, one opinion, one example.

Summarise in two sentences.

Outcome: Distinguishes fact/opinion and retains core message.

If score is 3 (Developing):

Create a note grid during a discussion: **Claim | Evidence | Tone**. Add one question to extend the point.

Outcome: Tracks reasoning and contributes a relevant prompt.

If score is 4–5 (Secure/Advanced):

After a debate clip, write a 120-word critique on logic, evidence quality, and rhetoric (ethos/pathos/logos).

Outcome: Evaluates argument style with accurate terminology.

WATCHING

If score is 1–2 (Needs Support):

Watch a 5–10 minute scene. Write “Who/Where/What changed?” and one mood word with a brief reason.

Outcome: Secure plot and mood recognition.

If score is 3 (Developing):

Choose one directorial choice (music, lighting, gesture). Explain effect in 5–6 sentences, quoting a line or stage direction if relevant.

Outcome: Links stage/film choices to meaning.

If score is 4–5 (Secure/Advanced):

Compare text vs performance: what is added/omitted/emphasised and why? Finish with a judgement about impact on theme or character.

Outcome: Thoughtful adaptation analysis with evidence.

RESEARCHING

If score is 1–2 (Needs Support):

Find three reliable facts about author/context; record source and one way it changes your reading.

Outcome: Uses safe sources; states simple significance.

If score is 3 (Developing):

Create eight bullet notes on a theme across two texts; label each note

Idea/Evidence/Context.

Outcome: Organised notes feeding directly into paragraphs.

If score is 4–5 (Secure/Advanced):

Evaluate two sources on the same topic. In 120 words, judge credibility (author, date, evidence) and usefulness for your essay.

Outcome: Critical selection and justification.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Deliver a 60-second “book spark”: title, key idea, one quoted line.

Outcome: Builds concise speaking with evidence.

If score is 3 (Developing):

Lead a 5-minute micro-seminar with two open questions and a 1-paragraph summary of group consensus.

Outcome: Guides discussion and synthesises viewpoints.

If score is 4–5 (Secure/Advanced):

Host a mini-debate on a character’s decision. Provide two arguments, a counter, and a neutral closing.

Outcome: Chairs balanced talk with clear conclusions.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Write a 120-word monologue capturing one emotion; underline three sensory details.

Outcome: Clear voice, concrete imagery.

If score is 3 (Developing):

Retell a scene from a different viewpoint or time-shift the narrative. Add a 5-

sentence creator's note explaining choices.

Outcome: Purposeful structural experimentation.

If score is 4–5 (Secure/Advanced):

Produce a polished piece (short story opening or spoken-word poem). Revise using a checklist: **hook, pace, imagery, precise verbs, clean punctuation.**

Outcome: Crafted, original writing with control.

Optional weekly routine (quick guide)

- **Mon:** Close-reading extract + 3-sentence response
- **Tue:** Sentence-combining + one PEEL paragraph
- **Wed:** Listening note-grid + 2-sentence summary
- **Thu:** Research card (fact → significance)
- **Fri:** Creative/rewrite task + micro-edit pass

If you'd like, I can convert this into a **fillable Word/Google Form** that auto-totals section scores and suggests the matching interventions instantly.

MATHEMATICS

Why super curriculum matters in Mathematics

Supercurriculum activities in Maths help pupils stretch their problem-solving skills, deepen conceptual understanding and see how mathematics connects to the real world. They encourage resilience, logical reasoning and creativity, laying strong foundations for GCSE study.

Supercurriculum Navigation Guide – Mathematics

The Mathematics Supercurriculum supports you in extending your knowledge beyond classroom lessons. It is designed to help you become a confident, curious and resilient problem-solver. You do not need to complete everything at once — choose activities that interest you and aim to challenge yourself a little more each time.

Each section below focuses on a different way of developing mathematical thinking. Use this guide to understand how to approach the tasks and how to reflect on your learning.

1. Reading

Purpose: To deepen understanding and explore how mathematics connects to real life.

How to use this section:

- Choose one resource or article at a time.
- Read actively: note new terms, interesting ideas, or questions that arise.
- After reading, summarise the key idea in your own words in 3–4 sentences.
- Ask yourself:
 - *What problem is being discussed?*
 - *Why is it interesting or important?*
 - *How does it relate to something I've learned in class?*

Tip: Keep a simple reading log to track your growing understanding.

2. Writing

Purpose: To build the habit of explaining your reasoning clearly.

How to approach writing tasks:

- Focus on *showing your method*, step by step.
- When solving a problem, describe:

- What you know
- What you are trying to find
- Which strategy you chose and why
- When summarising, keep your explanations concise and precise.
- Writing about maths helps make your thinking visible — this strengthens understanding.

Goal: To express mathematical ideas clearly, both to yourself and others.

3. Listening

Purpose: To develop confidence in understanding spoken mathematical explanations.

How to use listening resources:

- Listen with a notebook beside you.
- Write down new vocabulary, key ideas, or examples.
- If something is unclear, pause and replay — this is an advantage of audio learning.
- After listening, explain the main idea aloud or to a family member.

This builds auditory processing skills and reinforces understanding.

4. Watching

Purpose: To support visual understanding through demonstrations and explanations.

How to approach viewing:

- When watching tutorials or maths discussions, actively pause to work through examples yourself.
- Try to solve a problem alongside the video before seeing the answer.
- Compare the presenter's method with your own.

This strengthens independence and adaptability in problem solving.

5. Researching

Purpose: To help you see mathematics as a connected and meaningful subject.

How to research effectively:

- Begin with a clear question (e.g., *How is statistics used in sport?*).
- Gather information from trusted sources (BBC, NRICH, Maths Careers).
- Organise your findings in a few bullet points.
- Reflect on what surprised you, and how it changed your understanding.

This develops independent inquiry and real-world awareness.

6. Student-Led Tasks

Purpose: To build confidence and leadership through sharing your thinking.

How to approach these tasks:

- Choose one activity and prepare clearly.
- For example, when leading a “problem of the week”:
 - Make sure *you* understand the solution first.
 - Prepare guiding questions rather than giving answers immediately.
- Encourage participation — the goal is collaborative reasoning.

This strengthens communication and teamwork skills.

7. Creative Tasks

Purpose: To explore mathematical ideas through design, visual thinking, and creativity.

How to complete these tasks:

- Start with a concept (symmetry, scale, pattern, ratio).
- Plan your design or model before creating it.
- Focus on precision and clarity — creativity in maths still values structure.
- Reflect on what mathematical ideas your creation demonstrates.

This nurtures imagination and appreciation of the beauty of mathematics.

How to Manage Your Time

- Aim to complete **1–2 Supercurriculum activities per week.**

- Choose a variety (e.g., one problem-solving task + one creative task).
- Keep all work in a notebook or digital folder.

How to Show Progress

- Maintain a Supercurriculum journal or portfolio.
- Record:
 - The activity you completed
 - What you learned or found challenging
 - Any new strategies you developed

Your portfolio can contribute to:

- School awards
- Student profiles
- Future academic applications

Reading

1. BBC Bitesize KS3 Maths guides –
2. NRICH student resources –
3. Plus Magazine: mathematics in the real world –
4. Mathigon interactive courses –
5. MacTutor biographies of mathematicians –

Writing

1. Keep a problem-solving journal: record strategies and mistakes.
2. Write your own word problem and solve it, showing all steps.
3. Explain in writing how to expand and simplify an algebraic expression (Bitesize support) – <https://www.bbc.co.uk/bitesize/subjects/zqhs34j>
4. Summarise a mathematical investigation from NRICH – <https://nrich.maths.org/secondary-lower>

5. Write a one-page “study guide” for a classmate on fractions, percentages or algebra.

Listening

1. Maths Appeal podcast (UK teachers explaining problem solving) –
2. The Numberphile Podcast (choose accessible episodes) –
3. KidsMathTalk podcast –
4. A Problem Squared (problem-solving discussions, select age-appropriate episodes) –
5. BBC School Radio: Times Tables songs –

Watching

1. BBC Bitesize KS3 Maths video lessons –
2. Corbettmaths videos –
3. Khan Academy algebra & geometry –
4. Numberphile videos (short, engaging maths ideas) –
5. Mathigon Polypad demonstrations –

Researching

1. Investigate the life of a famous mathematician on MacTutor –
2. Explore how maths is used in careers –
3. Research a real-world application of algebra or statistics in the news –
4. Use NRICH to research strategies for solving puzzles –

5. Compare two different methods for solving simultaneous equations.

Student-led Tasks

1. Lead the class through a “problem of the week” from NRICH – <https://nrich.maths.org/secondary-lower>
2. Run a quick-fire times tables or algebra quiz.
3. Teach a peer a method (e.g. solving linear equations).
4. Lead a discussion on how maths is used in your hobbies (e.g. music, sport, gaming).
5. Present a real-life maths connection (e.g. probability in games, geometry in art).

Creative Tasks

1. Create a piece of art using geometric patterns or tessellations.
2. Build a model showing scale and proportion (e.g. a famous building).
3. Write a maths riddle or puzzle for classmates to solve.
4. Make an infographic showing class survey data with graphs.
5. Compose a short rap or poem about a maths topic (like Pythagoras or algebra).

FEEDBACK TEST

“Reason clearly, choose methods wisely, explain your thinking”

Instructions: Rate each statement 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree. Answer the reflection at the end of each section.

A. Reading

1. I can follow multi-step written examples without getting lost.
2. I spot patterns or invariants (what stays the same when something changes).
3. I can restate a method in my own words.
4. I can extract the key idea from a maths article or problem solution.

Reflection: Which written explanation helped you recently, and why?

B. Writing

1. I set out solutions neatly with clear reasons.
2. I use correct notation and units ($\approx$, %, $\times$, $\div$, cm^2 , etc.).
3. I justify a step with a rule or property (e.g., distributive law).
4. I can write a short comparison of two methods.

Reflection: What part of writing about maths do you want to sharpen (layout, reasons, notation)?

C. Listening

1. I pick up key steps and vocabulary from spoken explanations.
2. I can re-explain a method to a partner.
3. I recognise when a suggestion is a shortcut or a different strategy.
4. I can spot and correct a spoken misconception.

Reflection: Which explanation or podcast changed how you solve a problem?

D. Watching

1. I follow worked-example videos and pause at decision points.
2. I can predict the next step before it appears.
3. I notice why a particular representation (bar model, graph) was chosen.
4. I evaluate whether the method shown is the most efficient.

Reflection: Which video improved your technique most?

E. Researching

1. I can find reliable resources for a topic I'm revising.
2. I take concise notes and examples I can reuse.
3. I can link a concept to real-world use (e.g., percentages in news).
4. I can compare two explanations and choose the clearer one.

Reflection: What topic will you research next and how will you record it?

F. Student-Led Tasks

1. I'm comfortable leading a mini discussion on a problem.
2. I can design a quick starter or "problem of the week".
3. I give specific, kind feedback on methods and presentation.
4. I can summarise strategies our group tried and which worked.

Reflection: When did you help a group unlock a problem?

G. Creative Tasks

1. I enjoy mathematical design or data storytelling.
2. I can create and explain a model/diagram to represent a problem.
3. I can design a puzzle with a clear solution path.
4. I present maths clearly for a non-expert audience.

Reflection: Which creative maths piece are you proud of, and what makes it effective?

Final Reflection

Choose one focus for this term (algebraic fluency, proportional reasoning, proof language, graph interpretation, data critique). Name two weekly actions to improve it.

INTERVENTION FRAMEWORK

(Apply the level matching the average score in each section.)

READING

If score is 1–2 (Needs Support):

Read one short worked example each week (fractions $\leftrightarrow$ decimals, area, simple equations). Underline the **goal**, number the steps, and write a one-sentence “because” after the trickiest step.

Outcome: Tracks multi-step logic; links steps to reasons.

If score is 3 (Developing):

Read a solution to a non-routine NRich-style problem. Create a 4-line précis:

Problem → **Key idea** → **Why it works** → **Where else it could work**.

Outcome: Distils structure and transfers ideas.

If score is 4–5 (Secure/Advanced):

Choose a challenging article/solution. Write a 120-word critique: alternative strategy, efficiency, and generalisation.

Outcome: Evaluates methods; articulates strategy choice.

WRITING

If score is 1–2 (Needs Support):

Weekly PEEL paragraph for a problem: **Point (what I’m finding)** →

Example/steps → **Explain rule** → **Link to check**. Include units and tidy layout.

Outcome: Clear structure; correct notation and units.

If score is 3 (Developing):

Write two complete methods for the same task (e.g., expand then substitute vs substitute then evaluate). Conclude with a 2-sentence efficiency judgement.

Outcome: Compares approaches; justifies choice.

If score is 4–5 (Secure/Advanced):

Compose a mini-proof/convincing argument (e.g., why the sum of two odd numbers is even; why gradients match ratio rise/run).

Outcome: Uses definitions and properties to justify claims.

LISTENING

If score is 1–2 (Needs Support):

During a short explanation, capture three key terms and one rule. Re-teach the method in 3 steps to a partner.

Outcome: Retains vocabulary and core steps.

If score is 3 (Developing):

While listening to a worked example, pause to predict the next step and write **why**. Compare to the speaker's choice.

Outcome: Anticipates reasoning; reflects on alternatives.

If score is 4–5 (Secure/Advanced):

Listen to a problem-solving discussion. Note one misconception and write the corrective explanation with a counter-example.

Outcome: Diagnoses errors; articulates precise fixes.

WATCHING

If score is 1–2 (Needs Support):

Watch a targeted skills clip (fractions, linear graphs). Copy the example and annotate each step with its purpose.

Outcome: Connects action to intent in procedures.

If score is 3 (Developing):

Watch a video using a representation (double-number line, bar model). Redraw it for a different but related problem.

Outcome: Transfers representations across contexts.

If score is 4–5 (Secure/Advanced):

Watch two methods for the same task. Create a decision rule: “Use Method A when ...; use Method B when ...” with a counter-example.

Outcome: Method selection grounded in structure.

RESEARCHING

If score is 1–2 (Needs Support):

Build a one-page revision card for a topic (percentages, angles, area). Include **rule**, **worked example**, **common mistake**.

Outcome: Curates accurate reference material.

If score is 3 (Developing):

Investigate a real-world use (unit pricing, speed/time graphs, probability in games). Write a short explanation and a worked example with realistic numbers.

Outcome: Links maths to decisions and contexts.

If score is 4–5 (Secure/Advanced):

Compare two authoritative explanations of the same concept. Decide which to trust more and why (clarity, generality, accuracy), then adapt the better one into your notes.

Outcome: Evaluates sources; refines personal knowledge base.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Host a 60-second “method recap” (goal, two key steps, one check).

Outcome: Speaks clearly about procedure and checking.

If score is 3 (Developing):

Run a 5-minute “problem of the week” discussion. Collect two strategies and record a one-paragraph summary.

Outcome: Facilitates comparison of strategies.

If score is 4–5 (Secure/Advanced):

Design a micro-lesson on a sticky misconception (e.g., negative $\times$ negative). Include an example, a non-example, and a reason.

Outcome: Leads targeted clarification with evidence.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Create a visual explainer poster (e.g., percent–decimal–fraction triangle; interior angles in polygons).

Outcome: Strengthens recall through representation.

If score is 3 (Developing):

Design a puzzle set (three questions) that all hinge on one idea (e.g., common factor; proportionality). Provide a solution path.

Outcome: Builds problem families and recognises structure.

If score is 4–5 (Secure/Advanced):

Make a data story: collect a small dataset, present two charts, and write a 120-word interpretation comparing mean/median or trend/outlier effects.

Outcome: Communicates data insight with justification.

Quick weekly routine (optional)

- **Mon:** Close-read a worked example + 3-line précis
- **Tue:** Sentence-precise solution write-up (PEEL)
- **Wed:** Video + representation transfer task
- **Thu:** Real-world mini-research + worked example
- **Fri:** Problem set or puzzle design + reflection

SCIENCE

Why super curriculum matters in Science

Supercurriculum activities in Science help pupils extend their curiosity, enquiry skills and understanding of the natural world. They encourage independent investigation, connect science to real-life issues, and prepare pupils for the rigour of GCSE Biology, Chemistry and Physics.

Supercurriculum Navigation Guide – Science

The Science Supercurriculum is an opportunity to explore how the natural world works, beyond what is covered in lessons. You are encouraged to follow your curiosity, investigate questions independently, and build the skills needed for thoughtful scientific enquiry. You do not need to complete everything at once — select the activities that interest you and take your time.

Each section below supports a different aspect of scientific thinking. Use the guidance to help you approach tasks confidently and reflect on your learning.

1. Reading

Purpose: To expand scientific knowledge and understanding across Biology, Chemistry and Physics.

How to use this section:

- Choose one article or page at a time.
- Read actively: highlight new vocabulary and write down questions that arise.
- After reading, summarise the key information in your own words.
- Ask yourself:
 - *What did I learn?*
 - *Why does this matter?*
 - *How does it link to something I already know?*

Tip: Keeping a glossary of new scientific terms can help your future revision.

2. Writing

Purpose: To improve clarity in scientific explanation and reporting.

How to approach writing tasks:

- When writing about a process, use clear sequence words: *first, next, then, finally*.
- When recording an investigation:
 - State your **hypothesis** clearly.
 - List your **method** step-by-step.
 - Present your **results** neatly (tables or labelled diagrams).
 - End with a **conclusion** that refers back to your hypothesis.
- When writing persuasively, use evidence and scientific reasoning to support your viewpoint.

Goal: To communicate scientific understanding accurately and confidently.

3. Listening

Purpose: To develop careful attention to explanations, facts and scientific reasoning.

How to use listening resources:

- Listen with a notebook and pause when needed.
- Note down:
 - Key ideas
 - Examples
 - Scientific terms you want to check later
- After listening, explain the main idea to someone else, or write a short summary.

This improves focus, retention and scientific communication.

4. Watching

Purpose: To see science in action, through demonstration, animation and real-world examples.

How to approach viewing:

- Pause videos to sketch diagrams or processes (e.g. digestion, states of matter, energy transfer).
- Try to explain what you have watched *without looking back* — this shows real understanding.
- Compare different explanations if possible to deepen your perspective.

This supports visual learning and conceptual clarity.

5. Researching

Purpose: To build independent enquiry skills and explore science in the wider world.

How to research effectively:

- Start with a clear question:
 - *How do renewable energy systems work?*
 - *What evidence supports climate change?*
 - *How do scientists design fair tests for medicines?*
- Gather information from reliable scientific sources.
- Summarise your findings in bullet points.
- Think about how this knowledge connects to everyday life or global issues.

This strengthens critical thinking and scientific awareness.

6. Student-Led Tasks

Purpose: To develop confidence explaining and applying scientific ideas.

How to approach these tasks:

- Choose one activity you feel ready to lead.
- Prepare your explanation or demonstration clearly and safely.
- When leading discussion or a quiz, encourage others to contribute ideas.
- Focus on communicating the *why* behind scientific processes, not just the *what*.

This builds confidence, teamwork and presentation skills.

7. Creative Tasks

Purpose: To explore and express scientific ideas in imaginative ways.

How to complete these tasks:

- Choose your format (model, poster, poem, infographic, short film).
- Identify the key scientific concept or process you want to convey.
- Ensure your creative work is **accurate** as well as expressive.

- Add labels, diagrams or explanations where appropriate.

This encourages curiosity, originality and deeper understanding.

How to Manage Your Time

- Aim to complete **1–2 Supercurriculum activities per week.**
- Choose a mix, such as:
 - One research or reading task
 - One creative or student-led task
- Keep all work in a dedicated **Science Supercurriculum journal or digital folder.**

How to Show Progress

- Record:
 - What you did
 - What you learned
 - Any questions that remain
- This portfolio can support:
 - School awards
 - House points
 - Future academic profiles

Reading

1. BBC Bitesize KS3 Science –
2. DK Find Out: Science topics –
3. NASA Climate Kids –
4. National Geographic Kids science section –
5. Royal Society of Chemistry Experiments and facts –

Writing

1. Keep a science investigation diary: hypothesis, method, results, conclusion.
2. Write a fact sheet on a famous scientist from BBC Bitesize –
3. Compose a persuasive piece on protecting biodiversity (Nat Geo Kids) –
4. Summarise a BBC Bitesize article in your own words –
5. Create a poster showing the stages of the rock cycle –

Listening

1. Brains On! science podcast –
2. Tumble science podcast for kids –
3. NASA's Curious Universe podcast –
4. Wow in the World (science episodes) –
5. BBC School Radio science clips –

Watching

1. BBC Bitesize KS3 Science video clips –
2. SciShow Kids –
3. National Geographic Kids science videos –
4. NASA Space Place videos –
5. TED-Ed science lessons –

Researching

1. Research an element of the periodic table (Royal Society of Chemistry) –
2. Investigate current climate change evidence (NASA Climate Kids) –
3. Explore the latest space discoveries (NASA News) –

4. Research renewable energy (National Grid) –
5. Investigate how scientists test medicines (Wellcome Trust) –

Student-led Tasks

1. Lead a demonstration of a safe science experiment at home or school.
2. Run a short quiz on a recent science topic studied in class.
3. Present on a scientific issue in the news (e.g. space exploration, climate).
4. Organise a class debate on a scientific question (e.g. nuclear vs renewable energy).
5. Teach a peer a key concept (e.g. photosynthesis, particle model).

Creative Tasks

1. Build a model of an atom or molecule using everyday objects.
2. Create a comic strip to explain digestion or respiration.
3. Write a poem about a scientific phenomenon (e.g. gravity, electricity).
4. Design an infographic about the water cycle.
5. Produce a short video explaining an experiment or scientific law.

FEEDBACK TEST

“Think like a scientist: enquire, explain, evaluate”

Instructions: Rate each statement 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree. Answer the reflection at the end of each section.

A. Reading

1. I can explain the main idea of a science text in my own words.
2. I spot cause → effect links and key variables.
3. I understand graphs/diagrams that support the text.
4. I learn and use topic vocabulary accurately.

Reflection: Which science article or page challenged you recently, and what helped?

B. Writing

1. I write clear methods with variables and safety considered.
2. I present results neatly (tables, units, significant figures).
3. I explain results using scientific reasoning, not just description.
4. I can evaluate limitations and suggest improvements.

Reflection: Which part of scientific writing needs most attention (methods, data, analysis, evaluation)?

C. Listening

1. I follow explanations and demonstrations and can restate the key steps.
2. I pick out the hypothesis and the purpose of each stage.
3. I recognise misconceptions and how they are corrected.
4. I can summarise a talk’s main claim and evidence.

Reflection: Which talk, demo, or podcast improved your understanding?

D. Watching

1. I track processes in videos (what happens first/next/last).
2. I can identify variables and controls shown.
3. I notice how models/animations explain invisible ideas.
4. I can judge if the evidence presented is convincing.

Reflection: Which video best clarified a tricky concept?

E. Researching

1. I can find reliable sources and record them.
2. I take concise notes with headings and diagrams.
3. I can compare two explanations and say which is clearer and why.
4. I link research to real-world examples or current issues.

Reflection: What science question would you like to investigate next?

F. Student-Led Tasks

1. I can lead a short explanation, demo, or data share.
2. I ask probing questions and keep the group on task.
3. I give kind, specific feedback using correct terms.
4. I summarise what our group learned.

Reflection: When did you help a group reach a better scientific explanation?

G. Creative Tasks

1. I design models/infographics that make complex ideas simple.
2. I create fair-test plans or simulations to answer questions.
3. I communicate science clearly to a younger audience.
4. I revise work after feedback to improve accuracy and clarity.

Reflection: Which creative piece best shows your scientific thinking?

Final Reflection

Choose one focus (graph skills, variables & control, equation fluency, evaluation language, science vocabulary). What two actions will you take each week to improve?

INTERVENTION FRAMEWORK

(Apply the level matching the average score in each section.)

READING

If score is 1–2 (Needs Support):

Read a one-page text weekly. Write three sentences: **Main idea**, **Cause → effect**, **One new term with your sentence**. Sketch one diagram from the text and label it.

Outcome: Secure gist, causal links, and vocabulary with visuals.

If score is 3 (Developing):

Read a short article with a graph. In 120 words, explain **what the graph shows**, a **pattern/trend**, and **one inference** the author makes.

Outcome: Integrates text–graph information and draws justified inferences.

If score is 4–5 (Secure/Advanced):

Read two brief sources on the same topic (e.g., climate, vaccination, energy). Write a comparison: **agreement**, **difference in evidence**, **your reasoned judgement**.

Outcome: Evaluates sources and evidence quality.

WRITING

If score is 1–2 (Needs Support):

Plan a mini-investigation using the frame **Question → Hypothesis → Variables (independent/dependent/controls) → Method (numbered) → Safety**.

Outcome: Correct investigation structure and variable control.

If score is 3 (Developing):

Complete an analysis paragraph using **Data → Pattern → Scientific reason**.

Include units and one sentence on reliability (range/replicates).

Outcome: Explains results with reasoning and basic evaluation.

If score is 4–5 (Secure/Advanced):

Write an evaluation: **Limitations (at least two) → Impact on results → Specific improvement(s)**. Add one line linking to real-world application.

Outcome: Critiques method and connects to application.

LISTENING

If score is 1–2 (Needs Support):

After a 5-minute explanation, note **three key steps** and **one purpose**. Retell in 4–5 sentences.

Outcome: Retains procedural knowledge and purpose.

If score is 3 (Developing):

During a demo, identify **variables** and **fair-test features**. Write one prediction and check it against the outcome.

Outcome: Applies variable thinking; tests predictions.

If score is 4–5 (Secure/Advanced):

Listen to a short talk and create a **Claim–Evidence–Reasoning (CER)** summary.

Outcome: Structures scientific argument from spoken content.

WATCHING

If score is 1–2 (Needs Support):

Watch a process clip (e.g., distillation, photosynthesis). Write “First–Next–Then–Finally” and one sentence on **why** each step happens.

Outcome: Accurate sequence with causal purpose.

If score is 3 (Developing):

Watch an animation/model. Identify **what the model shows well** and **one limitation**.

Outcome: Uses and critiques models appropriately.

If score is 4–5 (Secure/Advanced):

Watch a short investigation video and evaluate **validity**: controls, sample size, measurement precision, and conclusion strength.

Outcome: Judges methodological quality and inference strength.

RESEARCHING

If score is 1–2 (Needs Support):

Create a fact card on a scientist/concept: **3 facts, key term defined, why it matters.**

Outcome: Records reliable basics and significance.

If score is 3 (Developing):

Research a technology (e.g., batteries, solar cells, antibiotics). Write a paragraph on **how it works, benefit, risk.**

Outcome: Links science to technology with balanced view.

If score is 4–5 (Secure/Advanced):

Compare two sources with different viewpoints. Note **one agreement, one conflict, and which evidence is stronger and why.**

Outcome: Critical comparison and justified conclusion.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 60-second “fact of the week” including source and relevance.

Outcome: Builds confidence and source awareness.

If score is 3 (Developing):

Teach a mini-concept (e.g., diffusion) using a labelled diagram and one check question.

Outcome: Explains clearly and checks understanding.

If score is 4–5 (Secure/Advanced):

Run a 5-minute micro-debate (e.g., “Should we ban single-use plastics?”) with two points for/against and a balanced summary.

Outcome: Leads structured, evidence-based discussion.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Create a storyboard/comic explaining a process (respiration, rock cycle) with arrows and brief captions.

Outcome: Communicates sequence and key vocabulary.

If score is 3 (Developing):

Build a simple model (e.g., lever/gear, particle model). Write two sentences on **what it shows** and **one limitation**.

Outcome: Uses models to clarify thinking and recognises limits.

If score is 4–5 (Secure/Advanced):

Design an infographic or 60–90 second explainer for younger pupils including **one misconception to correct** and **one real example**.

Outcome: Communicates complex ideas clearly and anticipates misconceptions.

Optional weekly routine (quick guide)

- **Mon:** One-page science read + 3-sentence response
- **Tue:** Method/variables plan + mini-analysis
- **Wed:** Video + model/validity critique
- **Thu:** Research card or tech case study
- **Fri:** Creative communication + reflection

HISTORY

Why super curriculum matters in History

Supercurriculum activities in History allow pupils to investigate the past in more depth, developing enquiry, analysis and debate skills. They learn to question evidence, understand cause and consequence, and connect historical events to today's world.

Supercurriculum Navigation Guide – History

The History Supercurriculum encourages you to investigate the past beyond the classroom. It helps you develop strong enquiry skills, learn to analyse evidence, form balanced arguments, and understand how historical events shape the world we live in today. You are not expected to complete everything at once — choose activities that spark your curiosity.

Each section below supports a different historical skill. Use this guide to help you approach the tasks thoughtfully and independently.

1. Reading

Purpose: To deepen understanding of different time periods and perspectives.

How to use this section:

- Select one article, biography, or object story at a time.
- Read actively: note key dates, causes, consequences, and interesting viewpoints.
- After reading, summarise the main idea in a few sentences.
- Ask yourself:
 - *Whose perspective is being presented?*
 - *What is the evidence?*
 - *How does this connect to what I already know?*

Tip: Keep a timeline or map to help you link events and places.

2. Writing

Purpose: To practise explaining historical ideas clearly and thoughtfully.

How to approach writing tasks:

- When writing as a historical character (e.g., diary entry), think about:
 - Social conditions
 - Emotions
 - Daily life and challenges
- When writing essays or comparisons:
 - State your argument clearly.
 - Support your points with evidence (dates, examples, quotations).
 - Explain *why* events happened, not just *what* happened.

Goal: To build convincing historical explanations.

3. Listening

Purpose: To strengthen understanding through storytelling and oral explanation.

How to use listening resources:

- Listen with a notebook beside you.
- Note:
 - Key events
 - Important figures
 - Causes and consequences
- After listening, try to retell the story to someone else or write a short summary.

This builds memory, comprehension and historical vocabulary.

4. Watching

Purpose: To visualise history and understand how people lived in different times.

How to approach viewing:

- Pause to note important details — clothing, technology, social structures.
- Compare how different sources present the same event.
- Consider:
 - *What is fact?*
 - *What is interpretation or dramatization?*

This develops historical awareness and critical thinking.

5. Researching

Purpose: To investigate the past using reliable sources and evidence.

How to research effectively:

- Start with a clear historical question, such as:
 - *What caused the English Civil War?*
 - *How did the Industrial Revolution change everyday life?*
- Collect evidence from multiple sources.
- Organise your findings into:
 - Causes
 - Consequences
 - Significance (why it matters)

This builds enquiry skills needed for GCSE and beyond.

6. Student-Led Tasks

Purpose: To practise discussing, teaching and debating historical ideas.

How to approach these tasks:

- Choose an event, theme or figure you understand well.
- Prepare talking points or a short visual aid (timeline, map, or slide).
- Encourage others to contribute ideas or alternative viewpoints.
- Focus on reasoning, not just recalling facts.

This strengthens communication, leadership and analysis.

7. Creative Tasks

Purpose: To bring historical understanding to life in imaginative ways.

How to complete these tasks:

- Start by researching the context carefully so your work is historically accurate.
- Whether you choose to create a poster, scene, poem or model, think about:
 - Setting
 - Character voice or perspective

- Historical details (clothing, tools, buildings, language)

This helps deepen empathy and understanding of life in the past.

How to Manage Your Time

- Aim to complete **1–2 Supercurriculum activities per week.**
- Choose a mix (e.g., one research task + one creative or writing task).
- Keep all work together in a **History Supercurriculum folder** or notebook.

How to Show Progress

- Keep a record of:
 - What you worked on
 - What you learned
 - Any questions or ideas that emerged
- This can support:
 - House points
 - School awards
 - Academic profile building

Reading

1. BBC Bitesize KS3 History –
2. British Museum Young Explorers –
3. Spartacus Educational –
4. Kiddle: Industrial Revolution overview –
5. National Geographic Kids: History and civilisations –

Writing

1. Write a diary entry from the perspective of a factory worker during the Industrial Revolution.

2. Create a fact file on a monarch or leader using BBC Bitesize – <https://www.bbc.co.uk/bitesize/subjects/zk26n39>
3. Draft a newspaper article reporting on the abolition of the slave trade.
4. Write an essay comparing life before and after the Industrial Revolution.
5. Summarise a British Museum object story in your own words – <https://www.britishmuseum.org/learn/young-explorers>

Listening

1. History Storytime podcast –
2. Bedtime History podcast –
3. The Past and The Curious podcast –
4. BBC Radio 4 “You’re Dead To Me” (age-appropriate episodes) –
5. BBC School Radio history resources –

Watching

1. BBC Bitesize KS3 History video lessons –
2. Horrible Histories (BBC) –
3. National Geographic Kids history videos –
4. Timeline World History Documentaries –
5. TED-Ed history lessons –

Researching

1. Research the causes and effects of the English Civil War –
2. Investigate the abolition of slavery (National Archives) –

3. Explore historical maps at the National Library of Scotland –
4. Research the impact of the Industrial Revolution –
5. Investigate artefacts in the British Museum Collection –

Student-led Tasks

1. Lead a class discussion on whether one historical event changed history more than another.
2. Organise a quiz on key dates and events in the 18th and 19th centuries.
3. Present a timeline of inventions during the Industrial Revolution.
4. Role-play a debate between two historical figures.
5. Teach a peer about a significant reformer (e.g. William Wilberforce).

Creative Tasks

1. Design a propaganda poster for or against a historical event.
2. Write and perform a short play set in the Victorian era.
3. Build a model of a historical invention (e.g. steam engine).
4. Create a storyboard of a famous battle.
5. Compose a ballad or poem about a key historical moment.

FEEDBACK TEST

“Know more. Remember more. Explain better.”

Instructions: Rate each statement: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree. Answer the reflection at the end of each strand.

A. Reading

1. I can follow longer historical articles or chapters.
2. I identify causes, consequences, and turning points.
3. I track change and continuity across a period.
4. I can summarise a passage using precise historical vocabulary.

Reflection: Which reading stretched you most recently, and why?

B. Writing

1. I plan paragraphs that answer the question directly.
2. I use evidence (facts/quotations) and explain significance.
3. I use connectives to organise arguments (however, therefore, meanwhile).
4. I finish with a reasoned, balanced conclusion.

Reflection: Which part of extended writing needs most attention?

C. Listening

1. I follow talks/debates and note key claims and evidence.
2. I can explain how a speaker supports their view.
3. I recognise bias or assumption in a spoken argument.
4. I can respond with my own reasoned point.

Reflection: Which podcast, clip, or talk sharpened your thinking?

D. Watching

1. I can separate fact from dramatisation in documentaries/dramas.
2. I notice how visuals and narration shape an interpretation.
3. I link what I see to dates, places, and themes we study.

4. I can critique historical accuracy and balance.

Reflection: Which video changed how you think about a past event?

E. Researching

1. I can find reliable sources and reference them.
2. I take concise notes under clear headings (causes, impacts, perspectives).
3. I compare two sources and explain differences in viewpoint.
4. I can use research to refine my argument.

Reflection: What question would you like to investigate next?

F. Student-Led Tasks

1. I can lead a short discussion using open questions.
2. I summarise the group's ideas and evidence accurately.
3. I give kind, specific feedback on arguments.
4. I help the group reach a fair conclusion.

Reflection: When did you help your group understand an issue better?

G. Creative Tasks

1. I enjoy presenting history through timelines, role-play, maps, or podcasts.
2. I keep creative work accurate while making it engaging.
3. I use period terms and context confidently.
4. I revise work after feedback to improve clarity and accuracy.

Reflection: Which creative piece best shows your historical understanding?

Final Reflection

Choose one focus for this term (cause/consequence, change/continuity, significance, source analysis, interpretations). What two weekly actions will you take to improve?

INTERVENTION FRAMEWORK

(Apply the level matching the average score in each strand.)

READING

If score is 1–2 (Needs Support):

Read a two-page narrative weekly. Write three sentences: **What happened, Why it mattered (one consequence), One new word with your own sentence.**

Outcome: Secure gist, basic consequence, accurate vocabulary.

If score is 3 (Developing):

Read a short analytic piece. Produce a 120-word **cause–consequence** summary with one short quotation or statistic.

Outcome: Connects events to outcomes with specific evidence.

If score is 4–5 (Secure/Advanced):

Read two brief interpretations of the same event. Write a comparison: **point of agreement, key difference, which is better supported and why.**

Outcome: Evaluates interpretations with justified judgement.

WRITING

If score is 1–2 (Needs Support):

Build one PEEL paragraph weekly: **Point → Evidence (fact/quote) → Explain significance → Link to question.**

Outcome: Clear structure; direct relevance to the question.

If score is 3 (Developing):

Write a mini-essay (120–150 words) using **Because/However/Therefore** to organise argument and balance.

Outcome: Balanced reasoning with connective control.

If score is 4–5 (Secure/Advanced):

Write an argument with **line of reasoning**: prioritise causes or weigh significance; include a counterpoint and a decisive conclusion.

Outcome: Sustained analytical voice and prioritisation.

LISTENING

If score is 1–2 (Needs Support):

After a 5–8 minute talk, note **three facts** and **one claim**; summarise in two sentences.

Outcome: Distinguishes information from argument.

If score is 3 (Developing):

Keep a **Claim–Evidence–Reasoning** grid during a debate clip. Add one question to test each claim.

Outcome: Tracks arguments and probes validity.

If score is 4–5 (Secure/Advanced):

Write a 120-word critique on a spoken interpretation: **tone, selection of evidence, what's missing**.

Outcome: Evaluates bias and completeness.

WATCHING

If score is 1–2 (Needs Support):

Watch a short documentary segment. Record **Who/Where/When** and one **turning point**.

Outcome: Anchors viewing in time/place with key change identified.

If score is 3 (Developing):

Identify two techniques (archive footage, expert testimony, reenactment). Explain how each shapes audience understanding.

Outcome: Connects film technique to interpretation.

If score is 4–5 (Secure/Advanced):

Compare a dramatised scene with a textbook account. Write what is **added/omitted/emphasised** and the effect on **theme or character**.

Outcome: Analytical evaluation of accuracy and emphasis.

RESEARCHING

If score is 1–2 (Needs Support):

Create a fact card for a topic/person: **3 facts, timeline (3 dates), why significant**; note your source.

Outcome: Reliable basics with significance stated.

If score is 3 (Developing):

Research a theme (e.g., empire/trade/public health). Write a paragraph linking **place, period, and impact on everyday life**.

Outcome: Connects context to lived experience.

If score is 4–5 (Secure/Advanced):

Compare two sources with different viewpoints (e.g., contemporary vs modern historian). Judge **reliability** (origin, purpose, content) and say which you would trust for a specific question.

Outcome: Source evaluation tailored to enquiry.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 60-second “event snapshot”: what happened, who was involved, why it matters.

Outcome: Builds concise historical explanation.

If score is 3 (Developing):

Chair a 5-minute discussion with two open questions and a one-sentence group conclusion.

Outcome: Guides talk and synthesises views.

If score is 4–5 (Secure/Advanced):

Run a mini-debate on **significance** or **responsibility**. Require one piece of evidence per speaker; write a neutral closing summary.

Outcome: Leads structured, evidence-based argument.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Create a six-frame storyboard of a key event with captions using correct period terms.

Outcome: Accurate sequence and vocabulary.

If score is 3 (Developing):

Design a thematic timeline (e.g., medicine, monarchy, migration) showing change/continuity with two short explanations.

Outcome: Explains patterns across time.

If score is 4–5 (Secure/Advanced):

Write a 150-word monologue from a historical perspective plus a five-sentence historian's note explaining choices and sources.

Outcome: Empathy with explicit sourcing and reflection.

Optional weekly routine (quick guide)

- **Mon:** Two-page read + 3-sentence causal summary
- **Tue:** One PEEL paragraph on a focus question
- **Wed:** Debate clip + Claim–Evidence–Reasoning notes
- **Thu:** Research card (facts → significance)
- **Fri:** Creative response (timeline/storyboard/monologue) + micro-edit

GEOGRAPHY

Why super curriculum matters in Geography

Supercurriculum activities in Geography help pupils understand people, places and environments more deeply. They encourage critical thinking about global challenges such as climate change, development and sustainability, while developing map, research and enquiry skills.

Supercurriculum Navigation Guide – Geography

The Geography Supercurriculum helps you explore how people, places and environments interact. It encourages you to think critically about global challenges such as climate change, development, migration and sustainability. You are not expected to complete all activities at once — choose the ones that interest you and build your understanding step by step.

Each section below supports a different geographical skill. Use this guide to help you approach tasks confidently and reflect on your learning.

1. Reading

Purpose: To deepen understanding of geographical processes, cultures and global issues.

How to use this section:

- Choose one resource or topic at a time.
- Read actively: highlight key terms (e.g. *urbanisation*, *erosion*, *biome*) and note questions that arise.
- After reading, summarise the main ideas in your own words.
- Ask yourself:
 - *What is happening?*
 - *Why is it happening?*
 - *Who is affected and how?*

Tip: Keeping a glossary of geographical terms supports future case study work.

2. Writing

Purpose: To practise explaining geographical concepts clearly and using evidence.

How to approach writing tasks:

- For case studies:
 - Include *location, key facts, causes, effects* and *responses*.
- For persuasive writing:
 - Use facts and reasoning to support your point of view.
- When comparing places:
 - Focus on similarities and differences in physical and human geography.

Goal: To communicate geographical understanding accurately and thoughtfully.

3. Listening

Purpose: To build awareness of how science, environment and geography are discussed in real contexts.

How to use listening resources:

- Listen with a notebook to record:
 - Key ideas
 - Examples
 - New vocabulary
- After listening, explain the main point aloud or in a short summary.

This strengthens comprehension, memory and environmental awareness.

4. Watching

Purpose: To visualise landscapes, climate patterns, and people's responses to change.

How to approach viewing:

- Pause to note features such as:
 - Landforms

- Weather patterns
 - Human settlement
- Consider how physical geography influences human decisions, and vice versa.
- If watching animations or models, try sketching what you see.

This supports interpretation and map/diagram skills.

5. Researching

Purpose: To investigate real-world issues and develop enquiry skills.

How to research effectively:

- Start with a focused question such as:
 - *What causes earthquakes and how are communities affected?*
 - *How can renewable energy help reduce climate change?*
- Use reliable sources (NASA, USGS, National Grid, UNHCR, WWF).
- Organise your findings into:
 - Causes
 - Effects
 - Responses
 - Future challenges

This develops critical evaluation and case study confidence.

6. Student-Led Tasks

Purpose: To build confidence sharing geographical knowledge and leading enquiry.

How to approach these tasks:

- Choose a topic you understand or want to explore further.
- Prepare:
 - A short explanation
 - A map, diagram or visual to support your talk
- Encourage others to discuss, question and contribute ideas.

This builds leadership, communication and collaborative thinking.

7. Creative Tasks

Purpose: To express geographical knowledge through design, modelling and visual representation.

How to complete these tasks:

- Begin by researching the concept (e.g. volcano structure, weather system).
- Plan your design before creating it.
- Include **labels, diagrams** and **key terms** to show accuracy.
- Think about how humans interact with the environment represented.

This nurtures spatial awareness, creativity and geographical understanding.

How to Manage Your Time

- Aim to complete **1–2 Supercurriculum activities per week.**
- Choose a mix (e.g. one research task + one creative or map-based task).
- Keep all work in a **Geography Supercurriculum notebook or digital portfolio.**

How to Show Progress

- Record:
 - Activities completed
 - New knowledge gained
 - Questions you want to explore further
- Your portfolio can be used for:
 - House points and certificates
 - Student leadership profiles
 - Future academic opportunities

Reading

1. BBC Bitesize KS3 Geography –
2. National Geographic Kids: Geography and cultures –
3. Kiddle: Globalisation explained –

4. DK Find Out: Volcanoes and earthquakes –
5. NASA Climate Kids –

Writing

1. Write a fact file on a city affected by rapid urbanisation.
2. Keep a climate diary with daily observations linked to NASA Climate Kids –
3. Draft a persuasive essay on why recycling is important.
4. Compare life in two contrasting countries (BBC Bitesize support) –
5. Write a travel article about a famous landmark or biome.

Listening

1. Brains On! earth science episodes –
2. Tumble science podcast (geography themes) –
3. BBC Earth Kids soundscapes –
4. Map Men podcast (humorous but factual) –
5. Wow in the World podcast: environment episodes –

Watching

1. BBC Bitesize KS3 Geography video clips –
2. National Geographic Kids YouTube channel –
3. NASA Climate Kids animations –
4. DK Find Out videos on natural disasters –
5. BBC Earth Kids short films –

Researching

1. Investigate the causes of an earthquake or volcanic eruption (USGS) –
2. Research renewable energy and sustainability (National Grid) –
3. Use Ordnance Survey Mapzone to practise map skills –
4. Explore migration and refugees (UNHCR resources) –
5. Research endangered ecosystems (WWF) –

Student-led Tasks

1. Lead a short debate on the impact of climate change.
2. Organise a quiz on world capitals and rivers.
3. Present a case study of a natural hazard to the class.
4. Run a group mapping exercise using OS Mapzone – <https://www.ordnancesurvey.co.uk/mapzone/>
5. Lead a role-play discussion about how countries respond to natural disasters.

Creative Tasks

1. Create a detailed map of an imaginary country with human and physical features.
2. Build a 3D model of a volcano or earthquake zone.
3. Write and perform a weather forecast using real data.
4. Design an infographic about plastic pollution.
5. Make a poster advertising eco-friendly behaviour in school.

FEEDBACK TEST

“Explain places, processes and patterns”

Instructions: Rate each statement: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree. Answer the reflection at the end of each strand.

A. Reading

1. I can summarise longer geographical texts with key terms.
2. I identify causes, effects and feedback loops in physical/human systems.
3. I can extract meaning from maps, graphs and photos alongside text.
4. I can compare two accounts of the same place or issue.

Reflection: Which article or case study stretched you recently, and why?

B. Writing

1. I organise explanations logically (process → impact → response).
2. I use accurate geographical vocabulary and place-specific detail.
3. I include evidence (data, examples, map references).
4. I conclude with a balanced judgement.

Reflection: Which part of extended writing needs most attention?

C. Listening

1. I follow explanations of processes and take clear notes.
2. I can retell a sequence (e.g., river or coastal process) accurately.
3. I spot opinions vs evidence in spoken content.
4. I respond with a reasoned point of my own.

Reflection: Which talk, podcast or discussion improved your understanding?

D. Watching

1. I can track a hazard/event across time and space in a video.
2. I identify evidence (maps, data, testimonies) and how it supports claims.
3. I notice how visuals shape interpretation of a place.
4. I evaluate clarity, balance and missing perspectives.

Reflection: Which video changed how you think about a place or issue?

E. Researching

1. I find reliable sources and record them properly.
2. I take concise notes with headings (causes, impacts, stakeholders).
3. I compare sources and explain differences in viewpoint.
4. I use research to refine an argument or case study.

Reflection: What question would you like to investigate next?

F. Student-Led Tasks

1. I can lead a short briefing or discussion using maps or images.
2. I summarise group ideas with evidence and next steps.
3. I give kind, specific feedback on explanation and accuracy.
4. I help the group reach a fair conclusion.

Reflection: When did you help your group understand a place or process better?

G. Creative Tasks

1. I enjoy turning data into effective visuals (infographics, sketch maps).
2. I design models/role-plays that show stakeholder viewpoints.
3. I communicate complex ideas for a younger audience.
4. I revise work after feedback to improve clarity and accuracy.

Reflection: Which creative piece best shows your geographical understanding?

Final Reflection

Choose a focus for this term (map/graph skills, process chains, case-study depth, data critique, decision-making). What two weekly actions will you take to improve?

INTERVENTION FRAMEWORK

(Apply the level matching the average score in each strand.)

READING

If score is 1–2 (Needs Support):

Read a one-page case study weekly. Write three sentences: **Where?** (locate with region/continent), **What happened/what is the issue?**, **One cause and one effect.** Add a three-word glossary.

Outcome: Secure gist, location and simple causal links.

If score is 3 (Developing):

Read a short article with a map or graph. In ~120 words, explain **what the data shows, a pattern/trend, and a reason** linked to physical or human factors.

Outcome: Integrates text–data meaningfully.

If score is 4–5 (Secure/Advanced):

Read two short sources on the same issue (e.g., deforestation, urban growth).

Compare **agreement, difference in evidence or emphasis**, and give a **reasoned judgement.**

Outcome: Evaluates perspectives with evidence.

WRITING

If score is 1–2 (Needs Support):

Write a PEEL paragraph weekly on a process (weathering, river erosion, plate boundaries): **Point** → **Evidence/example** → **Explain process** → **Link to impact.**

Outcome: Clear explanation using correct key terms.

If score is 3 (Developing):

Write a 150-word response on a case study using **Cause → Impact (social/economic/environmental) → Short-term response → Long-term response**. Include one figure or named place detail.

Outcome: Structured, evidenced case-study writing.

If score is 4–5 (Secure/Advanced):

Write a balanced judgement (150–180 words) on a decision (e.g., flood defences, energy choice). Present **two perspectives, criteria** (cost, environment, equity), and **justified conclusion**.

Outcome: Decision-making language with criteria-led evaluation.

LISTENING

If score is 1–2 (Needs Support):

After a 5–8 minute explanation, note **three key steps** in the process and **one key term**. Retell in four sentences.

Outcome: Retains sequence and vocabulary.

If score is 3 (Developing):

During a talk on a place/issue, complete a **Claim–Evidence–Reasoning** grid and write one clarifying question.

Outcome: Tracks arguments and probes understanding.

If score is 4–5 (Secure/Advanced):

Listen to a short debate/briefing. Produce a 120-word critique of **evidence quality, bias, and what extra data** would improve the case.

Outcome: Evaluates spoken arguments critically.

WATCHING

If score is 1–2 (Needs Support):

Watch a process clip (river/volcano/weather system). Write “First–Next–Then–Finally” and one sentence on **why** each stage happens.

Outcome: Accurate sequence with causal purpose.

If score is 3 (Developing):

Watch a hazard or development case-study video. Identify **two impacts** and **one response**, and link each to a stakeholder (residents, government, NGO).

Outcome: Connects impacts to people and actions.

If score is 4–5 (Secure/Advanced):

Watch a documentary segment and evaluate **balance**: which voices are included/excluded? Suggest **one improvement** (map scale, counter-evidence, local voice).

Outcome: Critiques representation and fairness.

RESEARCHING

If score is 1–2 (Needs Support):

Create a fact card for a country or hazard: **location, three facts, one map reference**. Record the source.

Outcome: Reliable basics with spatial awareness.

If score is 3 (Developing):

Research a theme (renewables, urban transport, tourism). Write **how it works, one benefit, one challenge, and a named example**.

Outcome: Links concepts to real contexts.

If score is 4–5 (Secure/Advanced):

Compare two datasets/maps (e.g., population density vs GDP; quake distribution vs plate boundaries). Write three sentences on **similarities, differences, implications**.

Outcome: Analytical use of comparative data.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Deliver a 60-second place briefing: **Where, one key fact, why it matters**.

Outcome: Builds concise geographical communication.

If score is 3 (Developing):

Lead a 5-minute group activity using one map or image. Ask two questions and end with a one-sentence summary.

Outcome: Guides enquiry and draws conclusions.

If score is 4–5 (Secure/Advanced):

Chair a short decision-making exercise (e.g., site for a new wind farm). Set criteria, gather views, and present a brief, justified outcome.

Outcome: Facilitates criteria-based decisions.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Draw a labelled sketch map of a region showing **physical** and **human** features; add a simple key.

Outcome: Strengthens spatial thinking and vocabulary.

If score is 3 (Developing):

Create an infographic comparing two biomes or two cities (climate, population, economy). Include one chart and a 2-sentence interpretation.

Outcome: Communicates comparisons with data.

If score is 4–5 (Secure/Advanced):

Produce a 60–90 second “news explainer” or brochure on a world issue (drought, migration corridor, coastal erosion) with **one statistic**, **one map**, and **a realistic response**.

Outcome: Synthesises evidence into clear public communication.

Optional weekly routine (quick guide)

- **Mon:** One-page read + 3-sentence causal summary
- **Tue:** PEEL explanation paragraph on a process
- **Wed:** Video case study + stakeholder impact notes
- **Thu:** Data/map comparison + short interpretation
- **Fri:** Creative communication + reflection

Would you like me to continue with **Year 8 Modern Foreign Languages** next (e.g., Spanish/Greek/ESL), or move on to **Year 8 Art & Design**?

Είπες:

ART & DESIGN

To ChatGPT είπες:

Brilliant — here's the **Year 8 Art & Design Supercurriculum package** in clean, continuous UK English.

It mirrors your other subjects: **Why it matters** → **Feedback Test** → **Score-Aligned Interventions** (use the learner's average per strand: **1-2 = Needs Support**, **3 = Developing**, **4-5 = Secure/Advanced**). No tables; ready for Word or Forms.

ART & DESIGN

Why super curriculum matters in Art & Design

Supercurriculum activities in Art & Design help pupils expand their creativity, technical skill and critical thinking. They provide opportunities to experiment with materials, explore artistic movements, and reflect on how art influences culture and society.

Supercurriculum Navigation Guide – Art & Design

The Art & Design Supercurriculum encourages you to explore your creativity, develop technical skills, and think about how art shapes culture and society. You are not expected to complete every activity — instead, choose those that inspire you and allow your artistic style to grow over time.

Each section below focuses on a different way of developing your artistry, curiosity and confidence.

1. Reading

Purpose: To explore artists, movements and visual culture more deeply.

How to use this section:

- Choose one artist, artwork or movement at a time.
- Look carefully at images — note colour, shape, pattern, detail and composition.
- After exploring, write a short reflection:

- *What do I notice first?*
- *How does this artwork make me feel?*
- *What techniques does the artist use?*

Tip: Keep a visual journal where you record and sketch what interests you.

2. Writing

Purpose: To develop thoughtful reflection and clear communication about art.

How to approach writing tasks:

- When writing about your own work, describe:
 - What you were trying to achieve
 - The materials and techniques you used
 - What you might try differently next time
- When writing about an artist or artwork:
 - Include background information, style, influences and themes.
 - Explain how the artwork communicates ideas or emotions.

Goal: To become confident discussing art with insight and clarity.

3. Listening

Purpose: To learn from artists, curators and storytellers who explore the meaning and history of art.

How to use listening resources:

- Listen with your sketchbook open — doodle or note shapes and ideas that come to mind.
- Write down the names of artists, artworks or movements mentioned.
- Afterwards, choose one thing to research further or sketch.

This builds cultural awareness and artistic vocabulary.

4. Watching

Purpose: To learn new techniques and see how artists work in practice.

How to approach viewing:

- Pause tutorials to practise steps slowly.
- Focus on observation — how does the artist use:
 - Lines?
 - Light and shade?
 - Colour blending?
 - Composition?
- Try each technique at least twice — improvement comes with repetition.

This supports technical skill and creative confidence.

5. Researching

Purpose: To explore the wider world of art and understand how styles develop over time.

How to research effectively:

- Begin with a clear question such as:
 - *What inspired this artist?*
 - *How did this art movement begin?*
 - *How does culture influence artistic style?*
- Collect visual examples and note similarities or changes.
- Present your findings in a sketchbook page or digital mood board.

This builds curiosity, context and personal artistic identity.

6. Student-Led Tasks

Purpose: To learn by teaching and sharing your artistic thinking.

How to approach these tasks:

- Choose a technique you feel comfortable with (e.g., shading, charcoal blending, perspective).
- Demonstrate step-by-step and explain why each step matters.
- Encourage others to try, experiment and make their own creative choices.
- Feedback should be positive, precise and thoughtful.

This develops confidence, collaboration and community.

7. Creative Tasks

Purpose: To explore your imagination and express ideas visually.

How to complete these tasks:

- Begin with a theme or emotion.
- Sketch rough ideas before choosing one to develop.
- Experiment with materials — pencil, collage, paint, digital tools.
- Reflect on the choices you made and how they support your message.

This nurtures originality, curiosity and creative problem-solving.

How to Manage Your Time

- Aim to complete **1–2 Supercurriculum activities each week.**
- Mix research or reflection tasks with practical artwork.
- Keep your work in a **sketchbook, portfolio, or digital gallery.**

How to Show Progress

- Record:
 - What you created
 - What inspired it
 - What skills you practised
 - What you might explore next
- This portfolio can support:
 - House points
 - Art awards or exhibitions
 - Future GCSE or Art Scholarship portfolios

Reading

1. Tate Kids: Artists and artworks –
2. National Gallery online resources –
3. The Art Story: Art movements –

4. Canva colour theory guide –
5. Met Museum: Art history resources –

Writing

1. Keep a sketchbook diary with weekly reflections on your own work.
2. Write a biography of an artist you admire using Tate Kids –
3. Draft a critical review of a National Gallery artwork –
4. Write instructions for creating a step-by-step drawing tutorial.
5. Compose a creative story inspired by a famous painting.

Listening

1. Art Detective podcast –
2. The Lonely Palette podcast (art history stories) –
3. Kids Ask Authors (illustrators' episodes) –
4. National Gallery audio tours –
5. ArtCurious podcast –

Watching

1. Tate Kids “Make” tutorials –
2. BBC Bitesize KS3 Art & Design –
3. National Gallery video lessons –

4. MoMA Learning resources –
5. Art for Kids Hub (YouTube drawing channel) –

Researching

1. Research a famous art movement on The Art Story –
2. Investigate the history of a painting from the National Gallery –
3. Explore the science of colour using Canva's colour wheel –
4. Research non-European art traditions at the Met Museum –
5. Compare two artists' approaches to the same subject.

Student-led Tasks

1. Lead a peer mini-workshop on shading or perspective.
2. Organise a small exhibition of your classmates' artwork.
3. Present on how an artist's style influenced others.
4. Run a peer-critique session on sketches.
5. Lead a group mural or collaborative project.

Creative Tasks

1. Create a collage inspired by current events.
2. Design a new cover for a favourite novel.
3. Produce a self-portrait in the style of a chosen artist.
4. Experiment with digital art tools like Sketchpad –
<https://sketch.io/sketchpad/>
5. Make a short stop-motion animation using drawings or clay.

Why Supercurriculum Matters in Year 8 Art & Design

Year 8 is the step from “trying materials” to **making deliberate visual choices**. Supercurriculum tasks strengthen observational accuracy, design thinking, and reflective practice. Pupils learn how artists solve problems, how composition and colour theory guide attention, and how process journals turn experiments into purposeful outcomes. They build a confident visual vocabulary and present work with clarity — ideal preparation for Upper KS3 and GCSE Art & Design.

YEAR 8 ART & DESIGN — FEEDBACK TEST

“Observe closely, experiment purposefully, communicate clearly”

Instructions: Rate each statement: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree. Answer the reflection at the end of each strand.

A. Reading

1. I can explain key ideas from short texts about artists, designers, or movements.
2. I recognise and use terms such as composition, value, harmony, contrast, and texture.
3. I can identify an artist’s method and link it to outcomes.
4. I can compare two artists’ approaches to a shared theme.

Reflection: Which reading most influenced your own work, and how?

B. Writing

1. I record process clearly (intent, experiments, selection, refinement).
2. I evaluate work using specific criteria, not just opinion.
3. I can write a concise artist analysis using accurate vocabulary.
4. I can state a clear intention for a final piece and measure against it.

Reflection: Which part of written reflection needs the most attention?

C. Listening

1. I retain key steps from demonstrations and safety notes.
2. I can restate a technique and common pitfalls.
3. I can explain why a material or tool was chosen for a specific effect.
4. I respond thoughtfully to spoken critique.

Reflection: Which demo or talk changed how you work?

D. Watching

1. I follow process videos and identify stages (plan, underlayer, develop, refine).
2. I can spot how lighting, viewpoint, or editing affects presentation.
3. I notice how artists test and reject ideas.
4. I judge whether an explanation was clear and balanced.

Reflection: Which video most improved your technique or presentation?

E. Researching

1. I find reliable sources and credit images properly.
2. I gather visual references and annotate what is useful about each.
3. I connect research to my concept and materials.
4. I compare sources and explain differences in emphasis or interpretation.

Reflection: Which theme or maker would you like to research next, and why?

F. Student-Led Tasks

1. I can lead a short skills demo or critique protocol.
2. I give kind, precise feedback referencing criteria.
3. I help a group set success criteria and next steps.
4. I can summarise the group's progress and decisions.

Reflection: When did you help peers improve their work?

G. Creative/Practical Tasks

1. I generate multiple thumbnails or prototypes before choosing.
 2. I refine composition and colour deliberately to guide the eye.
 3. I resolve a final outcome to a presentable standard.
 4. I can curate and photograph work effectively with a short statement.
- Reflection:** Which piece best shows your intent and control, and why?

Final Reflection

Choose a focus for this term (observational accuracy, composition, colour control, material mastery, presentation/annotation). What two weekly actions will you take to improve?

YEAR 8 ART & DESIGN — INTERVENTION FRAMEWORK

(Apply the level matching the average score in each strand.)

READING

If score is 1–2 (Needs Support):

Read one short artist profile weekly. Note **materials**, **subject**, **one technique**, and **one keyword** with your own example sentence.

Outcome: Understands main ideas and uses core vocabulary accurately.

If score is 3 (Developing):

Read two brief texts on artists tackling the same theme (e.g., portrait, city, nature). Write a 120-word comparison on **style**, **process**, and **how mood is created**.

Outcome: Compares approaches using correct terms.

If score is 4–5 (Secure/Advanced):

Study a movement (e.g., Bauhaus, Pop, Street Art). Produce a concise summary linking **principles** to **two works** and one way you could apply them.

Outcome: Synthesises principles and transfers them to practice.

WRITING

If score is 1–2 (Needs Support):

Use a simple reflection frame after each task: **Intent**, **What I tried**, **What**

worked, Next step. Add three labelled terms (line, value, contrast).

Outcome: Clear reflections with accurate basic vocabulary.

If score is 3 (Developing):

Write a process paragraph: **Idea** → **Experiments (evidence)** → **Choice (why)** → **Refinement** → **Result**. Include one photo/scan annotated with technique notes.

Outcome: Links experiments to decisions and outcome.

If score is 4–5 (Secure/Advanced):

Write a 150-word comparative critique (your work vs reference) covering **composition, colour strategy, focal point, and audience impact**.

Outcome: Analytical writing with justified judgements.

LISTENING

If score is 1–2 (Needs Support):

After a demo, list **three safety/setup points** and **two technique cues**. Repeat them to a partner and apply immediately.

Outcome: Retains and applies essential instructions.

If score is 3 (Developing):

During a talk, create a **Do / Avoid** checklist for the technique and test it on a 10-minute study.

Outcome: Converts guidance into actionable practice.

If score is 4–5 (Secure/Advanced):

Listen to an artist interview. Write a reflection linking **one idea** to your current project plan.

Outcome: Transfers spoken insights to personal intent.

WATCHING

If score is 1–2 (Needs Support):

Watch a process video; pause to label stages: **sketch, underlayer, build, refine/highlight**.

Outcome: Understands workflow and purpose of stages.

If score is 3 (Developing):

Watch a studio or exhibition walkthrough. Note how **lighting, spacing, and grouping** affect viewing; mock up a mini-display of your pieces.

Outcome: Recognises presentation choices and audience impact.

If score is 4–5 (Secure/Advanced):

Watch a masterclass; write a micro-review on **clarity, pacing, and one improvement**. Apply one technique in a 20-minute study and annotate results.

Outcome: Evaluates instruction and applies technique independently.

RESEARCHING

If score is 1–2 (Needs Support):

Choose one artist/material. Record **who/where, materials, subject, one influence**. Credit one image correctly (artist, title, year).

Outcome: Gathers reliable basics and uses simple citation.

If score is 3 (Developing):

Research a tool or surface (charcoal, acrylic mediums, lino, digital brushes). Write a one-paragraph guide: **properties, best uses, limitations**.

Outcome: Connects material properties to practical choices.

If score is 4–5 (Secure/Advanced):

Compare two sources on a technique/movement; note **one agreement, one difference**. Decide which informs your project better and why.

Outcome: Evaluates sources and selects with purpose.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 60-second “show and tell” of one sketch: **what you tried and one success**.

Outcome: Builds confidence using vocabulary aloud.

If score is 3 (Developing):

Run a 5-minute micro-demo (e.g., blending pencils, colour mixing triad). Provide a mini practice exercise and checklist.

Outcome: Communicates steps clearly and supports peers.

If score is 4–5 (Secure/Advanced):

Facilitate a short peer critique using three prompts (composition, colour,

message); record two agreed next steps.

Outcome: Leads constructive critique and action planning.

CREATIVE/PRACTICAL TASKS

If score is 1–2 (Needs Support):

Produce **six thumbnails** exploring composition of the same subject. Choose one and state **why** (rule of thirds, leading lines, balance).

Outcome: Experiments with layout and justifies choice.

If score is 3 (Developing):

Create a mixed-media study (e.g., pencil + wash + collage). Annotate where each material works best and what to refine in a final piece.

Outcome: Combines materials purposefully; plans refinement.

If score is 4–5 (Secure/Advanced):

Design a mini-project: **theme, artist influence, experiments, final plan**. Set two success criteria (e.g., cohesive palette; strong focal path) and evaluate against them.

Outcome: Plans and delivers independent work with criteria-led evaluation.

Optional weekly routine (quick guide)

- **Mon:** 10-minute observational warm-up + short artist read
- **Tue:** Technique drill + annotated photo of results
- **Wed:** Research note + thumbnail sheet
- **Thu:** Develop/refine study + micro-crit
- **Fri:** Present/photograph work + 5-sentence reflection

If you'd like, I can produce **Year 8 Design & Technology** next, or package this into a **print-ready Word/Google Form** set with auto-totalling and suggested next steps.

Είπες:

DESIGN & TECHNOLOGY

To ChatGPT είπες:

Brilliant — here's the **Year 8 Design & Technology (D&T) Supercurriculum package** in clean, continuous UK English.

It mirrors your other subjects: **Why it matters** → **Feedback Test** → **Score-Aligned Interventions** (use the learner's average per strand: **1–2 = Needs Support**, **3 = Developing**, **4–5 = Secure/Advanced**). No tables; ready for Word or Forms.

DESIGN & TECHNOLOGY

Why super curriculum matters in Design & Technology

Supercurriculum activities in DT encourage pupils to solve real-world problems with creativity and logic. They provide opportunities to design, build and test ideas, fostering innovation, teamwork and resilience — essential skills for future study and work.

Supercurriculum Navigation Guide – Design & Technology

The Design & Technology Supercurriculum encourages you to combine creativity with problem-solving. It allows you to explore how products are designed and made, how materials behave, and how technology can improve everyday life. You do not need to complete all activities at once — choose tasks that inspire you and let your ideas develop over time.

Each section below supports a different aspect of the design process. Use this guide to approach tasks confidently and reflect on what you learn.

1. Reading

Purpose: To understand how design works in the real world and how products evolve.

How to use this section:

- Choose one topic or inventor at a time.
- Read actively: note the purpose of the design, who uses it, and how it solves a problem.
- After reading, summarise what you learned in a few clear sentences.
- Ask yourself:
 - *What problem was this invention trying to solve?*

- *How did the design change over time?*
- *What can I apply to my own designs?*

Tip: Collect images of designs that inspire you in a digital mood board or sketchbook.

2. Writing

Purpose: To help you think through and communicate your design ideas clearly.

How to approach writing tasks:

- Keep a **design logbook**:
 - Sketch ideas
 - Label materials, parts and features
 - Write short reflections about what works and what needs improving
- When writing design briefs, describe:
 - The problem
 - The user
 - The purpose of your design
- When evaluating designs, focus on:
 - Function
 - Safety
 - Aesthetics
 - Sustainability

Goal: To develop thoughtful and well-explained design thinking.

3. Listening

Purpose: To learn how designers and engineers think about solving problems.

How to use listening resources:

- Listen with a notebook.
- Write down new ideas, technologies or design approaches you find interesting.
- Afterwards, choose one idea to explore or try in a mini-design experiment.

This builds awareness of real-world engineering and innovation.

4. Watching

Purpose: To learn practical techniques and see the design process in action.

How to approach viewing:

- Pause videos to sketch designs or note key building steps.
- Try small experiments or prototypes inspired by what you watched.
- Focus on how simple materials (e.g., paper, cardboard, tape) can be used creatively.

This supports hands-on learning and flexible problem-solving.

5. Researching

Purpose: To explore design as a response to human needs and global challenges.

How to research effectively:

- Start with a clear design question:
 - *How can we reduce plastic waste through packaging design?*
 - *How can renewable energy devices be made more efficient?*
- Investigate materials, prototypes, and existing solutions.
- Compare different approaches and consider what improvements could be made.

This strengthens innovation and critical evaluation skills.

6. Student-Led Tasks

Purpose: To practise sharing ideas, collaborating and leading creative problem-solving.

How to approach these tasks:

- Prepare materials in advance (e.g., paper, tape, scissors, recycled items).
- When leading a challenge, explain the goal clearly and encourage experimentation.
- Highlight that mistakes are part of the design process — they lead to better solutions.

This develops teamwork, leadership and resilience.

7. Creative Tasks

Purpose: To turn ideas into physical (or digital) prototypes.

How to complete these tasks:

- Start by sketching your idea from different angles.
- Label key features and explain how each part works.
- Choose materials carefully — simple materials can still make strong prototypes.
- Reflect on what worked well and what you would improve next time.

This nurtures imagination, practical skill and design confidence.

How to Manage Your Time

- Aim to complete **1–2 Supercurriculum activities per week.**
- Balance practical making tasks with research and reflection tasks.
- Keep all work in a **Design Logbook** (paper or digital).

How to Show Progress

- Record:
 - Sketches and prototypes
 - Notes on tests and improvements
 - Inspirations and ideas to try next
- Your portfolio can contribute to:
 - House points and awards
 - Technology or STEM competitions
 - GCSE DT portfolios and project proposals

Reading

1. BBC Bitesize KS3 Design & Technology –
2. Design Museum learning resources –
3. Dyson Foundation Challenge Cards –
4. NASA Engineering Design Process –
5. Explain That Stuff: How inventions work –

Writing

1. Keep a design logbook with sketches, annotations and evaluations.
2. Write a fact file on an inventor using Design Museum resources –
3. Draft a design brief for a household product improvement.
4. Write instructions for a simple model-building task.
5. Summarise what you learned from completing a Dyson Challenge Card –

Listening

1. Tumble podcast: engineering episodes –
2. Brains On! invention and design stories –
3. Wow in the World: technology and innovation –
4. Engineering Matters podcast (school-suitable episodes) –
5. KidsLab STEM podcast –

Watching

1. BBC Bitesize KS3 DT videos –
2. PBS Kids Design Squad Global –
3. Dyson Foundation Challenge Card demos –
4. Crash Course Kids: Engineering playlists –
5. Exploratorium Tinkering Studio –

Researching

1. Research how a famous invention has changed over time (Explain That Stuff) –

2. Investigate renewable energy design solutions (National Grid) –
3. Explore material properties and uses (BBC Bitesize) –
4. Study the design history of a household object (Design Museum) –
5. Compare solutions to a real-world problem, e.g. water filtration or packaging.

Student-led Tasks

1. Lead a quick design challenge (e.g. tallest tower from paper).
2. Present a short talk on a famous engineer or inventor.
3. Run a workshop on safe use of simple tools and materials.
4. Organise a group project to redesign an everyday object.
5. Lead a brainstorming session for solving a local community issue.

Creative Tasks

1. Design and build a cardboard prototype of a new product.
2. Create an infographic showing the steps of the design process.
3. Invent a gadget and sketch its features and functions.
4. Build a model bridge or structure and test its strength.
5. Design a marketing poster for a product you invented.

YEAR 8 DESIGN & TECHNOLOGY

Why Supercurriculum Matters in Year 8 D&T

Year 8 moves from “making something work” to **designing for users with evidence**. Supercurriculum tasks strengthen specification writing, modelling and testing, material/process choice, and sustainability thinking. Pupils practise sketching and CAD, tolerance/quality control, safe tool use, and evaluation against criteria. They learn to justify decisions (function, cost, environment), iterate prototypes, and communicate ideas clearly — strong preparation for Upper KS3 and GCSE.

YEAR 8 D&T — FEEDBACK TEST

“Design with purpose, make with precision, explain with evidence”

Instructions: Rate each statement: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree. Answer the reflection at the end of each strand.

A. Reading

1. I can summarise short articles about products, designers or engineering ideas.
2. I recognise and use key terms (ergonomics, anthropometrics, tolerance, lifecycle).
3. I can explain why a material or process suits a component.
4. I can compare two products for the same user need.

Reflection: Which design story or case study influenced your own ideas, and how?

B. Writing

1. I write clear briefs and measurable specifications.
2. I plan methods with ordered steps, tools, safety and quality checks.
3. I evaluate prototypes using test data, not just opinion.

4. I justify design changes with reasons linked to criteria.
Reflection: Which part of D&T writing needs most attention (brief/spec, plan, evaluation)?

C. Listening

1. I retain key steps and safety points from demonstrations.
2. I can restate why a joint/fastener/finish was chosen.
3. I recognise a misconception and can correct it.
4. I respond thoughtfully to verbal feedback.
Reflection: Which explanation or demo changed how you worked?

D. Watching

1. I follow build/process videos and identify the order of operations.
2. I can spot accuracy checks and quality control moments.
3. I evaluate whether a method is efficient and sustainable.
4. I can transfer a shown technique to a different task.
Reflection: Which video improved your technique or decision-making?

E. Researching

1. I find reliable sources on materials, mechanisms, components and users.
2. I gather and present user data (survey/interview/observation) ethically.
3. I compare alternatives and select with evidence (properties, cost, impact).
4. I reference sources and images correctly.
Reflection: What user group, material or mechanism will you investigate next?

F. Student-Led Tasks

1. I can lead a short skills demo or mini-crit.
2. I give kind, precise feedback linked to the spec.
3. I organise roles and next steps in a team task.
4. I can summarise outcomes and decisions clearly.
Reflection: When did you help a team solve a design problem?

G. Creative/Practical Tasks

1. I generate multiple concepts and select using criteria.
2. I prototype at different fidelities (paper/card/CAD) and test.
3. I work to tolerances and finish to a good standard.
4. I present a final prototype with clear visuals and a product story.
Reflection: Which prototype best shows purposeful iteration, and why?

Final Reflection

Choose a focus for this term (user research, sketching/CAD, accuracy & QC, materials/process choice, sustainability). What two weekly actions will you take to improve?

YEAR 8 D&T — INTERVENTION FRAMEWORK

(Apply the level matching the average score in each strand.)

READING

If score is 1–2 (Needs Support):

Read one short product profile weekly. Record **User & need**, **Key features**, **Material/process**, **One keyword** (your sentence).

Outcome: Understands purpose–feature–material links and core vocabulary.

If score is 3 (Developing):

Compare two products for the same job. Write a 120-word judgement on **ergonomics**, **durability**, **sustainability** (mention one property or standard).

Outcome: Makes evidence-based comparisons with correct terms.

If score is 4–5 (Secure/Advanced):

Read a designer/movement case. Write how its **principles** (e.g., simplicity, modularity, repairability) could improve a current design you know.

Outcome: Transfers design principles to new contexts.

WRITING

If score is 1–2 (Needs Support):

Write a brief and spec for a small product using **User**, **Context**, **Problem**, and **5 measurable criteria** (e.g., mass ≤, fits hand width 55–85 mm).

Outcome: Clear, testable specifications.

If score is 3 (Developing):

Draft a method with numbered steps, **tools**, **safety**, and **QC checks** (measure–mark–cut–join–finish). Add tolerances (± 1 mm where relevant).

Outcome: Logical plans with safety and quality embedded.

If score is 4–5 (Secure/Advanced):

Write an evaluation with **test data** (dimensions, load, time), **failure analysis**, and **two design changes** justified against the spec and sustainability.

Outcome: Data-led evaluation and targeted iteration.

LISTENING

If score is 1–2 (Needs Support):

After a demo, note **three safety points** and **three steps**; repeat them to a partner and apply in a 10-minute practice.

Outcome: Retains essentials and applies immediately.

If score is 3 (Developing):

Listen for **why** a joint/finish/process was chosen. Write a two-sentence justification (properties → use).

Outcome: Connects process choice to function and material.

If score is 4–5 (Secure/Advanced):

During critique, capture **problem** → **suggestion** → **change** and summarise the design decision in 3 sentences.

Outcome: Converts feedback into actionable iteration.

WATCHING

If score is 1–2 (Needs Support):

Watch a build clip; label each stage with its **purpose** and **tool**.

Outcome: Links action to intent and correct tool use.

If score is 3 (Developing):

Watch two methods for the same task (e.g., hand-saw vs laser-cut). Write a decision rule: “Use A when ...; use B when ...” including waste/finish/time.

Outcome: Chooses methods strategically.

If score is 4–5 (Secure/Advanced):

Analyse a production line video. Identify **where QC occurs**, **one potential failure mode**, and **one improvement**.

Outcome: Understands workflow, QC, and risk reduction.

RESEARCHING

If score is 1–2 (Needs Support):

Create a material card (pine, acrylic, aluminium, felt): **properties, common uses, one safety note.**

Outcome: Knows basics and safe handling.

If score is 3 (Developing):

Do a micro user study (5-question survey or 5-minute observation). Write **three user needs** and **one priority feature.**

Outcome: Links real user data to criteria.

If score is 4–5 (Secure/Advanced):

Compare two materials/processes for one component via a mini **trade-off matrix** (strength, mass, cost, finish, impact). Conclude with a justified choice.

Outcome: Evidence-based selection and specification.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 60-second “tool talk” (name, purpose, one safety cue).

Outcome: Builds confidence and safe vocabulary.

If score is 3 (Developing):

Run a 5-minute micro-demo (accurate marking, simple joint, sanding sequence) with a mini checklist.

Outcome: Communicates steps clearly and supports peers.

If score is 4–5 (Secure/Advanced):

Facilitate a mini-crit using three prompts (user fit, function, sustainability). Record **two agreed changes.**

Outcome: Leads purposeful critique to decisions.

CREATIVE/PRACTICAL TASKS

If score is 1–2 (Needs Support):

Produce **six thumbnail sketches** for a small product (bookmark, stand, key fob). Choose one using the spec; build a card mock-up.

Outcome: Generates options, selects with criteria, prototypes quickly.

If score is 3 (Developing):

Make a **scaled model** (paper/card/CAD). Test against the spec (fit, strength proxy, stability) and record results.

Outcome: Tests function and refines dimensions/tolerances.

If score is 4–5 (Secure/Advanced):

Create a **final prototype** with a simple **test plan** (load test, drop test, fit test). Record data, adjust tolerances/finish, and explain two engineering changes.

Outcome: Demonstrates iterative design with measurable improvement.

Optional weekly routine (quick guide)

- **Mon:** Read a product case study + 4-point summary
- **Tue:** Sketching/CAD practice + one annotated decision
- **Wed:** Process/video study + method decision rule
- **Thu:** User/material research + brief/spec update
- **Fri:** Prototype/test + data-led evaluation sentence

If you'd like, I can follow with **Year 8 Music** or **PE**, or bundle this into a **print-ready Word/Forms pack** that auto-totals scores and suggests the matching interventions.

Είπες:

MUSIC

To ChatGPT είπε:

Brilliant — here's the **Year 8 Music Supercurriculum package** in clean, continuous UK English.

It follows the same structure: **Why it matters** → **Feedback Test** → **Score-Aligned Interventions** (use the learner's average per strand: **1–2 = Needs Support**, **3 = Developing**, **4–5 = Secure/Advanced**). No tables; ready for Word or Forms.

MUSIC

Why super curriculum matters in Music

Supercurriculum activities in Music deepen pupils' appreciation of sound, structure and expression. They broaden cultural horizons, strengthen listening and performance skills, and encourage creativity through composition and improvisation — all of which prepare learners for GCSE Music.

Supercurriculum Navigation Guide – Music

The Music Supercurriculum encourages you to explore sound, performance and creativity beyond classroom lessons. It helps you develop listening skills, musical understanding, cultural awareness and confidence in creative expression. You do not need to complete everything — choose activities that interest you and enjoy discovering new music and techniques.

Each section below develops a different musical skill. Use the guide to help you approach tasks thoughtfully and reflect on your learning.

1. Reading

Purpose: To learn about musicians, musical styles, instruments and how music has developed over time.

How to use this section:

- Choose one composer, genre or instrument at a time.
- Read actively: note down musical terms or features you notice.
- After reading, summarise the key idea in your own words:
 - *What makes this music distinctive?*
 - *How does the composer create mood or emotion?*

Tip: Keep a listening and vocabulary journal to build musical language.

2. Writing

Purpose: To help you express your musical ideas clearly and reflect on your listening and performing.

How to approach writing tasks:

- When writing listening reflections:
 - Describe what you hear (tempo, dynamics, instruments, mood)
 - Explain *how* the music makes you feel and *why*
- When writing biographies or comparisons:
 - Include important dates, styles, influences and cultural background
- When drafting lyrics, consider rhyme, rhythm and emotional message

Goal: To communicate musical understanding confidently.

3. Listening

Purpose: To develop careful listening and appreciation of different musical styles.

How to use listening resources:

- Listen with your notebook open.
- Note:
 - Instruments you hear
 - Changes in mood or dynamics
 - Any patterns, rhythms or motifs
- After listening, try humming or clapping the main rhythm or melody.

This builds auditory memory and musical awareness.

4. Watching

Purpose: To see how musicians perform, communicate and control sound.

How to approach viewing:

- Watch how performers:
 - Hold their instruments
 - Breathe or shape phrases
 - Work together in an ensemble
- Observe the conductor's role in leading tempo, balance and expression.

- If watching a tutorial, pause and try small sections at a time.

This strengthens performance technique and confidence.

5. Researching

Purpose: To explore how music is created and how it connects to history, science and media.

How to research effectively:

- Begin with a clear question:
 - *How does film music create atmosphere?*
 - *What makes a composer's style unique?*
 - *How does sound travel and why do instruments sound different?*
- Collect information from trusted sources.
- Share findings using key musical vocabulary (timbre, tempo, dynamics, texture).

This develops curiosity, analytical skills and cultural awareness.

6. Student-Led Tasks

Purpose: To build confidence performing, explaining and leading musical activities.

How to approach these tasks:

- Choose something simple but musical (a rhythm pattern, short melody, or listening quiz).
- Practise before leading others.
- Encourage participation and praise effort.
- Keep the atmosphere energetic and supportive.

This develops leadership, teamwork and performance presence.

7. Creative Tasks

Purpose: To express musical ideas in imaginative and enjoyable ways.

How to complete these tasks:

- Start with a mood, idea, rhythm or story.
- Experiment — try different note patterns or sounds, even unusual ones.
- For composition: keep ideas short and repeat patterns to build structure.
- For visual responses: listen first, then draw or create what you *feel*.

This nurtures artistic confidence and musical identity.

How to Manage Your Time

- Aim to complete **1–2 Supercurriculum activities per week.**
- Mix listening, research and creative tasks to balance understanding and expression.
- Keep your work in a **Music Supercurriculum folder or digital portfolio.**

How to Show Progress

- Record:
 - New music you listened to
 - Composers or genres explored
 - Skills practised (e.g., rhythm, melody, performance)
- Save any compositions, artwork or recordings — these show growth over time.

Your portfolio can support:

- House points
- School Music awards
- Performance opportunities
- GCSE Music preparation

Reading

1. BBC Bitesize KS3 Music –
2. Classics for Kids: composers and their stories –
3. DK Find Out: Music and instruments –

4. Philharmonia Orchestra resources –
5. Kids Music Corner: instrument families –

Writing

1. Keep a weekly music listening journal with notes on genres and mood.
2. Write a biography of a composer using Classics for Kids –
3. Draft lyrics to a melody you know, exploring rhyme and rhythm.
4. Write a comparison between two music genres (BBC Bitesize support) –
5. Review a Philharmonia Orchestra instrument video –

Listening

1. Classics for Kids radio shows –
2. BBC Ten Pieces audio clips –
3. Philharmonia Orchestra sound guides –
4. Storynory music stories –
5. San Francisco Symphony Kids –

Watching

1. BBC Bitesize KS3 Music video lessons –
2. BBC Ten Pieces films –
3. Philharmonia Orchestra instrument videos –
4. San Francisco Symphony Kids interactive videos –
5. Crash Course Music Theory –

Researching

1. Research the history of a musical instrument (Philharmonia) –
2. Investigate a composer's life and works (Classics for Kids) –
3. Explore how film music is created (BBC Teach) –
4. Research the science of sound (BBC Bitesize) –
5. Study a piece from BBC Ten Pieces and present your findings –

Student-led Tasks

1. Lead a short rhythm clapping activity for the class.
2. Organise a “guess the instrument” quiz using sound clips.
3. Present on your favourite music genre and why it inspires you.
4. Run a mini workshop teaching a simple melody.
5. Lead a group rehearsal of a class song or instrumental piece.

Creative Tasks

1. Compose a short melody using Chrome Music Lab –
<https://musiclab.chromeexperiments.com/>
2. Create an artwork inspired by a piece of music you enjoy.
3. Record your own sound effects for a short video.
4. Rewrite the lyrics of a popular song with a new theme.
5. Produce a poster advertising a concert for a favourite composer or band.

YEAR 8 MUSIC

Why Supercurriculum Matters in Year 8 Music

Year 8 is the step from copying patterns to **making musical choices on purpose**. Supercurriculum work builds secure listening, stylistic awareness, ensemble skills, and creative control. Pupils learn how musical elements (structure, texture, harmony, rhythm, timbre, dynamics, tempo) shape meaning; how to practise efficiently; and how to compose/arrange with intention for a clear audience. This is strong preparation for Upper KS3 and early GCSE skills in performance, composition and appraisal.

YEAR 8 MUSIC — FEEDBACK TEST

“Listen closely, rehearse smartly, compose intentionally”

Instructions: Rate each statement: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree. Answer the reflection at the end of each strand.

A. Reading

1. I can summarise short texts about styles, composers, or production.
2. I recognise key terms (riff/ostinato, cadence, texture, syncopation, timbre).
3. I can explain how context (time/place/technology) shapes a style.
4. I can compare two styles or songs using accurate vocabulary.

Reflection: Which reading most influenced how you play or compose?

B. Writing

1. I write clear practice or rehearsal plans with targets.
2. I evaluate a performance with evidence (bar numbers, accuracy, tone, balance).
3. I can write a concise programme or producer’s note for a piece.
4. I can explain composition choices (structure, chords, instrumentation).

Reflection: Which part of music writing needs most attention?

C. Listening

1. I can identify instruments and textures confidently.
2. I track form (intro/verse/chorus/bridge or A-B-A etc.).
3. I notice harmony/riff patterns and key rhythmic features.
4. I can compare interpretations of the same piece.

Reflection: Which track stretched your listening, and what did you notice?

D. Watching

1. I learn from performance/masterclass videos.
2. I can describe technique cues (posture, breathing, hand shape, articulation).
3. I notice ensemble skills (cueing, balance, blend, timing).
4. I judge whether a tutorial explained a concept clearly.

Reflection: Which video most improved your playing or composing?

E. Researching

1. I find reliable sources about genres, artists, instruments or tech.
2. I take focused notes with examples and timings/bars.
3. I evaluate credibility and bias (promo vs review vs scholarly).
4. I use research to refine a performance or composition.

Reflection: What question would you like to investigate next?

F. Student-Led Tasks

1. I can lead a warm-up, rhythm drill, or sectional rehearsal.
2. I give kind, specific feedback using musical vocabulary.
3. I help set ensemble targets and agree next steps.
4. I summarise the group's progress and priorities.

Reflection: When did you help a group improve most?

G. Creative Tasks

1. I plan pieces with clear structure and motif development.
2. I choose chords/instruments/loops to create a specific mood.
3. I revise drafts after feedback (cut, layer, reharmonise, re-mix).
4. I present work confidently (score/DAW session/performance).

Reflection: Which original piece best shows your intent and control?

Final Reflection

Choose a focus for this term (tempo control, articulation, chord fluency, structure, mixing/balance, expressive detail). What two weekly actions will you take to improve?

YEAR 8 MUSIC — INTERVENTION FRAMEWORK

(Apply the level matching the average score in each strand.)

READING

If score is 1–2 (Needs Support):

Read one short profile weekly (style, composer, instrument). Note **three facts**, **one key term** (with your sentence), and **one listening example** to try.

Outcome: Understands main ideas and uses core vocabulary accurately.

If score is 3 (Developing):

Read two short texts on related styles (e.g., blues vs rock, classical vs film). Write a 120-word comparison (instruments, rhythm feel, form, harmony).

Outcome: Explains stylistic contrasts with correct terms.

If score is 4–5 (Secure/Advanced):

Read about a movement/scene (Baroque, jazz, EDM sub-genre). Produce a concise summary linking **context** to **two tracks** and **one technique** to apply in your work.

Outcome: Synthesises research and transfers it to practice.

WRITING

If score is 1–2 (Needs Support):

Keep a weekly practice log: **piece/skill**, **time**, **one success**, **one next step**.

Outcome: Builds routine and specific improvement goals.

If score is 3 (Developing):

Write a 150-word performance review naming bars/sections and commenting on accuracy, tone, balance, and expression; set two measurable targets.

Outcome: Evidence-based reflection and goal-setting.

If score is 4–5 (Secure/Advanced):

Write a programme/producer's note (150–180 words): **intention**, **structure/form**,

materials (motif/chords/texture), audience effect.

Outcome: Articulates musical choices and artistic purpose.

LISTENING

If score is 1–2 (Needs Support):

Daily 3–5 minute track: identify **mood, two instruments, one feature** (riff/hook/beat); write a two-sentence summary.

Outcome: Recognises sound sources and basic features.

If score is 3 (Developing):

Complete a listening grid: **Form, Texture changes, Dynamics/Tempo shifts, Notable motif**; include timestamps/bars.

Outcome: Tracks structure and element changes precisely.

If score is 4–5 (Secure/Advanced):

Compare two recordings of the same piece (live vs studio or two artists). Write a 120-word analysis of tempo, articulation, balance, and expression.

Outcome: Evaluates interpretation with accurate terminology.

WATCHING

If score is 1–2 (Needs Support):

Watch a technique tutorial for your instrument/voice. Note **three cues** (e.g., relaxed shoulders, legato air, curved fingers) and practise each for two minutes.

Outcome: Applies fundamental technique cues.

If score is 3 (Developing):

Watch a small-ensemble rehearsal/performance. Identify **two ensemble skills** used and rehearse a 30-second passage focusing on them.

Outcome: Transfers observation to ensemble improvement.

If score is 4–5 (Secure/Advanced):

Watch a masterclass or breakdown. Write a micro-review (clarity, pacing, one improvement) and record a take applying one idea; evaluate against a checklist.

Outcome: Learns from experts and evidences change.

RESEARCHING

If score is 1–2 (Needs Support):

Research an instrument family: **range/role**, **one technique**, **one famous example**; add a listening link in your notes.

Outcome: Knows core facts and typical sounds.

If score is 3 (Developing):

Investigate a genre or production technique (e.g., 12-bar blues, side-chain compression). Write **how it works**, **signature sound**, **one track** that shows it.

Outcome: Connects technique to listening and making.

If score is 4–5 (Secure/Advanced):

Compare two sources on an artist/issue. Note **agreement**, **difference**, and **which is more reliable** (author, evidence, recency).

Outcome: Evaluates sources and justifies conclusions.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 60-second clapping or call-and-response warm-up; keep steady pulse.

Outcome: Builds confidence and internal timing.

If score is 3 (Developing):

Run a 5-minute sectional: set bar numbers, two targets (entries, dynamics), and a recap.

Outcome: Organises rehearsal and improves ensemble precision.

If score is 4–5 (Secure/Advanced):

Host a micro-workshop (rhythm layering, harmony stack, loop building). Collect one piece of feedback and summarise next steps.

Outcome: Facilitates learning and iterative improvement.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Compose an **8-bar** melody over a simple chord loop; add dynamic markings and a clear cadence or ending.

Outcome: Completes a coherent idea with pulse and contour.

If score is 3 (Developing):

Extend to **16 bars** with **A–B** or **verse–chorus** structure. Add contrast

(texture/dynamics/harmony) and notate or sequence it.
Outcome: Manages form and develops material.

If score is 4–5 (Secure/Advanced):

Create a short arrangement/track: clear **intro–build–climax–ending**, at least **three parts** (melody, harmony, rhythm), and a balanced mix. Add a 5-sentence producer's note on choices.

Outcome: Demonstrates control of structure, texture and sound.

Optional weekly routine (quick guide)

- **Mon:** Short reading + 3-point style notes
- **Tue:** Focused listening grid (timestamps/bars)
- **Wed:** Practice log + micro-recording check
- **Thu:** Research card (technique/genre) → apply one idea
- **Fri:** Compose/arrange draft + 5-sentence reflection

If you'd like, I can continue with **Year 8 Physical Education, Religious Education**, or **MFL (Spanish/Greek/ESL)** in the same format.

Είπες:

PHYSICAL EDUCATION

To ChatGPT είπες:

Excellent — here's the **Year 8 Physical Education (PE) Supercurriculum package**, fully aligned with your established structure:

Why it matters → **Feedback Test** → **Score-Aligned Interventions** (based on average strand score: **1–2 = Needs Support**, **3 = Developing**, **4–5 = Secure/Advanced**).

It's written in clean UK English and designed to paste directly into Word or Microsoft Forms — no tables.

PHYSICAL EDUCATION

1. Reading

Purpose: To understand fitness, training, nutrition and how the body responds to exercise.

How to use this section:

- Choose one short article or topic at a time.
- Focus on key ideas such as warm-ups, hydration, muscle groups or healthy routines.
- After reading, summarise what you learned in your own words:
 - *Why is this important?*
 - *How can I apply it to my own lifestyle?*

Tip: Keep a glossary of fitness and health terms to support PE theory.

2. Writing

Purpose: To reflect on performance and build awareness of healthy habits.

How to approach writing tasks:

- When keeping a training diary, include:
 - What you did
 - How hard it felt (e.g. easy / moderate / challenging)
 - What went well and what you want to improve
- When writing lifestyle plans or biographies, focus on:
 - Goals
 - Routines
 - Motivations
 - Challenges and solutions

Goal: To develop a thoughtful and responsible approach to wellbeing.

3. Listening

Purpose: To explore movement, rhythm and relaxation strategies.

How to use listening resources:

- Choose music, movement stories or calming audio depending on your goal:
 - Energising → warm-up, practice, circuits
 - Calming → stretching, cool-down, mindfulness
- After listening, reflect:
 - *How did this affect my focus or energy level?*

This builds self-awareness and emotional regulation.

4. Watching

Purpose: To learn new skills and practise movement safely and effectively.

How to approach viewing:

- Watch carefully how movements are demonstrated:
 - Body posture
 - Foot placement
 - Breathing
 - Timing
- Pause and repeat sections to practise step-by-step.
- Remember: progress comes from consistent repetition, not speed.

This supports safe technique and gradual improvement.

5. Researching

Purpose: To understand sport culture, human physiology and performance techniques.

How to research effectively:

- Begin with a clear question, such as:
 - *How does nutrition support athletic performance?*
 - *What are the origins of the Olympic Games?*
 - *How does practice improve coordination?*
- Collect key information and share it in a short explanation, poster or slide.

This builds knowledge that strengthens practical PE performance.

6. Student-Led Tasks

Purpose: To develop teamwork, leadership and communication skills.

How to approach these tasks:

- Choose a task you feel comfortable guiding (warm-up, skill practise, mini-challenge).
- Demonstrate slowly and clearly.
- Encourage participation, effort and positive attitude.

- Use supportive language: *“Try this”, “Good effort”, “Let’s try that again”*.

This builds confidence in leading others respectfully and effectively.

7. Creative Tasks

Purpose: To express movement, strategy and physical awareness in imaginative ways.

How to complete these tasks:

- When creating routines, start with simple movements and build gradually.
- When designing courses or games, consider:
 - Safety
 - Space
 - Equipment
 - Clear rules
- When making posters or videos, think about:
 - Clear instructions
 - Positive motivation
 - Healthy lifestyle messages

This nurtures creativity, communication and initiative.

How to Manage Your Time

- Aim to complete **1–2 activities each week**.
- Balance **physical activities** (movement, sport, fitness) with **reflection** (journals, planning).
- Track your progress in a **Fitness & Wellbeing Logbook**.

How to Show Progress

- Record:
 - Skills practised
 - Improvements noticed
 - Personal fitness goals
 - Strategies that help you stay motivated
- This can support:
 - House points and certificates

- PE leadership roles
- Sports team opportunities

Why super curriculum matters in Physical Education

Supercurriculum activities in PE support lifelong fitness, teamwork and resilience. They encourage pupils to understand the value of health and wellbeing, improve their performance across a range of sports, and build leadership and communication skills.

Reading

1. BBC Bitesize KS3 PE –
2. KidsHealth: Fitness and exercise –
3. Youth Sport Trust resources –
4. Change4Life healthy living –
5. DK Find Out: Sports and the human body –

Writing

1. Keep a weekly training diary noting goals and reflections.
2. Write the rules for a new team game and test them with friends.
3. Create a healthy lifestyle plan (exercise, sleep, nutrition).
4. Write a short biography of a sports figure you admire.
5. Summarise the benefits of daily exercise after reading KidsHealth –

Listening

1. GoNoodle movement songs –
2. BBC School Radio “Time to Move” –
3. Just Dance Kids playlists (YouTube) –
4. Yoga Kids Stories podcast –

5. Childline Calm Zone relaxation audio –

Watching

1. BBC Bitesize KS3 PE videos –
<https://www.bbc.co.uk/bitesize/subjects/znyb4wx>
2. Cosmic Kids Yoga (YouTube) –
3. PE with Joe (Body Coach TV) –
4. Just Dance Kids (YouTube) –
5. GoNoodle guided activity videos –

Researching

1. Investigate how exercise affects the body (BBC Bitesize) –
2. Research the history of the Olympic Games –
3. Explore how nutrition affects performance (NHS Change4Life) –
4. Study a sport not played at school and present its rules.
5. Investigate the psychology of sports performance (BBC Sport features) –

Student-led Tasks

1. Lead a warm-up or stretching session for peers.
2. Organise a class challenge (e.g. skipping, push-ups, sprints).
3. Run a skills workshop for a favourite sport.
4. Present on a famous sporting event (e.g. World Cup, Olympics).
5. Lead a mindfulness or relaxation activity after exercise.

Creative Tasks

1. Design a poster promoting fitness and healthy lifestyles.
2. Choreograph a short group dance or routine.
3. Create an obstacle course using household or playground items.
4. Record a video tutorial teaching a basic sporting skill.
5. Invent a new sport, with rules, scoring and equipment design.

YEAR 8 PHYSICAL EDUCATION

Why Supercurriculum Matters in Year 8 PE

Year 8 is the stage where pupils move beyond simple participation to **understanding performance, health, and leadership**. Supercurriculum activities help them analyse technique, improve consistency, apply tactics, and reflect on physical and mental wellbeing. Students explore fitness principles, teamwork, and fair play while developing resilience, goal-setting, and communication. By thinking critically about how the body works and how strategy

affects outcomes, they grow into independent, responsible athletes ready for GCSE PE or lifelong physical activity.

YEAR 8 PE — FEEDBACK TEST

“Practise with purpose, perform with control, reflect with honesty”

Instructions: Rate each statement: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree. After each strand, answer the short reflection.

A. Reading

1. I can summarise short articles on fitness, health, or sport science.
2. I understand basic anatomy and training vocabulary (cardio, endurance, overload, recovery).
3. I can explain how lifestyle choices affect performance.
4. I can compare two training methods for different sports.

Reflection: Which reading helped you improve understanding of your own fitness?

B. Writing

1. I can write SMART goals for physical improvement.
2. I record and interpret test data (times, reps, scores).
3. I evaluate my progress using evidence.
4. I can explain tactics or technique using correct terminology.

Reflection: Which writing or reflection task best showed your growth?

C. Listening

1. I follow instructions and safety guidance in all activities.
2. I can repeat coaching points accurately to a peer.
3. I identify key cues from verbal feedback and apply them.
4. I reflect aloud on performance improvements or challenges.

Reflection: When did feedback or commentary help you make a change?

D. Watching

1. I can observe a skill and describe what makes it successful.
2. I identify strengths and weaknesses when watching peers or athletes.
3. I recognise how tactics and teamwork influence outcomes.

4. I can apply what I observed to my own practice.
Reflection: Which video or live match improved your tactical understanding?

E. Researching

1. I find trustworthy resources on fitness, nutrition, or sport psychology.
2. I can record key data (heart rate, times, distances) and interpret patterns.
3. I compare training approaches or sports systems.
4. I connect research findings to my own routines.
Reflection: What health or performance topic would you like to research next?

F. Student-Led Tasks

1. I can lead a warm-up or stretch safely.
2. I give specific feedback that helps others improve.
3. I help my team stay organised and motivated.
4. I can design a simple practice or drill for a skill.
Reflection: When did you take initiative or show leadership in PE?

G. Creative/Practical Tasks

1. I perform a skill sequence with control and accuracy.
2. I experiment with new techniques and correct errors independently.
3. I adapt tactics or formations based on opponents.
4. I demonstrate respect, teamwork, and sportsmanship consistently.
Reflection: Which performance best showed your control, effort, and teamwork?

Final Reflection

Choose a focus for this term (fitness development, technique accuracy, tactical awareness, leadership, health and wellbeing). What two weekly actions will you take to improve?

YEAR 8 PE — INTERVENTION FRAMEWORK

(Apply the level matching the average score in each strand.)

READING

If score is 1–2 (Needs Support):

Read one short article or infographic weekly about a sport or fitness concept. Note **three facts, one key term, and how it applies to you.**

Outcome: Understands basic concepts and applies vocabulary.

If score is 3 (Developing):

Read a comparison of two training methods (e.g., interval vs continuous). Write three sentences explaining which sport each suits best and why.

Outcome: Connects method to purpose and performance.

If score is 4–5 (Secure/Advanced):

Read an extended article on sports nutrition or psychology. Summarise **the main idea, one example, and how you would adapt it in training.**

Outcome: Applies deeper scientific or behavioural understanding.

WRITING

If score is 1–2 (Needs Support):

Set one SMART goal each week (Specific, Measurable, Achievable, Relevant, Time-bound). Track progress for four weeks.

Outcome: Establishes measurable improvement habits.

If score is 3 (Developing):

Write a short self-evaluation after each unit: **What went well, Even better if, Next step.** Include one data point (time, score).

Outcome: Uses evidence for reflection and goal setting.

If score is 4–5 (Secure/Advanced):

Produce a 150-word performance analysis: **Skill focus, Strengths, Areas to develop, Plan for improvement** (link to principles of training).

Outcome: Analytical reflection with technical reasoning.

LISTENING

If score is 1–2 (Needs Support):

After coaching feedback, restate the main point and demonstrate it immediately.

Outcome: Builds feedback retention and correction.

If score is 3 (Developing):

Listen to commentary or instruction; write three key teaching cues and apply them

in the next session.

Outcome: Transfers listening into practical action.

If score is 4–5 (Secure/Advanced):

Listen to a sports analysis or podcast. Identify **two tactical ideas** and **one motivational strategy** to apply in your own play.

Outcome: Learns from expert feedback and reflection.

WATCHING

If score is 1–2 (Needs Support):

Watch a short video of a skill. Note **three technique points** (body position, timing, control). Practise and tick them off.

Outcome: Recognises and applies visual cues.

If score is 3 (Developing):

Watch a team performance; identify **strengths, weaknesses**, and **one improvement**. Write a 3-sentence reflection.

Outcome: Develops analytical eye for performance.

If score is 4–5 (Secure/Advanced):

Compare two players/teams in the same sport. Write how **tactics, spacing or tempo** differ and what lesson you can apply.

Outcome: Understands performance diversity and strategy.

RESEARCHING

If score is 1–2 (Needs Support):

Keep a fitness log for two weeks recording **activity type, time, effort**. Reflect on improvement.

Outcome: Monitors activity and understands effort levels.

If score is 3 (Developing):

Research a principle of training (specificity, progression, overload). Write how it appears in one sport.

Outcome: Links scientific principles to practice.

If score is 4–5 (Secure/Advanced):

Investigate a performance factor (nutrition, rest, mindset). Produce a one-page

summary with two practical recommendations.
Outcome: Applies research to personal routines.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 1-minute warm-up or stretch safely.

Outcome: Builds confidence and safety awareness.

If score is 3 (Developing):

Plan and deliver a 5-minute skills drill (clear aim, demo, feedback).

Outcome: Communicates instructions and reinforces good technique.

If score is 4–5 (Secure/Advanced):

Coach a mini-team or partner for one session. Give **individual feedback**, adapt tactics, and review improvement.

Outcome: Demonstrates coaching and leadership competence.

CREATIVE/PRACTICAL TASKS

If score is 1–2 (Needs Support):

Practise one skill three times weekly; log accuracy or time each session.

Outcome: Builds routine and baseline consistency.

If score is 3 (Developing):

Create a short routine or tactic (e.g., set play, movement pattern). Perform it with control and explain its purpose.

Outcome: Applies creativity and tactical thinking.

If score is 4–5 (Secure/Advanced):

Design a mini-challenge (fitness circuit or skill combo) for peers. Record results, adjust difficulty, and summarise findings.

Outcome: Integrates analysis, adaptation, and leadership.

Optional weekly routine (quick guide)

- **Mon:** Short article read + 3-sentence takeaway
- **Tue:** SMART goal update + skill practice log

- **Wed:** Watch technique video + mini-reflection
- **Thu:** Research principle or performance factor
- **Fri:** Lead or coach short task + evaluate success

Would you like me to continue with **Year 8 Religious Education**, **ESL**, or **Spanish** next — in exactly the same format?

RELIGIOUS EDUCATION

Why super curriculum matters in Religious Education

Supercurriculum activities in RE help pupils develop empathy, respect and critical thinking. They allow learners to explore beliefs, values and traditions across different religions, while engaging with moral questions and cultural diversity that shape our world today.

Supercurriculum Navigation Guide – Religious Education

The Religious Education Supercurriculum encourages you to explore beliefs, values and traditions from around the world. It helps you develop empathy, cultural awareness, and thoughtful reflection about life's big questions. You do not need to complete everything — choose activities that feel meaningful and interesting to you.

Each section below develops a different RE skill. Use this guide to help you approach tasks with curiosity, respect and understanding.

1. Reading

Purpose: To learn about world religions, their teachings, history, celebrations and values.

How to use this section:

- Choose one religion, festival or concept at a time.
- Read carefully and note:
 - Key beliefs
 - Symbols and rituals
 - Values and teachings
- Afterwards, summarise in your own words:
 - *What is important to followers of this religion?*
 - *How does this influence their daily life?*

Tip: Keep a **vocabulary list** of key terms (e.g. pilgrimage, sacred, compassion).

2. Writing

Purpose: To reflect on beliefs, values and moral questions thoughtfully.

How to approach writing tasks:

- When writing from someone's perspective, imagine:
 - Their emotions
 - Their experiences
 - The cultural or religious meaning behind events
- When comparing religions:
 - Look for *similarities* (shared values) and *differences* (practices, beliefs).
- When reflecting on moral questions, explain *why* you think what you think — not just *what* you think.

Goal: To express thoughtful, respectful and well-reasoned ideas.

3. Listening

Purpose: To understand how stories, music, worship and reflection shape faith experiences.

How to use listening resources:

- Listen in a calm space.
- Note:
 - Key messages or teachings
 - Emotional atmosphere (peaceful, joyful, reflective)
 - Any symbols or ideas mentioned
- Afterwards, share one thing that stood out to you and why.

This builds emotional literacy and empathy.

4. Watching

Purpose: To see how people practise their faith in everyday life.

How to approach viewing:

- Observe:
 - Places of worship
 - Clothing, symbols and rituals
 - Community celebrations and traditions
- Ask yourself:
 - *What does this show about what is valued?*
 - *How does this bring people together?*

This builds cultural understanding and awareness.

5. Researching

Purpose: To explore how beliefs influence actions, culture and global issues.

How to research effectively:

- Start with a clear question, such as:
 - *How do different religions celebrate major festivals?*
 - *How do faith groups respond to poverty or injustice?*
 - *What is the meaning behind a particular symbol or practice?*
- Compare information from more than one source.
- Present your findings clearly and respectfully.

This develops enquiry, interpretation and balanced evaluation.

6. Student-Led Tasks

Purpose: To practise speaking, listening and leading with kindness and confidence.

How to approach these tasks:

- Choose a topic that matters to you (e.g. kindness, forgiveness, community).
- Encourage others to share their views respectfully.
- Use phrases like:
 - *“I understand your perspective...”*
 - *“Another way to think about this might be...”*
 - *“We can agree to explore different viewpoints.”*

This builds respectful dialogue and emotional intelligence.

7. Creative Tasks

Purpose: To express understanding through artistic and imaginative work.

How to complete these tasks:

- Start with the *meaning* or message you want to express.
- Use symbols, colours and shapes thoughtfully.
- Reflect on:
 - How your artwork or poem expresses an idea (e.g. peace, hope, gratitude)

This nurtures empathy, reflection and symbolic thinking.

How to Manage Your Time

- Aim to complete **1–2 Supercurriculum activities per week.**
- Choose a mixture:
 - **One reflective or research activity**
 - **One creative or discussion-based activity**

How to Show Progress

- Keep a **Reflection Journal** with:
 - New things you learned

- Questions you are still thinking about
- Any ideas that challenged your perspective

Your learning can contribute to:

- House points
- Values awards
- School leadership roles

Reading

1. BBC Bitesize KS3 Religious Studies –
2. RE:Quest – Christianity explained –
3. DK Find Out: Religions of the world –
4. Britannica Kids: Islam overview –
5. Jewish Virtual Library (Judaism for children) –

Writing

1. Write a diary entry from the perspective of a person living through a religious festival.
2. Create a fact sheet about a place of worship after using BBC Bitesize –
3. Write a short essay comparing how two religions approach charity.
4. Draft your own moral code inspired by different religious teachings.
5. Summarise the key message of a parable or religious story in your own words.

Listening

1. BBC School Radio assemblies –
2. Hymns and worship songs for schools –
3. Storynory: Bible and myth stories –
4. RE Podcast for Kids –
5. Peace Out mindfulness podcast –

Watching

1. BBC Teach KS3 RE video clips –
2. BBC Bitesize: Festivals explained –
3. The Story of Rama and Sita (BBC) –
4. BBC Teach: My Life, My Religion series –
5. Religion for Kids (Judaism overview, YouTube) –

Researching

1. Research how different religions celebrate major festivals (BBC Bitesize) –
2. Investigate how faith groups respond to global issues (Christian Aid) –
3. Explore sacred texts online (Bible Gateway) –
4. Research the Five Pillars of Islam (BBC Bitesize) –
5. Compare architectural features of different places of worship –

Student-led Tasks

1. Lead a discussion on values that different religions share.
2. Organise a class quiz about world religions.
3. Present on how a religious leader inspired change in society.
4. Role-play a panel discussion with figures from different faiths.
5. Lead a reflection session on fairness or forgiveness.

Creative Tasks

1. Design a poster explaining a festival or tradition.
2. Create a storyboard of a religious story.
3. Produce artwork inspired by a religious symbol.
4. Write and perform a poem about peace or hope.
5. Build a simple model of a place of worship.

YEAR 8 RELIGIOUS EDUCATION

Why Supercurriculum Matters in Year 8 RE

Year 8 moves beyond learning “what religions believe” to **exploring how beliefs shape choices and communities**. Supercurriculum activities develop careful reading of sacred and contemporary texts, balanced argument on ethical issues, respectful comparison of worldviews (religious and non-religious), and clear communication. Pupils learn to distinguish description from evaluation, evidence from opinion, and to express their own views with reasons — excellent preparation for Upper KS3 and GCSE Philosophy/Religion/Ethics.

YEAR 8 RE — FEEDBACK TEST

“Understand deeply, compare fairly, argue respectfully”

Instructions: Rate each statement: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree. Add the short reflection after each strand.

A. Reading

1. I can summarise sacred or scholarly passages accurately.
 2. I recognise key terms (e.g., covenant, pilgrimage, ahimsa, ummah, agape, secularism).
 3. I can explain how a text is interpreted differently within a tradition.
 4. I can link a passage to a theme (justice, stewardship, forgiveness).
- Reflection:** Which text challenged you most and what helped you understand it?

B. Writing

1. I plan paragraphs that answer the precise question set.
 2. I use evidence (texts, practices, case studies) and explain significance.
 3. I use connectives to balance arguments (however, on the other hand, therefore).
 4. I finish with a reasoned conclusion that addresses counter-arguments.
- Reflection:** Which part of extended writing needs the most attention?

C. Listening

1. I follow talks/interviews and capture the speaker's main claim.
 2. I can identify reasons and examples used to support that claim.
 3. I recognise bias or assumption in spoken views.
 4. I can respond with a respectful, reasoned point.
- Reflection:** Which discussion or podcast sharpened your thinking?

D. Watching

1. I separate fact from interpretation in documentaries or clips.
 2. I notice how editing, images, and voiceover shape the message.
 3. I link what I see to accurate RE vocabulary and themes.
 4. I can suggest missing perspectives or questions.
- Reflection:** Which video changed how you think about a belief or ethical issue?

E. Researching

1. I find reliable sources and record them correctly.
 2. I take concise notes with headings (beliefs, practices, ethics, diversity).
 3. I compare sources and explain differences in viewpoint or emphasis.
 4. I use research to refine my own argument.
- Reflection:** What RE question would you like to investigate next?

F. Student-Led Tasks

1. I can lead a short discussion with open questions.
2. I summarise group ideas fairly and accurately.
3. I give kind, specific feedback on arguments.
4. I help the group reach a balanced conclusion.

Reflection: When did you help your group understand an issue better?

G. Creative Tasks

1. I enjoy communicating ideas through posters, timelines, podcasts, or role-play.
2. I can represent beliefs and practices accurately and sensitively.
3. I can challenge a common misconception with evidence.
4. I revise work after feedback to improve clarity and fairness.

Reflection: Which creative piece best shows your understanding and why?

Final Reflection

Choose one focus for this term (key-term precision, comparing interpretations, ethical evaluation, argument structure, source reliability). What two weekly actions will you take to improve?

YEAR 8 RE — INTERVENTION FRAMEWORK

(Apply the level matching the average score in each strand.)

READING

If score is 1–2 (Needs Support):

Read a one-page passage (sacred summary or scholar's explainer). Write three sentences: **main idea**, **one key term with your sentence**, **one question you still have**.

Outcome: Secure gist and vocabulary; identifies enquiry questions.

If score is 3 (Developing):

Read two short extracts on the same theme (e.g., charity, forgiveness). Produce a 120-word comparison: **agreement**, **difference**, **how context affects meaning**.

Outcome: Makes fair comparisons with relevant context.

If score is 4–5 (Secure/Advanced):

Read a contemporary commentary and a tradition-based response. Write a concise evaluation of **claims**, **evidence**, and **which is stronger and why**.

Outcome: Judges arguments with clear criteria.

WRITING

If score is 1–2 (Needs Support):

Build one PEEL paragraph weekly: **Point** → **Evidence** (text/practice) → **Explain significance** → **Link back to question**.

Outcome: Clear structure and relevance.

If score is 3 (Developing):

Write a 150-word balanced response using **Because/However/Therefore**. Include at least one accurate key term and one example.

Outcome: Structured balance and justified reasoning.

If score is 4–5 (Secure/Advanced):

Write an evaluation (160–180 words) on an ethical question. Include **two contrasting viewpoints, a counter-argument, and a decisive conclusion**.

Outcome: Sustained argument with weighing of reasons.

LISTENING

If score is 1–2 (Needs Support):

After a 5–8 minute talk, note **three facts** and **one claim**; retell in two sentences.

Outcome: Distinguishes information from argument.

If score is 3 (Developing):

Keep a **Claim–Evidence–Reasoning** grid while listening to an interview; add one clarifying question.

Outcome: Tracks reasoning and probes meaning.

If score is 4–5 (Secure/Advanced):

Write a 120-word critique of a spoken viewpoint: **assumptions, evidence quality, what further testimony/data is needed**.

Outcome: Evaluates spoken arguments critically.

WATCHING

If score is 1–2 (Needs Support):

Watch a short festival/place-of-worship clip. Record **what, why it matters, one**

symbol.

Outcome: Accurate summary with significance.

If score is 3 (Developing):

Watch a documentary segment. Identify **two perspectives** shown and **one that is missing**; suggest a question for that missing voice.

Outcome: Recognises representation and fairness.

If score is 4–5 (Secure/Advanced):

Compare a dramatised scene with a factual account. Write what is **added/omitted/emphasised** and the effect on audience understanding.

Outcome: Analyses interpretation vs history/teaching.

RESEARCHING

If score is 1–2 (Needs Support):

Create a fact card for a tradition: **origin, key figure, practice, why it matters today**; record source.

Outcome: Reliable basics with present-day relevance.

If score is 3 (Developing):

Research how one value (e.g., compassion, stewardship) appears in **two traditions or worldviews**. Write a paragraph with one example each.

Outcome: Links shared values to distinct expressions.

If score is 4–5 (Secure/Advanced):

Evaluate two sources with different stances on a live issue (e.g., medical ethics).

Judge **reliability** (origin, purpose, evidence) and state which you would use for an essay and why.

Outcome: Source criticism tailored to enquiry.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 60-second explanation of a key term with one example.

Outcome: Builds confidence with precise vocabulary.

If score is 3 (Developing):

Run a 5-minute group discussion using two open questions and end with a one-

sentence summary of what the group agreed.

Outcome: Guides respectful dialogue and summarises outcomes.

If score is 4–5 (Secure/Advanced):

Chair a mini-debate on an ethical scenario. Require **one piece of evidence** per speaker and produce a neutral closing statement.

Outcome: Facilitates balanced, evidence-based argument.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Design a poster that explains a practice with **two symbols** and their meanings.

Outcome: Communicates belief accurately in visual form.

If score is 3 (Developing):

Write a short monologue from a believer's viewpoint showing how a value guides a decision; add a two-sentence historian/theologian's note explaining sources.

Outcome: Demonstrates empathy and sourcing.

If score is 4–5 (Secure/Advanced):

Produce a 60–90 second explainer (audio/slide/video) correcting a **common misconception** with **two pieces of evidence**.

Outcome: Challenges error and communicates clearly.

Optional weekly routine (quick guide)

- **Mon:** One-page read + 3-sentence response
- **Tue:** PEEL paragraph on a belief/practice question
- **Wed:** Talk/podcast + Claim–Evidence–Reasoning notes
- **Thu:** Research card or value-comparison paragraph
- **Fri:** Creative communication task + reflection

If you'd like, I can continue with **Year 8 ESL / Spanish / Greek** in the same format, or compile everything into a **fillable Word/Forms pack** with auto-totalling and suggested next steps.

Είπες:

esl

To ChatGPT είπε:

Brilliant — here's the **Year 8 ESL (English as a Second Language)**

Supercurriculum package in clean, continuous UK English.

It mirrors your other subjects: **Why it matters** → **Feedback Test** → **Score-Aligned Interventions** (use the learner's average per strand: **1-2 = Needs Support**, **3 = Developing**, **4-5 = Secure/Advanced**). No tables; ready for Word or Forms.

ESL

Why super curriculum matters in ESL

Supercurriculum activities in ESL give learners extra practice in reading, writing, listening and speaking beyond the classroom. They help pupils build confidence, expand vocabulary, and develop the fluency needed to succeed in all subjects studied in English, while encouraging independent learning.

Supercurriculum Navigation Guide – ESL (English as a Second Language)

The ESL Supercurriculum helps you improve your English outside the classroom. It builds your confidence in speaking, understanding, reading and writing English in everyday situations. You do not need to complete every activity — choose the ones that interest you and practise regularly.

Each section below supports a different language skill. Use this guide to help you learn independently and track your progress.

1. Reading

Purpose: To build vocabulary, improve comprehension and develop confidence reading real English.

How to use this section:

- Choose a text that feels comfortable — not too easy, not too hard.
- Read slowly and highlight new words.
- Look up unfamiliar vocabulary and write it in your vocabulary journal.
- After reading, tell someone (or write) what the text was about in 3–5 sentences.

Tip: Re-reading the same text a second time greatly improves fluency.

2. Writing

Purpose: To practise forming sentences, expressing ideas and using new vocabulary.

How to approach writing tasks:

- Use your vocabulary journal each time you write.
- Try to include new words and expressions rather than repeating the same ones.
- Write clearly and simply — correctness is more important than complexity.
- Read your writing aloud to check rhythm and clarity.

Goal: To express your thoughts in English with increasing accuracy and confidence.

3. Listening

Purpose: To understand spoken English in different accents and situations.

How to use listening resources:

- Listen once without stopping to understand the general idea.
- Listen again and write down key words or phrases you recognise.
- If there are subtitles, use them only on the second or third listen.
- Try to repeat short sentences to practise pronunciation and rhythm.

This builds listening comprehension and natural language patterns.

4. Watching

Purpose: To see and hear real English used naturally.

How to approach viewing:

- Choose short videos (1–6 minutes) to avoid overload.
- Pause when needed to repeat useful expressions.
- Notice how speakers:
 - Use gestures
 - Link words together
 - Express emotions or politeness

- Try to copy tone, pace and expression.

This develops fluency and confidence in real conversation situations.

5. Researching

Purpose: To learn vocabulary and cultural knowledge that helps real-life communication.

How to research effectively:

- Start with simple sources (e.g., Simple Wikipedia).
- Collect vocabulary in categories (e.g., food, travel, hobbies, school).
- Use Cambridge Dictionary for pronunciation audio and example sentences.
- Create small presentations to explain what you learned to others.

This builds independent learning and cultural understanding.

6. Student-Led Tasks

Purpose: To practise speaking and listening in real interaction.

How to approach these tasks:

- Choose short, manageable speaking activities.
- Prepare key phrases before you speak.
- Speak slowly and clearly — confidence is more important than perfection.
- Encourage classmates using positive language:
 - *“Good try!”*
 - *“Let’s say it together.”*
 - *“Can you repeat that more slowly?”*

This develops oral communication and teamwork.

7. Creative Tasks

Purpose: To make English enjoyable, expressive and memorable.

How to complete these tasks:

- Use real-life situations (shopping, directions, introductions, hobbies).
- Practise dialogues with a friend or record yourself.
- Use expressive body language and tone to build natural conversation style.
- Have fun — creativity improves memory and fluency.

This nurtures confidence and practical communication skills.

How to Manage Your Time

- Aim to practise English **a little every day** (10–20 minutes).
- Choose **one reading, one listening, and one speaking or writing task** each week.
- Keep all work in a **Language Learning Portfolio** (notebook + digital folder).

How to Show Progress

Track progress by recording:

- New words learned each week
- Texts you read or videos you watched
- Sentences or dialogues you can now say confidently
- Speaking tasks you completed (voice notes, presentations, role-plays)

Your progress can be used for:

- House points
- English certificates
- Language proficiency portfolios
- Confidence in all school subjects taught in English

Reading

1. British Council LearnEnglish Teens –
2. News in Levels (graded news stories) –
3. Cambridge English stories and practice –
4. ESL Fast short stories –
5. Oxford Owl free eBooks –

Writing

1. Keep a daily vocabulary journal using new words from News in Levels –
2. Write a weekly blog-style entry about your school life.
3. Practise short emails or messages on Cambridge English –
4. Write a summary of a video you watched in English.
5. Create a story using at least 10 new words from the week.

Listening

1. British Council LearnEnglish Teens Listen & Watch –
2. BBC Learning English: The English We Speak –
3. ESL Pod –
4. Listen to children's audiobooks free on Storynory –
5. VOA Learning English: Listening practice –

Watching

1. BBC Learning English: Lingohack (news in simple English) –
2. English Addict YouTube channel –
3. LearnEnglish Teens Video Zone –
4. Easy English videos on YouTube –
5. TED-Ed short talks with subtitles –

Researching

1. Research English idioms or slang and make a glossary (BBC Learning English) –
2. Find out about a famous person and present 5 facts in English.
3. Research a hobby in English using Simple Wikipedia –
https://simple.wikipedia.org/wiki/Main_Page
4. Look up common phrasal verbs on Cambridge Dictionary –
5. Explore UK culture on LearnEnglish Teens –

Student-led Tasks

1. Lead a short vocabulary quiz for classmates.
2. Present a 2-minute talk on your favourite hobby.
3. Run a peer dictation exercise.
4. Teach a new idiom or expression each week.
5. Lead a group discussion on a News in Levels article –
<https://www.newsinlevels.com/>

Creative Tasks

1. Write and perform a short dialogue with a partner.
2. Make flashcards for new vocabulary.
3. Record yourself telling a story and play it back.
4. Design a poster with English phrases for the classroom.
5. Write and perform a role-play (shopping, travelling, etc.).

YEAR 8 ESL

Why Supercurriculum Matters in Year 8 ESL

Year 8 is the step from basic communication to **confident, purposeful English**. Supercurriculum activities build reading stamina, precise grammar, wider vocabulary, note-taking, and clear speech. Learners compare sources, plan and edit writing, understand different accents, and adapt language to audience and purpose. These habits accelerate progress across all subjects and prepare pupils for Upper KS3 and early GCSE skills.

YEAR 8 ESL — FEEDBACK TEST

“Read closely, speak clearly, write precisely”

Instructions: Rate each statement: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree. Add the short reflection after each strand.

A. Reading

1. I understand the main idea and key details in 2–3 page texts.
2. I can infer meaning that is not directly said.
3. I understand topic vocabulary and can use it later.
4. I compare two texts on the same topic.

Reflection: Which text challenged you most and how did you handle it?

B. Writing

1. I plan before writing and use paragraphs logically.
2. I use a range of sentence types and accurate punctuation.
3. I choose precise words and avoid repetition/fillers.

4. I edit for grammar (tenses, agreement, articles, prepositions).
Reflection: Which part of writing needs the most attention?

C. Listening

1. I understand short talks and conversations at natural speed.
2. I pick out numbers, names, and technical words reliably.
3. I follow multi-step instructions.
4. I can summarise what I heard in a few sentences.
Reflection: Which audio or speaker helped you improve?

D. Watching

1. I learn from video lessons, interviews, and explainer clips.
2. I notice tone, emphasis, and visual cues to support meaning.
3. I identify the structure (introduction, points, conclusion).
4. I can evaluate if a video explains clearly and fairly.
Reflection: Which video changed how you understand a topic?

E. Researching

1. I can find reliable sources and keep a reference list.
2. I take clear notes with headings and key words.
3. I compare two explanations and choose the clearer one.
4. I can use research notes in my own words.
Reflection: What topic will you research next?

F. Student-Led Tasks

1. I am comfortable leading a short discussion in English.
2. I ask helpful follow-up questions.
3. I give kind, specific feedback to a partner.
4. I summarise my group's ideas clearly.
Reflection: When did your leadership help others learn?

G. Creative Tasks

1. I create short talks, posters, or videos for an audience.
2. I use visuals and examples to make meaning clear.
3. I try different versions and choose the best one.
4. I present confidently and respond to questions.
Reflection: Which creative piece best shows your English this year?

Final Reflection

Choose a focus (reading inference, grammar accuracy, academic vocabulary, pronunciation/intonation, presentation skills). Name two weekly actions to improve.

YEAR 8 ESL — INTERVENTION FRAMEWORK

(Apply the level matching the average score in each strand.)

READING

If score is 1–2 (Needs Support):

Read one 1–2 page graded text weekly. Write three sentences: **main idea, two details, one new word with your sentence**. Highlight signal words (however, therefore, first).

Outcome: Secures gist, detail, and basic cohesion markers.

If score is 3 (Developing):

Read two short texts on the same topic. Write a 120-word comparison: **what they agree on, what differs, which is clearer and why**.

Outcome: Compares sources with simple evaluation.

If score is 4–5 (Secure/Advanced):

Read a longer article/chapter. Produce a paragraph using **Idea → Evidence (quote/figure) → Explanation → Inference**.

Outcome: Sustained, referenced summary with inference.

WRITING

If score is 1–2 (Needs Support):

Daily 8–10 sentence journal using **present/past**, articles, and basic linkers (and, but, because). Underline verbs; check capitals and full stops.

Outcome: Accurate core grammar and sentence control.

If score is 3 (Developing):

Write a 150-word paragraph (inform/explain). Use **topic sentence, three developed points with because/although/which**, and a closing sentence. Self-edit for articles and prepositions.

Outcome: Organised paragraphing with developing grammar range.

If score is 4–5 (Secure/Advanced):

Write a 180–200 word review, report, or email. Plan for **audience/tone**, include varied complex sentences, and perform a **two-pass edit** (content then grammar).

Outcome: Purposeful style, fluency, and accurate editing.

LISTENING

If score is 1–2 (Needs Support):

Listen to a 3–5 min clip daily. Note **three key words** and **one number/name**.

Replay once; write a two-sentence summary.

Outcome: Captures essentials and improves short-text comprehension.

If score is 3 (Developing):

Use a note frame: **Topic | Point 1 | Point 2 | Example | New word** during a talk.

Retell in 4–5 sentences.

Outcome: Structured notes and coherent retell.

If score is 4–5 (Secure/Advanced):

Listen to an interview/panel. Create a grid **Claim–Evidence–Viewpoint** and write a 120-word synthesis.

Outcome: Integrates multiple speakers' ideas.

WATCHING

If score is 1–2 (Needs Support):

Watch a short subtitled video. **Shadow** one sentence per scene (repeat with the speaker) and add one phrase to your bank.

Outcome: Builds pronunciation, rhythm, and phrase recall.

If score is 3 (Developing):

Watch an explainer. Map the structure: **Intro → Points → Example →**

Conclusion; write one question to check understanding.

Outcome: Recognises presentation structure; asks clarifying questions.

If score is 4–5 (Secure/Advanced):

Watch two clips on the same topic. Write a 100-word critique comparing clarity, examples, and balance.

Outcome: Evaluates communication and bias.

RESEARCHING

If score is 1–2 (Needs Support):

Build a weekly glossary (5 words): **word, part of speech, simple definition, your sentence.**

Outcome: Independent vocabulary growth and accurate use.

If score is 3 (Developing):

Research a science/history topic for another subject. Take **eight bullet notes** (keywords, short phrases) and a labelled diagram.

Outcome: Transfers English to curriculum learning.

If score is 4–5 (Secure/Advanced):

Compare two sources; paraphrase one paragraph from each into your notes. Add a one-line citation.

Outcome: Safe paraphrase and source awareness.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 60-second “Show & Tell” (object/photo). Use **what / where / why** structure.

Outcome: Builds confidence and basic fluency.

If score is 3 (Developing):

Host a 3-minute mini-chat. Prepare **five questions** and **two follow-ups** (Why? Which? How often?).

Outcome: Maintains conversation and listens actively.

If score is 4–5 (Secure/Advanced):

Give a 2–3 minute presentation with one slide. Include **opening, two points with examples, short conclusion**, and answer one audience question.

Outcome: Clear, audience-aware speaking.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Create a labelled poster or photo story (4–6 pictures) with present-tense captions.

Outcome: Communicates meaning with simple language and visuals.

If score is 3 (Developing):

Write and perform a short dialogue (asking for information, giving directions, solving a problem). Record and note two pronunciation fixes.

Outcome: Real-life language and pronunciation improvement.

If score is 4–5 (Secure/Advanced):

Produce a 60–90 second “How to...” video/blog (study tip, quick recipe, tech trick). Use signposting phrases (first, next, finally; in my opinion).

Outcome: Fluent, structured communication for an audience.

Optional weekly routine (quick guide)

- **Mon:** 2-page read + 3-sentence response
- **Tue:** Grammar edit on journal + vocabulary (5 words)
- **Wed:** Listening clip + note frame retell
- **Thu:** Research note-taking + paraphrase practice
- **Fri:** Speaking/presentation or creative task + reflection

If you’d like, I can produce **Year 8 Spanish or Greek** next in the same format, or bundle this into a **fillable Word/Forms pack** that auto-totals scores and suggests the correct interventions.

SPANISH

Why super curriculum matters in Spanish

Supercurriculum activities in Spanish help pupils practise language skills beyond the classroom. They encourage fluency in listening, speaking, reading and writing, while developing cultural knowledge of Spain and Latin America. These activities build confidence and prepare students for GCSE Spanish.

Supercurriculum Navigation Guide – Spanish

The Spanish Supercurriculum helps you practise the language beyond the classroom so you can communicate more confidently and understand more about Spanish-speaking cultures. You do not need to complete every activity — choose tasks that interest you and return to them regularly. Consistency is more important than doing everything at once.

Each section below develops a different aspect of Spanish language learning. Use this guide to help you learn independently and reflect on your progress.

1. Reading

Purpose: To build vocabulary, recognise sentence patterns and improve comprehension.

How to use this section:

- Read slowly and highlight new words.
- Look up unfamiliar vocabulary using **WordReference** and add it to your **vocabulary journal**.
- After reading, summarise the key idea in Spanish or English:
 - *¿De qué trata el texto?* (What is the text about?)
 - *¿Qué palabras nuevas aprendiste?* (What new words did you learn?)

Tip: Re-reading the same text helps build fluency and confidence.

2. Writing

Purpose: To practise forming sentences, expressing ideas and using new words in context.

How to approach writing tasks:

- Keep entries short and simple at first — accuracy matters more than length.
- Use sentence starters to help you:
 - **Hoy...** (Today...)
 - **Me gusta porque...** (I like it because...)
 - **Creo que...** (I think that...)
- Check spelling and accents using an online dictionary or keyboard.

Goal: To develop clarity, accuracy and expression when writing in Spanish.

3. Listening

Purpose: To understand spoken Spanish and recognise common phrases and natural rhythm.

How to use listening resources:

- Listen once to get the general meaning (don't worry about every word).
- Listen again and write down 3–5 words or expressions you recognise.
- Practise repeating short phrases aloud to build pronunciation and confidence.

This helps you feel more comfortable understanding Spanish in conversation.

4. Watching

Purpose: To see and hear real Spanish in use.

How to approach viewing:

- Start with **slow Spanish** videos or songs with lyrics.
- Use Spanish audio + **English subtitles**, then switch to **Spanish subtitles** if possible.
- Notice:
 - Pronunciation
 - Intonation (rise and fall in speech)
 - Common everyday expressions

This supports fluency, pronunciation and cultural understanding.

5. Researching

Purpose: To explore the cultures, traditions and countries where Spanish is spoken.

How to research effectively:

- Pick one topic at a time (e.g., a festival, food, city, artist).
- Collect 5 key facts and 5 key vocabulary words.
- Share what you learned through a short presentation, poster or mini-chat.

This builds cultural awareness, curiosity and motivation to use the language.

6. Student-Led Tasks

Purpose: To practise speaking and build confidence interacting with others in Spanish.

How to approach these tasks:

- Choose short and manageable speaking activities.
- Prepare useful phrases before you speak.
- Encourage classmates with positive language:
 - *¡Muy bien!* (Very good!)
 - *Inténtalo otra vez.* (Try it again.)
 - *Vamos juntos.* (Let's do it together.)

This strengthens communication, teamwork and fluency.

7. Creative Tasks

Purpose: To use Spanish in imaginative and meaningful ways.

How to complete these tasks:

- Use topics you enjoy — music, food, travel, hobbies.
- Try speaking out loud as much as possible, even if it feels challenging.
- Use colour, images or gestures to help remember new vocabulary.

This builds confidence, memory and expression.

How to Manage Your Time

- Practise a little **every day** (even 10 minutes is effective).
- Each week, try to do:
 - **1 reading task**
 - **1 listening task**
 - **1 speaking or writing task**

How to Show Progress

Record in your **Language Learning Log**:

- New vocabulary (with translations and example sentences)
- Texts and videos you explored
- Sentences or dialogues you can now say confidently

Your progress can support:

- House points
- Language certificates
- GCSE Spanish preparation
- Confidence in real-life communication

Reading

1. BBC Bitesize KS3 Spanish –
2. Duolingo Stories (Spanish) –
3. LingQ library of Spanish texts –
4. News in Slow Spanish (transcripts) –
5. El Mundo “Junior” news section –

Writing

1. Keep a vocabulary and phrase journal using BBC Bitesize –
2. Write a short diary in Spanish (3–5 sentences per day).
3. Create a postcard from a Spanish-speaking country.
4. Practise writing dialogues on Duolingo –
5. Write a simple recipe in Spanish for your favourite food.

Listening

1. Coffee Break Spanish podcast –
2. BBC Bitesize Spanish listening activities –
3. Duolingo Podcasts (Spanish) –
4. SpanishPod101 free audio lessons –
5. Mi Vida Loca (BBC interactive drama) –

Watching

1. BBC Bitesize Spanish videos –
2. Dreaming Spanish YouTube channel –
3. Easy Spanish YouTube –
4. Netflix Kids shows with Spanish audio & English subtitles.
5. Spanish songs with lyrics on Lyricstraining –

Researching

1. Research a Spanish-speaking country on Spanish4Teachers –
2. Explore Spanish festivals (e.g. La Tomatina, Día de los Muertos).
3. Learn about Spanish food traditions –
4. Use WordReference to research tricky vocabulary –
5. Research famous Spanish artists like Picasso or Frida Kahlo.

Student-led Tasks

1. Lead a quiz on Spanish vocabulary.
2. Teach classmates a short Spanish dialogue.
3. Present a Spanish festival or tradition.
4. Lead a “Spanish-only” conversation circle for 5 minutes.
5. Run a game of charades using Spanish words.

Creative Tasks

1. Design a poster of classroom phrases in Spanish.
2. Write and perform a role-play (restaurant, shopping, travel).
3. Record yourself reading a Spanish poem aloud.
4. Create flashcards with images for key vocabulary.
5. Write Spanish captions for a comic strip.

YEAR 8 SPANISH (MFL)

Why Supercurriculum Matters in Year 8 Spanish

Year 8 is the step from survival phrases to **confident, purposeful communication**. Supercurriculum tasks build reading stamina, listening across accents and speeds, accurate core grammar (present, near future, preterite), and richer vocabulary for school life, free time, food, town, technology and travel. Pupils learn to plan and edit writing, speak with better pronunciation and intonation, and engage with Spanish-speaking cultures — excellent preparation for Upper KS3 and early GCSE skills.

YEAR 8 SPANISH — FEEDBACK TEST

“Lee con atención, escucha con foco, habla y escribe con intención”

Instructions: Rate each statement: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree. Add the short reflection after each strand.

A. Reading

1. I understand main ideas and key details in 1–2 page texts (blogs, articles, stories).
2. I can infer meaning of unfamiliar words from context.
3. I recognise time markers and connectives (ayer, luego, mientras, sin embargo).
4. I can compare two texts on the same topic.

Reflection: Which text challenged you most and how did you handle it?

B. Writing

1. I plan before writing and organise paragraphs clearly.
2. I use present (presente), near future (ir a + infinitivo) and preterite (pretérito) with reasonable accuracy.
3. I use connectives and justifiers (porque, aunque, ya que, entonces).
4. I edit for accents, agreement and verb endings.

Reflection: Which part of writing needs the most attention?

C. Listening

1. I understand short talks/conversations at natural speed on familiar topics.
2. I can pick out numbers, times, opinions and reasons.
3. I follow sequences and instructions.
4. I can summarise what I heard in a few sentences (in English or simple Spanish).

Reflection: Which audio helped you improve and why?

D. Watching

1. I learn well from video lessons, interviews and short vlogs.
2. I notice pronunciation, intonation and body language.
3. I can map the structure (introducción, puntos, ejemplo, conclusión).
4. I can evaluate if a video explained clearly and fairly.

Reflection: Which video changed how you understand a topic?

E. Researching

1. I can find reliable cultural information and short authentic texts.
2. I take clear notes with headings and key phrases.
3. I compare two explanations and choose the clearer one.

4. I can use research notes in my own words.

Reflection: What Spanish-speaking place, festival or issue will you research next?

F. Student-Led Tasks

1. I can lead a short pair speaking activity.
2. I ask helpful follow-up questions (¿Por qué?, ¿Cuál?, ¿Con qué frecuencia?).
3. I give kind, specific feedback on pronunciation or accuracy.
4. I summarise my group's ideas clearly.

Reflection: When did your leadership help others practise better?

G. Creative Tasks

1. I create short dialogues, slides or videos for an audience.
2. I use images and examples to make meaning clear.
3. I try different versions and choose the best one.
4. I present confidently and respond to questions.

Reflection: Which creative piece best shows your Spanish this year?

Final Reflection

Choose a focus (tense control, opinion-and-reason chains, pronunciation/intonation, reading inference, presentation skills). Name two weekly actions to improve.

YEAR 8 SPANISH — INTERVENTION FRAMEWORK

(Apply the level matching the average score in each strand.)

READING

If score is 1–2 (Needs Support):

Read one graded 1–2 page text weekly. Highlight **cognates** and **signal words** (primero, luego, sin embargo). Write three sentences: **idea principal**, **dos detalles**, **una palabra nueva** with your sentence.

Outcome: Secures gist, detail and basic cohesion markers.

If score is 3 (Developing):

Read two short texts on the same topic (rutina, tecnología, comida). Write a 120-word comparison: **en común**, **diferencias**, **opiniones y razones** quoted.

Outcome: Compares sources and reports viewpoints with linkers.

If score is 4–5 (Secure/Advanced):

Read a longer article/story chapter. Produce a paragraph using **Idea** → **Cita breve** → **Explicación** → **Inferencia** (what is implied).

Outcome: Sustained summary with evidence and inference.

WRITING

If score is 1–2 (Needs Support):

Daily 8–10 sentence diary using **presente** + set opinions (me gusta/no me gusta + porque). Check **subject–verb agreement** and accents (está, también).

Outcome: Accurate core sentences and routine fluency.

If score is 3 (Developing):

Write a 150-word blog/email combining **presente** + **futuro cercano** (voy a...); include at least **five** connectives (y, pero, porque, entonces, aunque). Finish with a closing sentence.

Outcome: Organised paragraphing with two tenses and cohesive devices.

If score is 4–5 (Secure/Advanced):

Write 170–200 words for a GCSE-style task (describe/argue). Include **presente** + **futuro cercano** + **pretérito**, three justified opinions, and a two-pass edit (content → grammar).

Outcome: Purposeful style, tense range and accurate editing.

LISTENING

If score is 1–2 (Needs Support):

Listen daily to a 3–5 minute slow clip. Note **tres palabras clave** and **un número/hora**. Replay once; write a two-sentence resumen.

Outcome: Captures essentials; improves short-text comprehension.

If score is 3 (Developing):

Use a frame during a talk/dialogue: **Tema** | **Punto 1** | **Punto 2** | **Ejemplo** | **Palabra nueva**; retell in 4–5 sentences.

Outcome: Structured notes and coherent retell.

If score is 4–5 (Secure/Advanced):

Listen to two opinions (interview or vlog). Create a grid **Afirmación–Evidencia–Punto de vista** and write a 120-word synthesis.

Outcome: Integrates multiple speakers' ideas accurately.

WATCHING

If score is 1–2 (Needs Support):

Watch a subtitled video. **Shadow** one sentence per scene (repeat with the speaker). Add one phrase to your bank (por ejemplo, en mi opinión).

Outcome: Builds pronunciation, rhythm and phrase recall.

If score is 3 (Developing):

Watch an explainer or vlog. Map the structure: **Introducción** → **Puntos** → **Ejemplo** → **Conclusión**; write one checking question.

Outcome: Recognises presentation structure; asks clarifying questions.

If score is 4–5 (Secure/Advanced):

Watch two clips on the same topic. Write a 100-word critique comparing **claridad**, **ejemplos**, **equilibrio de puntos de vista**.

Outcome: Evaluates communication and balance.

RESEARCHING

If score is 1–2 (Needs Support):

Build a weekly glossary (5 words): **palabra**, **categoría gramatical**, **definición simple**, **tu frase**.

Outcome: Independent vocabulary growth and accurate use.

If score is 3 (Developing):

Research a place/festival/food. Take **ocho notas** (keywords/short phrases) and add a labelled image or mini-map in Spanish (norte/sur, costa, capital).

Outcome: Transfers reading to culture with basic mapping language.

If score is 4–5 (Secure/Advanced):

Compare two short sources on the same cultural topic. Paraphrase one paragraph from each into your notes and add a one-line citation.

Outcome: Safe paraphrase and source awareness.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 60-second **Show & Tell** (foto/objeto): **qué es**, **de dónde es**, **por qué te**

gusta.

Outcome: Builds speaking confidence with simple structures.

If score is 3 (Developing):

Run a 3-minute mini-chat. Prepare **cinco preguntas** and **dos repreguntas** (¿por qué?, ¿con quién?, ¿cada cuánto?).

Outcome: Maintains conversation; listens actively.

If score is 4–5 (Secure/Advanced):

Give a 2–3 minute presentation with one slide. Include **apertura, dos puntos con ejemplos, conclusión breve** and answer one question.

Outcome: Clear, audience-aware speaking.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Create a labelled poster or photo story (4–6 pictures) with present-tense captions (Vivo..., Me gusta..., Hay...).

Outcome: Communicates meaning with simple language and visuals.

If score is 3 (Developing):

Write and perform a role-play (en el restaurante / en la tienda / planes para el fin de semana). Record and note two pronunciation fixes (rr, j, ll).

Outcome: Real-life language and pronunciation improvement.

If score is 4–5 (Secure/Advanced):

Produce a 60–90 second “Cómo...” video/blog (tu rutina, una receta, un consejo de estudio). Use signposting phrases (primero, después, finalmente; en mi opinión).

Outcome: Fluent, structured communication for an audience.

Optional weekly routine (quick guide)

- **Mon:** 2-page read + 3-sentence response
- **Tue:** Grammar edit on diary + 5-word glossary
- **Wed:** Listening clip + note-frame retell
- **Thu:** Culture research + mini-map/labelled image
- **Fri:** Speaking task or creative piece + reflection

If you'd like, I can produce **Year 8 Greek** next in the same format, or bundle this into a **fillable Word/Forms pack** that auto-totals scores and suggests the matching interventions.

Είπες:

greek

To ChatGPT είπε:

Perfect — here's the **Year 8 Greek (Modern Greek Language) Supercurriculum package**, written in clear UK English, following your standard structure:

Why it matters → Feedback Test → Score-Aligned Interventions, using the same scoring guide (1–2 = **Needs Support**, 3 = **Developing**, 4–5 = **Secure/Advanced**).

Ready for Word or Microsoft Forms — no tables.

GREEK

Why super curriculum matters in Greek

Supercurriculum activities in Greek help pupils practise reading, writing, listening and speaking in one of the world's oldest languages. They support vocabulary development, grammar practice, and cultural understanding of Greece and Cyprus, preparing learners for further study or GCSE Greek.

Supercurriculum Navigation Guide – Greek

The Greek Supercurriculum helps you practise reading, writing, listening and speaking in one of the world's oldest and most influential languages. It supports vocabulary growth, grammar accuracy and cultural understanding of Greece and Cyprus. You do not need to complete every activity — choose tasks that interest you and return to them regularly.

Each section below develops a different aspect of Greek language learning. Use this guide to study independently and reflect on your progress.

1. Reading

Purpose: To build vocabulary, recognise sentence patterns and improve comprehension.

How to use this section:

- Start with short, familiar topics (alphabet, greetings, daily life).
- Read slowly; highlight new words and note the accent marks.
- Add new vocabulary (with gender and plural forms) to your **Vocabulary Notebook**.
- After reading, summarise the text in 2–4 sentences (Greek or English).

Tip: Re-read the same passage after a day — fluency improves noticeably.

2. Writing

Purpose: To practise accurate spelling, basic grammar and everyday expression.

How to approach writing tasks:

- Keep entries short and focused: 3–5 sentences daily.
- Use sentence starters:
 - **Σήμερα...** (Today...)
 - **Μου αρέσει γιατί...** (I like it because...)
 - **Πηγαίνω/Πήγα...** (I go / I went...)
- Check accents and verb endings; use WordReference for quick look-ups.

Goal: To write clearly and correctly, gradually increasing length and complexity.

3. Listening

Purpose: To understand spoken Greek and get used to rhythm, stress and intonation.

How to use listening resources:

- First listen for the *gist* without pausing.
- Listen again and note 5 words/phrases you recognise.
- Shadow (repeat along with the speaker) short sentences to build pronunciation.
- If transcripts exist, use them only on the second or third listen.

This builds comprehension and natural pronunciation.

4. Watching

Purpose: To see everyday Greek used naturally in conversations, songs and short clips.

How to approach viewing:

- Begin with **slow speech** or children's content; enable **Greek subtitles** if available.
- Notice:
 - Stress patterns and liaison between words
 - Everyday phrases (e.g., **τι κάνεις;**, **ευχαριστώ**, **παρακαλώ**)
- Pause to repeat lines; mimic tone and gesture to build fluency.

This supports confidence and real-life communication.

5. Researching

Purpose: To connect language with culture, history and daily life.

How to research effectively:

- Choose one topic (festival, food, myth, city, famous figure).
- Collect **5 key facts** and **10 useful words/phrases** related to the topic.
- Create a mini poster or slide in Greek + English to share with others.

This builds cultural awareness and motivation to use the language.

6. Student-Led Tasks

Purpose: To practise speaking and leading short activities in Greek.

How to approach these tasks:

- Prepare key phrases and a simple objective (e.g., greetings, ordering food).
- Encourage peers with supportive expressions:
 - **Μπράβο!** (Well done!)
 - **Πάμε μαζί.** (Let's do it together.)
 - **Ξανά παρακαλώ.** (Again, please.)
- Keep activities short (3–5 minutes) and repeat for confidence.

This strengthens communication and teamwork.

7. Creative Tasks

Purpose: To use Greek in memorable, enjoyable ways.

How to complete these tasks:

- Combine visuals + text (alphabet posters, labelled drawings, comic strips).
- Write short dialogues and *perform* them; record and play back for feedback.
- Create simple songs or chants to fix vocabulary and verb forms in memory.

This nurtures expression, recall and enjoyment.

How to Manage Your Time

- Practise **a little every day** (10–20 minutes).
- Each week, try:
 - **1 reading + 1 listening**
 - **1 writing or 1 speaking/role-play**
- Keep all work in a **Greek Learning Portfolio** (notebook + digital folder).

How to Show Progress

Track in your portfolio:

- New words (with gender, plural, example sentence)
- Phrases you can say without notes
- Texts/videos completed (with short summaries)
- Audio recordings of your speech (monthly check-ins)

Your progress can support:

- House points and language awards
- Preparation for GCSE Greek or further study
- Real-life communication with Greek speakers

Reading

1. BBC Languages: Greek basics –
2. Filoglossia+ interactive lessons (Hellenic Ministry of Education) –
3. Lexilogos Greek reading tools –
4. Greek news in simple language (in.gr “Young Readers”) –
5. Online Greek Reader (University of Texas) –

Writing

1. Keep a Greek vocabulary notebook with example sentences.
2. Write a short diary in Greek (3–5 sentences daily).
3. Translate a simple English poem or song lyric into Greek.
4. Write postcards from Athens, Thessaloniki, or a Greek island.
5. Practise writing short dialogues using Filoglossia+ –

Listening

1. BBC Languages “Talk Greek” audio –
2. Ellinopoula interactive songs & audio –
3. GreekPod101 free audio lessons –
4. Simple Greek audiobooks (Librivox Greek texts) –
5. Watch Greek music videos with lyrics on Lyricstraining –

Watching

1. BBC “Talk Greek” video episodes –
2. Easy Greek (YouTube street interviews with subtitles) –
3. Greek Kids’ TV clips (ERT Archive) –
4. Cartoon episodes dubbed in Greek on YouTube.
5. TEDx Talks in Greek with English subtitles –

Researching

1. Research Greek festivals (e.g. Easter, Apokries).
2. Explore Greek food traditions (BBC Travel) –
3. Study Greek myths and legends (Theoi Project) –
4. Research a famous Greek historical figure (Alexander, Pericles, etc.).
5. Use WordReference Greek dictionary –

Student-led Tasks

1. Teach classmates 10 everyday Greek phrases.
2. Lead a role-play (restaurant or market scene).
3. Present a Greek festival or tradition.
4. Organise a quiz on Greek alphabet and numbers.
5. Read a short passage aloud to practise pronunciation.

Creative Tasks

1. Design a poster of the Greek alphabet with pictures.
2. Write and act out a short scene in Greek.
3. Create flashcards with Greek vocabulary and images.
4. Compose a simple song or chant in Greek.
5. Draw a comic strip with Greek speech bubbles.

YEAR 8 GREEK (Modern Greek)

Why Supercurriculum Matters in Year 8 Greek

Year 8 learners move from basic conversation to **expressing ideas clearly and accurately in different situations**. The Supercurriculum builds strong grammar foundations (present, future, past tenses), richer vocabulary, pronunciation and comprehension across different accents. Pupils learn to speak with confidence, write short paragraphs with purpose, and connect language to Greek history, geography, and culture. This prepares them for Upper KS3 and early GCSE-level communication, both in formal and informal contexts.

YEAR 8 GREEK — FEEDBACK TEST

“Διάβασε προσεκτικά, μίλησε με αυτοπεποίθηση, γράψε με σαφήνεια.”
(Read carefully, speak confidently, write clearly.)

Instructions: Rate each statement: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree. After each strand, write a short reflection.

A. Reading

1. I understand the main idea and key details in short stories, dialogues, and articles.

2. I can use context to guess the meaning of new words.
3. I recognise tenses and time expressions (χθες, αύριο, τώρα, πάντα).
4. I can summarise what I read in my own words.

Reflection: Which text challenged you most, and what helped you understand it?

B. Writing

1. I plan short texts with clear purpose (description, email, story, opinion).
2. I use correct grammar (verb endings, agreement, articles).
3. I use connectives (και, αλλά, γιατί, επειδή, όταν, αφού) to extend ideas.
4. I review and correct my writing for spelling and accents.

Reflection: Which writing skill needs more attention?

C. Listening

1. I understand main ideas in everyday conversations and recordings.
2. I can identify people, places, numbers, and opinions.
3. I can follow the order of events in a story or dialogue.
4. I can summarise what I heard in a few sentences.

Reflection: Which listening activity helped you improve most?

D. Watching

1. I understand short video lessons and interviews.
2. I notice gestures, tone, and rhythm to support meaning.
3. I recognise familiar expressions and pronunciation patterns.
4. I can evaluate if a speaker expresses themselves clearly and naturally.

Reflection: Which video changed how you understand Greek language or culture?

E. Researching

1. I can find reliable Greek websites, songs, or videos for learning.
2. I take clear notes with new words and examples.
3. I compare two sources and decide which explains better.
4. I can use research notes in my own projects or presentations.

Reflection: What Greek topic or cultural area would you like to research next?

F. Student-Led Tasks

1. I can lead a short conversation or vocabulary review.
2. I ask helpful follow-up questions (Τι; Πού; Πότε; Γιατί; Πώς;).

3. I give kind and useful feedback to my partner.
 4. I summarise my group's ideas clearly in Greek or English.
- Reflection:** When did you help your group learn new vocabulary or grammar?

G. Creative Tasks

1. I can create short dialogues, posters, or slideshows in Greek.
 2. I include visuals or examples to make meaning clearer.
 3. I try different ways of expressing ideas (changing tense, structure).
 4. I present confidently and answer questions in Greek.
- Reflection:** Which creative piece shows your best Greek work this year?

Final Reflection

Choose a focus (vocabulary growth, tense control, pronunciation, reading comprehension, writing accuracy, cultural awareness). Name two weekly actions to improve.

YEAR 8 GREEK — INTERVENTION FRAMEWORK

(Apply the level matching the average score in each strand.)

READING

If score is 1–2 (Needs Support):

Read a short 100–150-word passage weekly (dialogue, story, or article). Write three sentences: **main idea**, **two new words**, **one question about the text**.

Outcome: Understands the gist and begins to use new vocabulary.

If score is 3 (Developing):

Read two short texts on the same theme (π.χ. φαγητό, οικογένεια, σχολείο). Write a 100-word comparison using connectives (και, όμως, επίσης, διαφορετικά).

Outcome: Compares topics and opinions using simple structures.

If score is 4–5 (Secure/Advanced):

Read a longer article or story. Write a paragraph summarising **main events**, **emotions**, and **what you learned**.

Outcome: Detailed comprehension and interpretation.

WRITING

If score is 1–2 (Needs Support):

Write daily 6–8 sentence texts (about you, your day, or family). Check verbs in **present tense** and correct spelling with an online dictionary.

Outcome: Builds consistent grammar and confidence.

If score is 3 (Developing):

Write a 120-word paragraph using **past** (παρετατικός/αόριστος) and **future** (μέλλοντας) tenses. Include **3 connectives** and **1 opinion** (Νομίζω ότι...).

Outcome: Expands tense use and sentence variety.

If score is 4–5 (Secure/Advanced):

Write a 150–180-word story, article, or letter. Use **three tenses**, at least **five connectives**, and edit twice (ideas → grammar).

Outcome: Fluent, cohesive, and grammatically secure writing.

LISTENING

If score is 1–2 (Needs Support):

Listen to a short recording twice. Note **three words**, **one number**, **one emotion**; retell in 2–3 sentences.

Outcome: Captures main points and meaning cues.

If score is 3 (Developing):

Listen to a story or conversation. Write 4–5 short notes (ποιος, πού, τι, γιατί, αποτέλεσμα).

Outcome: Organises notes and summaries effectively.

If score is 4–5 (Secure/Advanced):

Listen to a podcast/interview. Write a 100-word summary of **opinions**, **examples**, and **conclusion**.

Outcome: Understands viewpoint and supporting evidence.

WATCHING

If score is 1–2 (Needs Support):

Watch a subtitled Greek video (song, cartoon, short clip). Repeat **three phrases aloud**; write their meaning in English.

Outcome: Builds listening–speaking link and pronunciation.

If score is 3 (Developing):

Watch a vlog or short show. Identify **topic**, **two opinions**, and **one cultural element** (food, music, tradition).

Outcome: Expands comprehension and cultural awareness.

If score is 4–5 (Secure/Advanced):

Watch two clips on the same theme. Write a 100-word comparison of **tone**, **vocabulary**, and **perspective**.

Outcome: Evaluates communication style and nuance.

RESEARCHING

If score is 1–2 (Needs Support):

Build a glossary (5–10 new words weekly): **Greek → English, part of speech, one example sentence**.

Outcome: Strengthens independent vocabulary learning.

If score is 3 (Developing):

Research a Greek region, custom, or holiday. Write **six notes** (τι, πού, πότε, γιατί, πώς, ποιος). Add one photo with a Greek caption.

Outcome: Connects language to cultural context.

If score is 4–5 (Secure/Advanced):

Research a social or historical topic (π.χ. ελληνική μουσική, αθλητισμός, περιβάλλον). Write a short paragraph linking facts, opinions, and language examples.

Outcome: Integrates culture, reasoning, and expression.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 1-minute **Show & Tell** (αντικείμενο ή φωτογραφία): **τι είναι, πού το βρήκες, γιατί το διάλεξες**.

Outcome: Builds confidence with structured speaking.

If score is 3 (Developing):

Run a 3-minute mini-chat. Prepare **πέντε ερωτήσεις** and **δύο επαναληπτικές (follow-up)** (Πώς νιώθεις; Ποια προτιμάς;).

Outcome: Maintains simple dialogue and uses questioning.

If score is 4–5 (Secure/Advanced):

Give a 2–3 minute presentation with one slide. Include **εισαγωγή, δύο κύρια σημεία με παραδείγματα, συμπέρασμα.**

Outcome: Clear, fluent presentation using formal tone and varied grammar.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Create a poster or mini-booklet describing your town or school with labelled pictures and sentences.

Outcome: Communicates meaning visually and linguistically.

If score is 3 (Developing):

Write and perform a dialogue (στο εστιατόριο / στο μαγαζί / στο σχολείο). Record and note two pronunciation corrections.

Outcome: Builds fluency and pronunciation accuracy.

If score is 4–5 (Secure/Advanced):

Produce a 60–90 second video or blog post (π.χ. “Η αγαπημένη μου μέρα στην Ελλάδα”). Use three tenses and at least five connecting words.

Outcome: Fluent, expressive communication with authentic phrasing.

Optional weekly routine (quick guide)

- **Mon:** Read 1-page Greek text + 3-sentence summary
- **Tue:** Grammar focus + short writing piece
- **Wed:** Listening/YouTube clip + vocabulary list
- **Thu:** Culture research + short paragraph
- **Fri:** Speaking or creative presentation + reflection

Would you like me to continue with **Year 8 PSHE & Citizenship** next — in the same structure — to complete the set?

PSHE & CITIZENSHIP

Why super curriculum matters in PSHE & Citizenship

Supercurriculum activities in PSHE & Citizenship help pupils understand themselves and others, encouraging resilience, respect and responsibility. They support wellbeing, develop critical thinking about social issues, and prepare pupils to take an active role in their communities.

Supercurriculum Navigation Guide – PSHE & Citizenship

The PSHE & Citizenship Supercurriculum helps you understand yourself and others, make healthy choices, and contribute positively to your community. You are not expected to complete every activity — choose tasks that feel relevant and build your confidence over time.

Each section below targets a different aspect of personal development and active citizenship. Use this guide to approach tasks thoughtfully and reflect on what you learn.

1. Reading

Purpose: To build knowledge of wellbeing, rights, responsibilities and current issues.

How to use this section:

- Select one short article or page at a time.
- Note key ideas, new terms (e.g., *resilience*, *consent*, *advocacy*), and any questions.
- Summarise the main point in 3–4 sentences:
 - *What is the issue? Who is affected? What solutions are suggested?*

Tip: Keep a glossary of PSHE & citizenship vocabulary.

2. Writing

Purpose: To practise expressing views clearly and respectfully, with evidence.

How to approach writing tasks:

- Plan with **point** → **evidence** → **explanation**.
- For letters or persuasive pieces: state your position, use facts, propose a realistic action.
- For wellbeing journals: be specific about feelings, triggers and helpful strategies.

Goal: To communicate responsibly and constructively.

3. Listening

Purpose: To develop focus, empathy and self-regulation.

How to use listening resources:

- Choose audio for your goal:
 - **Calm & reset:** mindfulness, breathing exercises
 - **Learn & reflect:** stories about relationships, kindness, community
- Jot one idea you will *try today* (e.g., a breathing technique, a kind action).

This supports emotional literacy and everyday wellbeing.

4. Watching

Purpose: To see issues explained through real examples and short explainers.

How to approach viewing:

- Identify: the problem, whose viewpoints are shown, and possible solutions.
- Pause to note practical tips (e.g., reporting concerns, bystander actions).
- Share one takeaway with a friend or family member.

This builds practical understanding and confidence to act.

5. Researching

Purpose: To understand systems (rights, democracy, services) and how to get involved.

How to research effectively:

- Start with a clear question:
 - *How does Parliament make laws?*

- *What support exists for young people's mental health?*
 - *How do charities use volunteers?*
- Gather 5 key facts and 2 ways young people can contribute.

This develops informed, active citizenship.

6. Student-Led Tasks

Purpose: To practise respectful discussion, organisation and peer support.

How to approach these tasks:

- Set a clear aim (e.g., “share one positive, one challenge, one goal”).
- Establish ground rules: listen, no interruptions, kind language, confidentiality where appropriate.
- Encourage participation and summarise agreed actions.

This builds leadership, trust and teamwork.

7. Creative Tasks

Purpose: To express positive messages and promote inclusive, healthy communities.

How to complete these tasks:

- Choose a focused message (e.g., anti-bullying, online safety, healthy habits).
- Keep designs clear and accessible: strong headline, 2–3 key points, a call to action.
- Test your message with peers and refine based on feedback.

This nurtures agency, clarity and community impact.

How to Manage Your Time

- Aim for **1–2 Supercurriculum activities per week**.
- Balance **knowledge tasks** (reading/research) with **wellbeing or action tasks** (journals, campaigns).
- Keep a **PSHE & Citizenship Portfolio** (notes, reflections, plans, evidence of participation).

How to Show Progress

Record:

- New ideas or strategies you tried (e.g., study-break routine, breathing exercise)
- Actions taken (letters sent, volunteering, class initiatives)
- Skills developed (listening, teamwork, public speaking)
- Reflections: *What changed for me or for others?*

Your portfolio can support:

- House points and certificates
- Student leadership roles and references
- Evidence for awards or community projects

Reading

1. BBC Bitesize PSHE & Citizenship –
2. Childline: Coping with feelings –
3. Newsround: Children's news explained –
4. YoungMinds wellbeing advice –
5. UNICEF: Children's Rights Convention –

Writing

1. Keep a wellbeing journal: record one positive, one challenge, and one goal each week.
2. Write a persuasive letter to your MP on a current youth issue (Newsround) –
3. Create a poster of your top five rights using UNICEF resources –
4. Draft a class respect charter with your peers.
5. Summarise an article from YoungMinds in your own words –

Listening

1. Peace Out mindfulness podcast –
2. Brains On! episodes about friendships and wellbeing –
3. Childline Calm Zone audio guides –
4. Wow in the World: episodes on kindness and community –
5. BBC School Radio “Life Stories” –

Watching

1. BBC Bitesize PSHE & Citizenship videos –
2. Newsround special reports –
3. World’s Largest Lesson (UN Global Goals) –
4. Sesame Street kindness and respect clips –
5. TED-Ed “Acts of Kindness” –

Researching

1. Investigate how charities support young people (BBC Newsround) –
2. Research volunteering opportunities for teenagers –
3. Explore how UK Parliament works (Education Service) –
4. Learn about mental health campaigns (YoungMinds) –
5. Research how the UN protects children’s rights (UNICEF) –

Student-led Tasks

1. Lead a short debate on a current issue from Newsround.
2. Organise a peer wellbeing check-in.
3. Create and run a quiz on children’s rights.
4. Lead a discussion on the impact of social media.

5. Coordinate a teamwork activity that builds trust and cooperation.

Creative Tasks

1. Design a campaign poster about anti-bullying.
2. Create an infographic about healthy lifestyle choices.
3. Write and perform a short role-play about resolving conflict.
4. Produce a video encouraging kindness and inclusion in school.
5. Make a comic strip showing how to stand up for someone's rights.

YEAR 8 PSHE & CITIZENSHIP

Why Supercurriculum Matters in Year 8 PSHE & Citizenship

Year 8 moves from knowing the rules to **making wise, independent choices**. Supercurriculum work develops practical wellbeing habits, respectful relationships, digital citizenship, money basics, rights and responsibilities, and real participation in community life. Pupils learn to evaluate information, debate fairly, plan actions, and reflect on consequences. These skills strengthen confidence, empathy, resilience, and readiness for Upper KS3 and life beyond school.

YEAR 8 PSHE & CITIZENSHIP — FEEDBACK TEST

“Healthy habits, respectful dialogue, active citizenship”

Instructions: Rate each statement: 1 = Strongly Disagree, 2 = Disagree, 3 = Not Sure, 4 = Agree, 5 = Strongly Agree. Add the short reflection after each strand.

A. Reading

1. I can summarise articles about health, online safety, law, money, or rights.
2. I spot practical advice and the evidence behind it.
3. I can tell reliable information from opinion or clickbait.
4. I explain how a tip or right applies in real life.

Reflection: Which reading changed what you do day to day?

B. Writing

1. I write clear reflections on choices and consequences.
2. I can set a SMART goal and a simple action plan.
3. I argue a viewpoint respectfully, using reasons and examples.
4. I can write a short guide for others (safety, kindness, fairness, budgeting).

Reflection: Which writing task best showed your thinking?

C. Listening

1. I listen actively in discussions about wellbeing and citizenship.
2. I can recall key points and examples from what I heard.
3. I notice bias, stereotypes, or missing voices.
4. I respond with a balanced point of my own.

Reflection: What talk or discussion shifted your perspective?

D. Watching

1. I learn well from short videos on health, digital life, or civic issues.
2. I can separate facts from the presenter's opinions.
3. I link what I saw to school, home, or community situations.
4. I can suggest one improvement to make the video clearer or fairer.

Reflection: Which video helped you most, and why?

E. Researching

1. I find trustworthy sources (health, law, finance, local services).
2. I keep brief notes and record where I found them.
3. I compare two sources and choose which to trust and why.
4. I turn research into practical steps I could take.

Reflection: What topic will you investigate next?

F. Student-Led Tasks

1. I enjoy leading or supporting activities that help others learn.
2. I can design a short activity (scenario, quiz, values ranking).

3. I give kind, specific feedback and keep the group on task.
4. I summarise what we agreed and what happens next.

Reflection: When did you show leadership that made a difference?

G. Creative Tasks

1. I can design posters, slides, or short videos that persuade responsibly.
2. I role-play scenarios and model good decisions.
3. I use data alongside images to inform fairly.
4. I present confidently and answer questions.

Reflection: Which creative piece had the biggest impact on others?

Final Reflection

Choose one focus (stress management, digital citizenship, respectful debate, budgeting basics, community participation). Name two weekly actions you'll take to improve.

YEAR 8 PSHE & CITIZENSHIP — INTERVENTION FRAMEWORK

(Apply the level matching the average score in each strand.)

READING

If score is 1–2 (Needs Support):

Read a short page weekly on a practical topic (sleep, kindness online, consent for sharing photos, basic consumer rights). Write three sentences: **main message**, **one tip**, **how you'll try it**.

Outcome: Understands key advice and begins to apply it.

If score is 3 (Developing):

Read two short pieces on the same theme (e.g., screen time). Write: **one agreement**, **one difference**, **one action** for this week.

Outcome: Compares advice and connects it to behaviour.

If score is 4–5 (Secure/Advanced):

Read two contrasting viewpoints on a civic or ethical issue. Produce a 120-word evaluation with evidence and a balanced judgement.

Outcome: Weighs perspectives and justifies conclusions.

WRITING

If score is 1–2 (Needs Support):

Keep a weekly wellbeing/choices log: **What happened** → **How I felt** → **What helped** → **One next step**.

Outcome: Builds reflection and small-step planning.

If score is 3 (Developing):

Write a SMART goal and a step-by-step plan (who/when/where/how). Add a check-in date.

Outcome: Turns intentions into realistic actions.

If score is 4–5 (Secure/Advanced):

Create a 150-word peer guide (e.g., “Start a kindness campaign” or “Budget £10 for lunch week”). Include **three practical tips** and **one myth to avoid**.

Outcome: Communicates guidance clearly and helpfully.

LISTENING

If score is 1–2 (Needs Support):

After a talk or story, note **three facts** and **one piece of advice**; retell in two sentences.

Outcome: Retains essentials and distinguishes advice from information.

If score is 3 (Developing):

During a discussion, keep a T-chart of viewpoints with one reason for each. Add one question to understand more.

Outcome: Captures perspectives fairly and probes meaning.

If score is 4–5 (Secure/Advanced):

Listen to a debate/podcast. Write a 120-word critique on **logic**, **evidence**, and **missing voices**.

Outcome: Evaluates argument quality and inclusivity.

WATCHING

If score is 1–2 (Needs Support):

Watch a short scenario (friendship, online chat, bystander choice). Write **Problem** → **Options** → **Best choice (why)**.

Outcome: Recognises safe, respectful decisions.

If score is 3 (Developing):

Watch an explainer (sleep, labels, privacy settings). Create a four-step checklist to apply the advice at home/school.

Outcome: Converts advice into routine.

If score is 4–5 (Secure/Advanced):

Watch a civic/community clip. Write a 100-word critique on **clarity**, **fairness**, and **one improvement** (e.g., add youth voice, real data).

Outcome: Assesses communication and fairness.

RESEARCHING

If score is 1–2 (Needs Support):

Find **three facts** on a safe topic (hydration, screen breaks, kindness online).

Record the source and one action you'll try this week.

Outcome: Uses reliable basics and links to action.

If score is 3 (Developing):

Research a simple citizenship topic (school council, local volunteering, contacting a councillor). Write a short paragraph explaining the **steps** or **purpose**.

Outcome: Understands routes into participation.

If score is 4–5 (Secure/Advanced):

Compare two sources on a local issue (litter, transport, youth sport). Note **one agreement**, **one difference**, and your **evidence-based view**.

Outcome: Critical source comparison leading to a stance.

STUDENT-LED TASKS

If score is 1–2 (Needs Support):

Lead a 60-second reminder (e.g., “pause before posting”) with one example.

Outcome: Builds speaking confidence and positive norms.

If score is 3 (Developing):

Run a 5-minute mini-activity: values ranking, gratitude circle, or digital-footprint quiz. End with one action the group will try.

Outcome: Organises purposeful participation.

If score is 4–5 (Secure/Advanced):

Plan a small citizenship action (poster drive, litter pick, tutor-time survey). Set a

goal, assign roles, and write a two-sentence impact summary.

Outcome: Leads practical action and evaluates outcomes.

CREATIVE TASKS

If score is 1–2 (Needs Support):

Design a poster on a PSHE theme (sleep, respectful chat, bystander tips). Include one slogan and two steps.

Outcome: Communicates clear, positive messages.

If score is 3 (Developing):

Create a storyboard/role-play of a challenge and a respectful solution (friend disagreement, team inclusion). Add captions explaining choices.

Outcome: Practises problem-solving and empathy.

If score is 4–5 (Secure/Advanced):

Produce a 60–90 second awareness video/infographic (budget basics, safe sharing, joining youth groups). Include **one statistic**, **one tip**, and **where to get help**.

Outcome: Informs and persuades responsibly with evidence.

Optional weekly routine (quick guide)

- **Mon:** Short read + 3-sentence takeaway
- **Tue:** SMART goal update or wellbeing log
- **Wed:** Watch a scenario/explainer + apply checklist
- **Thu:** Research card (facts → action)
- **Fri:** Lead/participate in a mini activity + reflection

Gentle safety note

If a student feels worried about health, safety, or relationships, they should speak to a trusted adult (parent/carer or the school pastoral team). These activities support learning but do not replace professional help when needed.
